INDEX

CONTENTS

Preface

Introductory: The Indian Medicinal Herbs

CHAPTER I

1.Abrus

Description

Syrup Abrus. Co

Uses of Leaves

Abrus Leaves Extract

Cooling Bathing Oil

Uses of Seed

2.Acacia Arabica

Description

The Gum and the Twig

Babul Bark Decoction

<u>3.Agati Grandiflora</u>

The Uses of Leaves

The Uses of Juice

CHAPTER II

4.Ajowan

Ajowan: It's Usefulness

Its Properties and Preparations

5.Aloes

Its Varieties

It's Properties & Uses

<u>6.Alum</u>

Description

Uses of Alum

<u>7.Amla</u>

Description

Amla Sherbet

<u>A Laxative</u>

8.Anise

Digestive Powder

Aqua Anise

For Cough

A Digestive Power

A Gentle Laxative

9.Arai Keerai

Introductory

Uses of Arai Keerai

CHAPTER III

10.Asafoetida

Some Particulars

For Wind and Colic Bowels

Asafoetida Enema

For Hysteria

A Good Digestive Powder

Asafoetida Ear Drops

For Scorpion Sting

<u>11.Asoka</u>

Description

For Dysentery

Asoka Decoction

Asokarishta (Asokamritam)

Asoka Ghrita

12.Astercantha Longifolia

Description

Kokilaksha Decoction

Kokilaksha Infusion

Aphrodisiac Tonic

13.Aswagandha

Description

Aswagandha Choorna (Powder)-1

Aswagandha Choorna (Powder)-2

Aswagandha Choorna (Powder)-3

Aswagandha Decoction

Aswagandha Paste

Aswaagandhadi Pills 5-Grains

Aswagandha Arishta-1

Aswagandha Arishta-2

Aswagandhi Ghritam

Aswagandha Lehyam

14.Atis or Atees

Description

Atis Powder

Atis with Sugar

Atis with Honey

Atis Co. Decoction

Compound Atis Powder

15.Babchi Seeds

A Reputed Ayurvedic Medicine For Leucoderma

The Seeds, The Oil, The Tablet

16.Barley

A Nutritive Food for the Anaemic

Manifold Utility of Barley Water

Pearl Barley and the Powder

17.Bel Fruit

Uses of the Half-Ripe Fruit

Uses of the Unripe Fruit

The Pulp, The Leaf & The Root

Prescriptions

CHAPTER VI

18.Betel Leaf

Uses of the Leaf

Betel Poultice

Betel Leaf-Ginger Juice

Songsters' Friend

Betel Juice and Golochan

Betel Decoction

Betel Suppository

19.Betel Nut

<u>Uses</u>

Powder for Diarrhoea

Areca Nut Decoction

Areca Nut Tooth Powder

Compound Areca Nut Tooth Powder

Areca Root Decoction

For Tape-Worm

For Round and Thread-Worms

20.Bilwa Tree

Its Properties

Its Uses

Parts Used

Medical Preparations

CHAPTER VII

21.Black Pepper

Properties and Uses

Cholera Pill

Digestive Powder

Pepper Confection

Pepper Infusion

Pepper Tulsi Tea

For Growing Hair

22.Bonduc Nut

Description

Bonduc Seed Powder

Bonduc Seed Tooth-powder

Bonduc Seed Powder with Asafoetida

Bonduc Leaf Poultice

23.Borax

Description and Uses

Glycerine-Boracis

Mel Boracis

Plain Borax

Borax Dehydrated

CHAPTER VIII

24.Butea Seeds-I

The Leaf and the Seed

For Round-worm, Tape-worm, Ulcers

25.Butea Seeds-II

The Powder, The Leaves and The Gum

For Cobra Poison

Bark Decoction

Decoction of Butea Leaves

Butea Root (Palas-ka-ark)

Butea Bark (For Snake Bite)

Butea Flower

Butea Gum Powder (Bengal Kino)

Butea Leaf

26.Buttermilk

Description

Its Medicinal Qualities

Properties and Uses

CHAPTER IX

27.Camphor

An Anaphrodisiac

An antigalactagogue

An Antiseptic

For Pains

An Anti-Spasmodic

The Many Uses

28.Capsicum

Properties and Contents

Capsicum Gargle

Capsicum Pill

Capsicum Decoction

Capsicum Lozenge

Capsicum Liniment

Capsicum Powder

Capsicum Ointment

29. Caraway Seeds

Caraway Digestive Powder

Pancha-Deepagni Lehiam

Caraway Water

Digestive Powder

CHAPTER X

30. Cardamom

Digestive Powder—I

Cardamom Decoction

Digestive Powder—II

Compound Cardamom Powder

Cardamom Ghee

Cardamom Co. Pill

31. Cassia Alata

Dadmurdan Ointment

Dadmurdan Paste

Dadmurdan Oil

Preparation for Many Uses

32. Castor Oil

Castor Oil Poultice

Castor Oil Emulsion

Castor Oil with Tr. Opium

Castor Oil Eye Drops

As a Poultice

The Three Ghee

CHAPTER XI

33. Catechu

Description

Tincture Catechu

Catechu Powder

Catechu Compound Infusion

For Diarrhoea in Children

A Good Dentifrice

Catechu Infusion

Catechu Co. Ointment

34. Chaulmoogra Oil

Uses and Some Instructions

Chaulmoogra Co. Emulsion

Chaulmoogra Ointment-I

Chaulmoogra Ointment-II

Chaulmoogra Tonic

Chaulmoogra Pill

Plain Chaulmoogra Emulsion

35. Chiretta

Description

<u>Uses</u>

Chiretta Infusion—H

Chiretta Infusion—III

Chiretta Infusion—IV

CHAPTER XII

36. Cinnamon

Properties and Uses

Compound Cinnamon Powder

Cinnamon Decoction

Cinnamon and Catechu Decoction

Cinnamon and Catechu Powder

37. Cloves

Properties, Uses and Preparations

Infusion of Cloves

A Good Purgative

Cloves Chiretta Tonic

Compound Cloves Powder

Cloves Triphala Powder

38. Cocculus Indicus

Description

For Itching Skin

For Intravenous Injection

39. Coriander Seeds

Description

Uses of coriander Leaf

Coriander Infusion

Coriander Coffee

Coriander Co. Powder

Oil of Coriander

40. Country Fig

Uses of Fig Fruit

41. Country Gooseberry

Description

Leaf, Seed and Fruit

Gooseberry Juice

Gooseberry Sherbet

For Vomiting

Gooseberry Chutney

Gooseberry Patchadie

To relieve Constipation

CHAPTER XIV

42. Country Ipecacuantia Tylophora

Description

Uses of Powdered Dried Leaves

43. Country Sarsaparilla

Its Importance Emphasised in Ayurvedic Scriptures

Its Utility in Many Diseases

Sarsaparilla Coffee-1

Sarsaparilla Coffee-2

Sarsaparilla Drink

Sarsaparilla Sherbet

<u>Saribadyarishta</u>

Sariva Quath (decoction)

44. Croton Seeds

Description and Uses

Croton Pill

Croton Oil Liniment

How to Purify Croton

45. Cubebs

Description and the Uses

Cubebs Co. Powder-1

Cubebs Co. Powder-2

CHAPTER XV

46.Dhatura

Properties, Varieties and Uses

Fr inhalation in Asthma

Dhatura Cigarette

Dhatura Fomentaion

Dhatura Poultice

Dhatura Liniment

47.Dill Seeds

Description and the Uses

Dill Water

Dill and Lime Water

D.L.A. Water

Dill Flower Decction

For Confinement Women

Dill Leaf Poltice

Dill Leaf Powder

Dill Juice

48.Dried Ginger

Aromatic, Stimulant and Carminative

Uses and Preprations

CHAPTER XVI

49. Edible Hibiscus

Description, Properties and Uses

Lady's Finger Decoction

50. Essence of Ginger

Its Colour and Its Uses

51. Fenugreek

Description and the Uses

Methi Leaf

Confection of Leaf

Methi Decoction

Methi Seeds

Methi Laddu

Methi Seeds with Rice

Methi Soup or Kuzhambhu

CHAPTER XVII

52. Four o'clock Flower

Derivation of the Name

The Leaf a Deobstruent, the Root a Laxative

Preparations and Uses

53. Fresh Ginger

Ginger with Milk

Ginger Juice Preparation

Allopaths and Ginger Preparations

Kitchen & Some Common Uses of Ginger

54. Galangal

Its Two Varieties and Its Uses

Galangal Powder

Galangal Infusion

Galangal Decoction

CHAPTER XVIII

55. Galls or Galla

Description

Three Varieties and Many Uses

Gall Decoction

Compound Gall Powder

Compound Gall Pill

Gall and Ghee Ointment

Gall Gargle

Plain Gall Powder

Gall Snuff

Gall and Benzoin Ointment

For Intermittent Fever

Gall and Chiretta

Tannic Acid

Tannic Acid Ointment

56. Garjan Oil

Characteristics & Effective Uses

Garjan Oil Emulsion—I

Garjan Oil Emulsion-II

Garjan Oil Ointment

57. Garlic

Properties of Garlic

Uses of Garlic

Ear Drops

Dysentery Confection

Liniment

Garlic Decoction

58. Gulancha

Description

Beneficial Effects of Tinospore

Gulancha Compound Infusion

Sat-Gilo or Giloka-sat

Gulancha Infusion

Gulancha Decoction

Gulancha-Chiretta Decoction

CHAPTER XIX

59. Holy Basil

Religion and Holy Basil

The Black and the White

Properties of Leaves

The Uses of Leaves

Insect-bite and Tulasit

The Tea, the Oil the Seeds

60. Honey

Value of Honey for Medicine Chest

Glucose and Laevulose in Honey

Mel Borax

Oxymel

The Morning Drink

A Substitute for Sugar and Useful in Burns

61. Indian Acalypha

Description

Its Properties and Medicinal Purposes

Beneficial in Chronic Bronchitis

Juice of the Leaves: An Emetic

Powder Useful in Cough

Uses of the Juice and the Decoction

Paste of the Leaves

CHAPTER XX

62. Indian Parselanen

Description

Uses of the Juice and the Paste

63.Indian Pennywort-I

A Very Precious Herb

Uses of the Powder

The Brahmi Drink

The Juice and Powder

Decoction of the Entire Plant

The Paste and the Juice

Indian Pennywort-II

Pennywort Pills

Pennywort Poultice

For Diarrhoea of Children

Pennywort Co. piils

Pennywort Decoction

Pennywort Leaves Powder

For Leprosy

Pennywort Co. Decoction

Juice and Milk

Pennywort Ointment

65. Isafgul

The Preparation

For Dysentery and Diarrhoea

A Special Preparation

CHAPTER XXI

66. Jatamanji

The Uses

The Two Varieties

Infusion Jatamanji

Epilepsy-Hysteria Mixture

Jatamanji Co. Powder

For Grey Hair

67. Kala-Dana

Description and Uses

Purgative Powder

Fever Powder

68. Kamela

<u>Uses</u>

For Tapeworm, etc.

For Ringworm, etc.

69. Kandang Kathri

<u>Uses</u>

Juice Boiled with Mustard Oil

Juice Boiled with Linseed Oil

Juice Boiled with Almond Oil

Seeds and the Fruit

CHAPTER XXII

70. Kuppameni

Description

Therapeutic Uses

71. Kurchi

Description

Kurchi Infusion

Kurchi Powder

72.Lawsonia Alba

The Properties

The Uses

The Flowers, Leaves and the Bark

73.Lemon-Grass Oil

Description

<u>Uses</u>

Emulsion

A Good Liniment

CHAPTER XXIII

74.Lime Fruit

Uses of the Fruit—I

Uses of the Juice-I

Uses of the Fruit-II

Uses of the Juice—II

Lemonade

75. Linseed

Uses of the Leaf, the Seed and the Flower

Linseed Oil

Linseed Tea

Linseed Poultice

Carron Oil

Linseed and Sugar

Linseed Confection

Linseed Lehiam

76. Liquorice

Constituents and Preparations

Syrup of Liquorice

Liquorice Lozenge

Liquorice Pill

Liquorice Extract

77. Long Pepper (Pipul)

<u>Uses</u>

Long Pepper with Myrobalan

Cough Powder

Pipul Infusion

A Good Digestive Powder

Pipul with Honey

Pipul with Milk

Pipul Confection

CHAPTER XXIV

78. Malabar Night Shade

Description

<u>Uses</u>

79.Manathakkali

The Uses of the Fruit and Leaf

Juice and Decoction of the Leaf

80. Mint

Varieties of Mint

Its Uses

Pudina Tel and Its Utilities

81. Moringa

The Root, Flower and the Bark

Murungai Infusion

The Leaves and Their Uses

Utility of the Flower, Fruit and the Gum

CHAPTER XXV

82. Mudar

Mudar Root-Bark

Mudar Powder

Mudar Leaf

Mudar Flower

83. Mustard

The Uses

Its Utilities in Foot-Bath

Mustard Plaster

84. Myrobalan

Description, **Properties and Uses**

A Safe and Gentle Laxative

Triphala, Choorna

A Good Laxative

Myrobalan Decoction

85. Neem (Margosa)

The Properties and the Uses

Neem Decoction

Neem Powder

Neem Poultice

Neem Leaf

Children's Friend

Neem Flower Chutney

Neem Flower Rasam

Neem Bark Decoction

86. Nutmeg

The Properties and the Uses

Nutmeg Co. Powder

Pulvis Nutmeg Compound

CHAPTER XXVI

87. Opium

Description

Properties and Uses

Allopathic Preparations

Instructions for Uses

Compound Opium Powder

Gall and Opium Ointment

Poppy Heads Fomentation

88. Papaya

The Fruit and the Milky Fluid

The Digestive Powder

The Digestive Drink

The Uses of Ripe and Unripe Fruit

The Utility of the Leaves

89. Papaya—II

Papaya Juice with Honey

Papaya Juice with Sugar

Papaya Juice with Milk

Papain

For Ringworm

Papaya Leaf Poultice

90. Peepul Tree

Description

The Uses

Powder

Dusting Powder

Decoction

Infusion

Ash of the Bark

91. Pellyworth Root

The Properties and the Uses

Compound Pellyworth Powder

CHAPTER XXVII

92. Physic-nut Plant

Description and the Properties

The Utility of Leaves and Milk

The Uses of the Oil

The Stick and the Root-bark

93. Pine Apple

The Properties of Leaf and Fruit

The Uses of the Fruit

94. Plantain

Description

The Flower

The Fruit

The Leaf

Plantain Fruit with Milk

Plantain with Tamarind

95. Pomegranate

Properties

Pomegranate Decoction

Pomegranate and Kurchi Decoction

Pomegranate Decoction with Alum

Root-Bark Decoction

The Uses

CHAPTER XXVIII

96. Ponnangkani

Description

Preparations and Uses

97. Ptercarpus Marsupium

Description

Uses of the Timber

Kino from the Bark

The Leaves

Germination and Growth of the Tree

A Piece of Wood and the Drink

98. Pulichakkerai

Properties and Uses

Juice of the Flower

CHAPTER XXIX

<u>99. Rice</u>

Varieties of Rice and Properties

For External Use

For Internal Use

100. Salt

Salt Oil

Salt Gargle

Salt as an Emetic

101.Sandal Wood

<u>Uses</u>

Sandal Wood Oil

102. Sapota

For Blood Enrichment

103. Senna

Description

<u>Uses</u>

Method of Preparation

For Children

CHAPTER XXX

104. Sesamum

Uses of Leaves

Uses of the Seeds

Uses of the Oil of Sesamum-I

Uses of the Oil of Sesamum-II

105. Spinach

Importance of Green Leaves

Nutritive and Medicinal Value of Spinach

Uses of the Juice

The Decoction of the Leaves

106. Sundakai

A Digestive Tonic

Contains Carbohydrates

As a Pickle

<u>Uses</u>

Some Preparations

As Snuff

107. Sweet Flag

Description and Uses

Infusion Acorus

Infusion Acorus and Chiretta

Decoction of Acorus

Acorus Paste

Acorus Co., Decoction

Acorus Co., Digestive Powder

CHAPTER XXXI

108. Tamarind

Description and Uses

Tamarind Drink—I

Tamarind Drink—II

A Good Laxative

Panakam

109. Thumbai

Properties and Uses

Decoction of the Flower

Other Uses of the Juice of the Flower

110. Thuthulai

Uses of the Leaf and the Flower

Uses of the Unripe and the Ripe Fruit

Preparations from the Leaf

111. Turmeric

The Many Uses of Turmeric

Turmeric Paste

Turmeric Digestive Powder

Turmeric Decoction

Turmeric Ointment

Turmeric Poultice

112. Vasaka-l

Constituents of the Herb

<u>Uses</u>

Adhatoda Decoction

113. Vasaka-II

Description

Uses of Leaves

Juice of the Leaves

CHAPTER XXXII

114. Vernonia Seeds

Description

<u>Uses</u>

Vernonia Paste

115. Walnut

Description

Uses of Leaf, Fruit, Nut and Seed

Uses of the Skin of the Fruit

116. White Pumpkin

Properties and Uses

The Confection

117. Worm-Killer

Properties and Uses

Preparation

Leaves and the Paste of the Root

Powder

<u>Oil</u>

CHAPTER XXXIII

ANTISEPTICS AND BAZAAR DRUGS

<u>118. Lysol</u>

Simple Veterinary Treatment at Home

PREFACE

Everyone should possess an elementary knowledge of home remedies. Even this elementary knowledge of home remedies will go a long way in alleviating a diversity of human suffering and saving valuable lives. All cannot afford to pay the doctor's bill and purchase costly patent medicines. The results achieved by "Chamberlain's Cough Remedy" or "Venos Lightening Cough Cure" can be very easily obtained by a decoction of the vegetable Ladies-finger at the cost of a few pies, or a lozenge made out of black pepper, sugar-candy, liquorice and honey.

This book supplies a handy list of "Home Remedies" and a list of very useful, practical, potent prescriptions made up from them. There are very good prescriptions for diarrhoea, dysentery, fevers, malaria, indigestion, flatulence, constipation, debility, influenza, bronchitis, cough, scurvy, rheumatism, biliousness, liver, kidney, lung troubles, etc.

In places where there are no dispensaries, "Home Remedies" will come to your help, and guide you like an able Family Physician. Prakriti or Mother Nature has been very, very kind and beneficent. She has placed valuable potent herbs and plants at your backyard, immediate neighbourhood and garden. Make use of these herbs and be healthy and strong.

Equip your household, domestic, medicine chest with preparations like dysentery powder, diarrhoea powder, cough lozenges, constipation powder, pills, etc. Your whole family will be immensely benefited.

Rural dispensaries can give you a great deal of medical relief at a very little cost if "Household Remedies" or Bazaar medicines are intelligently, judiciously and largely used.

In the Medical Schools and Colleges in India, Europe and America, the students should get a knowledge of Indian plants, herbs and drugs, during their course of study of Materia Medica. There is a great potency or potentiality in each of In-dian herbs and plants. Many plants have very great therapeutic value.

Zandu Pharmaceutical Works, Bombay, and Alembic Chemical Works, Baroda, are manufacturing many valuable preparations out of the Indian herbs and plants. Still big manufacturing and pharmaceutic chemists are needed in India and the whole world at large who can make and standardize prepa-rations and put them on the market.

Free India should start now many Ayurvedic laboratories in different parts of India to manufacture various Ayurvedic preparations and send them to different parts of the world and should have Ayurvedic conquest. Ayurveda will surely have tri-umph over other systems of medicine as the preparations are very potent, cheap and produce lasting effect and permanent cure.

A doctor should have a very large Vedantic heart and broad tolerance. He should see good in every system of medi-cine. He should welcome good from each system and utilise it in the treatment of his patients. Every individual has a peculiar temperament. Allopathic drug that suits one temperament will not be suitable to another person. Homeopathy suits X, allopathy suits Y and Ayurveda suits Z. And as such a synthetic doctor can do more good to the patients by

taking recourse to different systems. Every doctor should have a synthetic knowl-edge of all systems. Every doctor should have a perfect knowl-edge of the Indian plants and herbs. Then they can attend well to the health of the patients and their families.

It is hoped that this handy book will be of great help to the householders, rural doctors and the general practitioners as well.

INTRODUCTORY

THE INDIAN MEDICINAL HERBS

The central fact of Indian Culture is its conception of the spiritual Ideal. Its core and essence is the fundamental belief that the attainment of perfection is the sole purpose of man's life. Thus the worth and value of all the other parts and aspects of our life is estimated and equated in terms of their utility in serving this central Ideal. The value of human birth and body was accepted because man's body was recognised as the su-preme instrument through which to strive for reaching life's great consummation. The ancient Seers, the Rishis of wisdom, therefore, spared no pains in carefully evolving a great system of medicine to help to keep this precious instrument, i.e., the human body, in perfect trim. The maintenance of the body in proper disease-free condition and perfect health was a sacred duty of man, for it constituted the primary means of all attain-ments because, "Health is the supreme root of attainment of the Good Life, of all wealth, fulfilment of cherished desires and ultimate Liberation". The intuitive sages of India were in full awareness of this important fact; for, notwithstanding their lofty idealism they had the admirable faculty to be intensely practical and thorough.

The Indian Seers in the past have devoted special attention to the study of health, disease and therapeutics. They have worked upon Ayurveda or the science of Life as another Veda.

Ayurveda believes in treatment by herbs which form its mainstay. The greater part of the treatment of Ayurvedic practi-tioner is by medicinal herbs. How very minute and how thor-oughly scientific is their study of these herbs and their characteristics is amply evidenced by the scholarly treatises of these ancient scientists in which subjects they have given us the results of their admirable researches.

Besides this evidence, the very fact of these herbal medi-cines continuing to be widely used with remarkable success, even up to this day, by quite modern Ayurvedic medical practi-tioners all over India, is a patent proof beyond any doubt about the high and enduring merits of this system of therapeutics.

The high development and specialisation of herbal medi-cation in this country has been a direct outcome of the fact that due to her vastness and fertility, India had the unique advan-tage of possessing a wide range of climatic, geographical and geological conditions wherein came to flourish an infinite vari-ety of numerous, rare and precious herbs. The ancient seer scientists were ardent lovers of nature and dwellers of the syl-van forests, and as such, had wonderful scope for close obser-vation of the rich herbal wealth of the vegetable kingdom. Theirs has

been a critical examination and study of almost all the important medicinal herbs. Thus a good deal of literature, deeply interesting and greatly informative, came into being on this branch of knowledge. One of the greatest authorities upon this subject is the illustrious author Charaka whose invaluable work, the "Charaka-Samhita" is still accepted as the standard classical work on medicine. It forms by far the most exhaustive treatise, and in it Maharshi Charaka gives nearly fifty different groups of medicinal herbs, naming ten herbs under each group. These fifty groups or ganas, he considers as being quite sufficient for the purpose of the average medical practitioner. Another great authority, the able author Sushruta, who is ranked equal with Charaka, has mentioned about 760 herbs which he has divided into thirty seven ganas or groups in accor-dance with certain common characteristics. His masterly work was translated into Arabic as early as twenty centuries ago somewhere about 800 A.D. Later, translations into Latin and German also appeared. Charaka's works too were translated into Arabic and references are made in several Latin works of eminent Western physicians.

The grouping of these medicines by these writers reveal an astonishing knowledge of pathology and diseases thera-peutics, of the savants of so ancient a period. In the wide range of these grouping are included Anaesthetic, Anabolic, Anthelmintic, Anemetic, Anodyne, Antibromic, Anticolic, Anti-fat, Antasthmatic, Anticholeric, Antiscorbutic, Antihy-pnotic, Anuretic, Antipyretic, Antipsoric, Antiphlegmagogue, Antispasmodic, Astringent, Aphrodisiac, Antitoxic, Cathartic, Calmative, Cholagogue, Carminative, Constringent, Cosmetic, Demulcent, Diaphoretic, Diuretic, Emetic, Drastic, Emmenagogue, Epispastic, Expectorant, Epulotic, Frigorific, Fat-producer, Flatus-Producer, Fat-former, Galactagogue, Haemostatic, Hypnotic, Hydragogue, Liguefacient, Lithonlytic, Laxative, Parturifacient, Phlegmagogue, Purgative, Inebrient, Rejuvenascent, Refrigerant, Rubefacient, Restorative, Siala-gogue, Sedative, Semen-improver, Stypic, Tonic, Vermibarous, Stomachic, Spermatopoietic, Voice-improver etc. A disciple of the great Charaka, Agnivesha by name, enumerates many more classes of medicines besides those mentioned above. The "Bhava-Prakasha" of Bhava Misra (another important writer on medicinal herbs) further adds certain valuable medi-cines. New light is thrown upon a number of these medicines in the "Aatankatimirabhaskara" a comparatively recent work of considerable size by some Ayurveda Acharya belonging to the eighteenth century. An even more recent author Pundit Godbole has published in the later half of last century his "Nighantaratnakara" epitomising all the previous works on Materia Medica with nearly fifty new herbs added, as the result of fresh research.

The high potency and curative value of the Indian medici-nal herbs have, for long, been well recognised in countries out-side India. Even so, as far back as previous to the Christian Era, ancients like Hippocrates recommended Indian herbs in their medical treatises. The Greek physician Dioscordes (100 A.D.) speaks well of the numerous Indian plants, the medicinal virtues of which he had thoroughly investigated before incorpo-rating them into his famous Materia Medica. Later on the Physi-cians who came in the train of the Mohammedan conquerors were quick to perceive the great potency and worth of the In-dian medicines, and began to make use of them without hesita-tion. Mohammed Akbar Arzani, the Court Physician of Emperor Aurangazeb and Nuruddin Mohammed Abdulla Shirazee, the personal Hakeem to

the great Shah Jehan have both included numerous efficacious medicines from the Ayurveda Materia Medica into their famous works on medicine. And a glance at the "Allopath's Pharmacopeia" today will be enough proof that the Indian herb has fully lived upto its reputation as potent heal-ers.

There is a special reason why medicinal herbs constitute the most invaluable sovereign remedy for every ailment. It is because they contain in them the 'curative element' in its most vital, potent, and withal, easiest state. This is brought about by the following factors: the herbs are God sent apparatuses en-dowed with the unique capacity for converting valuable inor-ganic ganic earth-salts, chemicals and minerals into organic substances eminently suitable for complete absorption into the human system. The cells in the human body are vital tissues. Chemical drugs are inert matter. They are never fully absorbed into the human system and fail to go to the root of the trouble and effect a radical cure. In herbs we have vital substances that actually get absorbed into the very core of our tissues. The es-sence of herbs is the vital substance. These remedies go to the very root of the disease and remove it in toto as they are assim-ilated into the cell of the human system. They are also, in a way, in predigested form because they come from the soil, specially energised by potent rays of the sun and the gases of the atmo-sphere. Thus, these herbal essences get purified and irradi-ated during the hours of day light and, in addition, store up the healing potencies of the lunar rays at night. The latter infuse the herb with marvelous curative properties. Furthermore, the herb forms the medicine par excellence as it is infused by a life-prin-ciple drawn out of the power of the Panchabhutas or the five fundamental elements, i.e., earth, water, fire, air and ether. The physical frame of man is a combination of these five, and hence, the herbal extract is the nearest approach to the most ideal combination for administration. The secret of the marvel-lous and almost miraculous curative potencies of the herb, is the presence in them of a supraterrestrial force, i.e., the solar energy. The Sun is the source of cosmic energy. It is the source of the mightiest healing power known to mankind. Hindu seers have regarded the Sun as Divine in nature. And the only substance known in nature that possesses the capacity of stock piling solar energy in the form of a usable essence is the plant chlorophyll. Precisely, therefore, herbs are said to possess di-vine potency termed by Hindus as Divya Shakti.

The study of herbs is of absorbing interest. Their adminis-tration is also simple, compared to the elaborate and compli-cated process of other pharmacopoeias. It is now an established fact that the science of herbal cure is not experi-mental. Its high merits and practical utility have long been put to severe tests by the Rishis and practitioners of the past whose researches and practical therapeutical findings have been mi-nutely recorded for us in their illuminating treatises. Therein we find their minute study of the herbs; their characteristics, habi-tat, conditions for their healthy growth, their appearance, the time of highest potency etc. The proper season for gathering the herbs, the localities from which they should be collected and the right method of processing them, isolating the active principle and preserving it, are all accurately and scientifically detailed. One noteworthy point in the naming of these Indian medicinal herbs is that in great many cases their very names are descriptive of the specific character or prominent appear-ance of the plant. This becomes an effective means for the easy

identification of the particular herb. Thus, for instance, Acores Calamus has the name Ugragandha (strong-odour), for it is characterised by very pungent smell. The name Vatsa-nabha (calf's navel) describes the plant Aconitum ferox because its root resembles the umbilical cord of a calf. Tribulus Terrestris is referred to by the significant name Trikantaka (three-thorned) as its fruit contains three prickles. Ricinus Communis goes by the name Chitrabija (spotted seed) due to its seed being speckled by white or brown patches. Datura Alba is named Ghantapushpa (bell-flower) due to the shape of its flowers. The long and cylindrical podded Cassia Fistula gets the name Deerghafala (long fruit) and the plant Sapindus Emarginatus is called Bahuphena (very foamy) because its berries produce a rich soapy lather when rubbed and shaken with water.

A full study of all the herbal medicines is not a possibility in the introductory note. The interested reader can gather some idea of the precious gems that are to be found in the mine of this Ayurvedic Materia Medica.

India has ever been evolving art after art, science after sci-ence as her contribution to the common heritage of all the na-tions of the world. Her greatest gift to the world is the gift of the spiritual science of Self-perfection. Next to it I would place this science of Life, the Ayur-veda as a precious gift to be carefully developed and broadcast to all nations. It is a national duty of every Indian.

Preface Introductory: The Indian Medicinal Herbs	Part-I	6 8
	Section-I	
	Chapter-I	
 1.Abrus (i) Description (ii)Syrup Abrus. Co (iii)Uses of Leaves (a)Abrus Leaves Extract (b)Cooling Bathing Oil (iv)Uses of Seed 		41
2.Acacia Arabica (i)Description (ii)The Gum and the Twig (iii)Babul Bark Decoction		43
3.Agati Grandiflora (i)The Uses of Leaves		44
(ii)The Uses of Juice C		
4.Ajowan (i)Ajowan: It's Usefulness (ii)Its Properties and Preparations		45
5.Aloes (i)Its Varieties		46
(ii)It's Properties & Uses6.Alum(i)Description(ii)Uses of Alum		47
7.Amla (i)Description (ii)Amla Sherbet (iii)A Laxative		48
 (iii)A Laxative 8.Anise (i)Digestive Powder (ii)Aqua Anise (iii)For Cough (iv)A Digestive Power 		50

(v)A Gentle Laxative9.Arai Keerai(i)Introductory(ii)Uses of Arai Keerai

CHAPTER III

10.Asafoetida (i)Some Particulars (ii)For Wind and Colic Bowels (iii)Asafoetida Enema (iv)For Hysteria (v)A Good Digestive Powder (vi)Asafoetida Ear Drops (vii)For Scorpion Sting 11.Asoka (i)Description (ii)For Dysentery (iii)Asoka Decoction (iv)Asokarishta (Asokamritam) (v)Asoka Ghrita 12.Astercantha Longifolia (i)Description (ii)Kokilaksha Decoction (iii)Kokilaksha Infusion (iv)Aphrodisiac Tonic

CHAPTER IV

13.Aswagandha
(i)Description
(ii)Aswagandha Choorna (Powder)-1
(iii)Aswagandha Choorna (Powder)-2
(iv)Aswagandha Choorna (Powder)-3
(v)Aswagandha Decoction
(vi)Aswagandha Paste
(vii)Aswaagandhadi Pills 5-Grains
(viii)Aswagandha Arishta-1
(ix)Aswagandha Arishta-2
(x)Aswagandhi Ghritam
(xi)Aswagandha Lehyam
14.Atis or Atees

56

60

52

54

 (i)Description (ii)Atis Powder (iii)Atis with Sugar (iv)Atis with Honey (v)Atis Co. Decoction (vi)Compound Atis Powder 	CHAPTER V
 15.Babchi Seeds (i)A Reputed Ayurvedic Medicine For Leucoderma (ii)The Seeds, The Oil, The Tablet 16.Barley (i)A Nutritive Food for the Anaemic (ii)Manifold Utility of Barley Water (iii)Pearl Barley and the Powder 17.Bel Fruit (i)Uses of the Half-Ripe Fruit (ii)Uses of the Unripe Fruit (iii)The Pulp, The Leaf & The Root (iv)Prescriptions 	

CHAPTER VI

18.Betel Leaf
(i)Uses of the Leaf
(ii)Betel Poultice
(iii)Betel Leaf-Ginger Juice
(iv)Songsters' Friend
(v)Betel Juice and Golochan
(vi)Betel Decoction
(vii)Betel Suppository
19.Betel Nut
(i)Uses
(ii)Powder for Diarrhoea
(iii)Areca Nut Decoction
(iii)Areca Nut Decoction
(iii)Areca Nut Decoction (iv)Areca Nut Tooth Powder

(viii)For Round and Thread-Worms

20.Bilwa Tree

61

63

63

66

(i)Its Properties(ii)Its Uses(iii)Parts Used(iv)Medical Preparations

CHAPTER VII

21.Black Pepper

(i)Properties and Uses
(ii)Cholera Pill
(iii)Digestive Powder
(iv)Pepper Confection
(v)Pepper Infusion
(vi)Pepper Tulsi Tea
(vii)For Growing Hair
22.Bonduc Nut
(i)Description
(ii)Bonduc Seed Powder
(iii)Bonduc Seed Tooth-powder
(iv)Bonduc Seed Powder with Asafoetida
(v)Bonduc Leaf Poultice

23.Borax

(i)Description and Uses
(ii)Glycerine-Boracis
(iii)Mel Boracis
(vi)Plain Borax
(v)Borax Dehydrated

CHAPTER VIII

24.Butea Seeds-I (i)The Leaf and the Seed

(ii)For Round-worm, Tape-worm, Ulcers
25.Butea Seeds-II
(i)The Powder, The Leaves and The Gum
(ii)For Cobra Poison
(iii)Bark Decoction
(vi)Decoction of Butea Leaves
(v)Butea Root (Palas-ka-ark)
(vi)Butea Bark (For Snake Bite)
(vii)Butea Flower
(viii)Butea Gum Powder (Bengal Kino)

72

73

75

77

(ix)Butea Leaf

CHAPTER IX	
26.Buttermilk	80
(i)Description	
(ii)Its Medicinal Qualities	
(iii)Properties and Uses	
27.Camphor	81
(i)An Anaphrodisiac	
(ii)An antigalactagogue	
(iii)An Antiseptic	
(iv)For Pains	
(v)An Anti-Spasmodic	
(vi)The Many Uses	
28.Capsicum	82
(i)Properties and Contents	
(ii)Capsicum Gargle	
(iii)Capsicum Pill	
(iv)Capsicum Decoction	
(v)Capsicum Lozenge	
(vi)Capsicum Liniment	
(vii)Capsicum Powder	
(viii)Capsicum Ointment	
29. Caraway Seeds	84
(i)Caraway Digestive Powder	
(ii)Pancha-Deepagni Lehiam	
(iii)Caraway Water	
(iv)Digestive Powder	
(v)Borax Dehydrated	

CHAPTER X

30. Cardamom

(i)Digestive Powder—I
(ii)Cardamom Decoction
(iii)Digestive Powder—II
(iv)Compound Cardamom Powder
(v)Cardamom Ghee
(vi)Cardamom Co. Pill
31. Cassia Alata
(i)Dadmurdan Ointment

(ii)Dadmurdan Paste
(iii)Dadmurdan Oil
(iv)Preparation for Many Uses
32. Castor Oil
(i)Castor Oil Poultice
(ii)Castor Oil Emulsion
(iii)Castor Oil with Tr. Opium
(iv)Castor Oil Eye Drops
(v)As a Poultice
(iv)The Three Ghee

CHAPTER XI

33. Catechu

(i)Description
(ii)Tincture Catechu
(iii)Catechu Powder
(vi)Catechu Compound Infusion
(v)For Diarrhoea in Children
(vi)A Good Dentifrice
(vii)Catechu Infusion
(viii)Catechu Co. Ointment

34. Chaulmoogra Oil

- (i)Uses and Some Instructions
 (ii)Chaulmoogra Co. Emulsion
 (iii)Chaulmoogra Ointment—I
 (iv)Chaulmoogra Ointment—II
 (v)Chaulmoogra Tonic
 (vi)Chaulmoogra Pill
 (vii)Plain Chaulmoogra Emulsion
 35. Chiretta
 (i)Description
- (ii)Uses Chiretta Infusion—I
 (iii)Chiretta Infusion—H
 (iv)Chiretta Infusion—III
 (v)Chiretta Infusion—IV

CHAPTER XII

36. Cinnamon

(i)Properties and Uses(ii)Compound Cinnamon Powder(iii)Cinnamon Decoction(iv)Cinnamon and Catechu Decoction

91

93

95

(v)Cinnamon and Catechu Powder		
37. Cloves		99
(i)Properties, Uses and Preparations		
(ii)Infusion of Cloves		
(iii)A Good Purgative		
(iv)Cloves Chiretta Tonic		
(v)Compound Cloves Powder		
(vi)Cloves Triphala Powder		
38. Cocculus Indicus		101
(i)Description		
(ii)For Itching Skin		
(iii)For Intravenous Injection		
	CHAPTER XIII	
39. Coriander Seeds		102
(i)Description		
(ii)Uses of coriander Leaf		
(iii)Coriander Infusion		
(iv)Coriander Coffee		
(v)Coriander Co. Powder		
(iv)Oil of Coriander		
40. Country Fig		104
(i)Uses of Fig Fruit		
41. Country Gooseberry		104
(i)Description		
(ii)Leaf, Seed and Fruit		
(iii)Gooseberry Juice		
(iv)Gooseberry Sherbet		
(v)For Vomiting		
(vi)Gooseberry Chutney		
(vii)Gooseberry Patchadie		
(viii)To relieve Constipation		
	CHAPTER XIV	
42. Country Ipecacuantia Tylophora	l	106
(i)Description		
(ii)Uses of Powdered Dried Leaves		
43. Country Sarsaparilla		107
(i)Its Importance Emphasised in Ayurv	edic Scriptures	
(ii)Its Utility in Many Diseases		
(iii)Sarsaparilla Coffee-1		
(iv)Sarsaparilla Coffee-2		
(v)Sarsaparilla Drink		

(vi)Sarsaparilla Sherbet		
(vii)Saribadyarishta		
(viii)Sariva Quath (decoction)		
44. Croton Seeds		
(i)Description and Uses		
(ii)Croton Pill		
(iii)Croton Oil Liniment		
(iv)How to Purify Croton		
45. Cubebs		
(i)Description and the Uses		
(ii)Cubebs Co. Powder-1		
(iii)Cubebs Co. Powder-2		
(iv)Cough Mixture		
(v)Cubebs with Hot Milk		
(vi)Cubebs Oil Mixture		
(vii)Cubeb Decoction		
(viii)Cubebs with Honey		

Section II

CHAPTER XV

46.Dhatura
(i)Properties, Varieties and Uses
(ii)Fr inhalation in Asthma
(iii)Dhatura Cigarette
(iv)Dhatura Fomentaion
(v)Dhatura Poultice
(vi)Dhatura Liniment
47.Dill Seeds
(i)Description and the Uses
(ii)Dill Water
(iii)Dill and Lime Water
(iv)D.L.A. Water
(v)Dill Flower Decction
(vi)For Confinement Women
(vii)Dill Leaf Poltice
(viii)Dill Leaf Powder
(ix)Dill Juice
48.Dried Ginger
(i)Aromatic, Stimulant and Carminative
(ii)Uses and Preprations

109

111

113

CHAPTER XVI

49. Edible Hibiscus		119
(i)Description, Properties and Uses		
(ii)Lady's Finger Decoction		120
50. Essence of Ginger (i)Its Colour and Its Uses		120
51. Fenugreek		120
(i)Description and the Uses		
(ii)Methi Leaf		
(iii)Confection of Leaf		
(iv)Methi Decoction		
(v)Methi Seeds		
(vi)Methi Laddu		
(vii)Methi Seeds with Rice		
(viii)Methi Soup or Kuzhambhu		
	CHAPTER XVII	
52. Four o'clock Flower		122
(i)Derivation of the Name(ii)The Leaf a Deobstruent, the Root a	a Lavative	
(iii)Preparations and Uses		
53. Fresh Ginger		123
(i)Ginger with Milk		
(ii)Ginger Juice Preparation		
(iii)Allopaths and Ginger Preparations	3	
(iv)Kitchen & Some Common Uses of	fGinger	
54. Galangal		124
(i)Its Two Varieties and Its Uses		
(ii)Galangal Powder (iii)Galangal Infusion		
(iv)Galangal Decoction		
	CHAPTER XVIII	
55. Galls or Galla		125
(i)Description		
(ii)Three Varieties and Many Uses		
(iii)Gall Decoction		
(iv)Compound Gall Powder		
(v)Compound Gall Pill		
(vi)Gall and Ghee Ointment		
(vii)Gall Gargle		

(viii)Plain Gall Powder	
(ix)Gall Snuff	
(x)Gall and Benzoin Ointment	
(xi)For Intermittent Fever	
(xii)Gall and Chiretta	
(xiii)Tannic Acid	
(xiv)Tannic Acid Ointment	
56. Garjan Oil	129
(i)Characteristics & Effective Uses	
(ii)Garjan Oil Emulsion—I	
(iii)Garjan Oil Emulsion—II	
(iv)Garjan Oil Ointment	
57. Garlic	130
(i)Properties of Garlic	
(ii)Uses of Garlic	
(iii)Ear Drops	
(iv)Dysentery Confection	
(v)Liniment	
(vi)Garlic Decoction	100
58. Gulancha	132
(i)Description	
(ii)Beneficial Effects of Tinospore	
(iii)Gulancha Compound Infusion	
(iv)Sat-Gilo or Giloka-sat (v)Gulancha Infusion	
(vi)Gulancha Decoction	
(vii)Gulancha-Chiretta Decoction	
CHAPTER XIX	
59. Holy Basil	134
(i)Religion and Holy Basil	
(ii)The Black and the White	
(iii)Properties of Leaves	
(iv)The Uses of Leaves	
(v)Insect-bite and Tulasit	
(vi)The Tea, the Oil the Seeds	100
60. Honey	136
(i)Value of Honey for Medicine Chest	
(ii)Glucose and Laevulose in Honey	
(iii)Mel Borax (iv)Oxymel	
(v) The Morning Drink	
(v) A Substitute for Sugar and Useful in Burns	

61. Indian Acalypha	138
(i)Description	
(ii)Its Properties and Medicinal Purposes	
(iii)Beneficial in Chronic Bronchitis	
(iv)Juice of the Leaves: An Emetic	
(v)Powder Useful in Cough	
(vi)Uses of the Juice and the Decoction	
(vii)Paste of the Leaves	
CHAPTER XX	
62. Indian Parselanen	140
(i)Description	
(ii)Uses of the Juice and the Paste	
63.Indian Pennywort-I	141
(i)A Very Precious Herb	
(ii)Uses of the Powder	
(iii)The Brahmi Drink	
(iv)The Juice and Powder	
(v)Decoction of the Entire Plant	
(vi)The Paste and the Juice	
64.Indian Pennywort-II	143
(i)Pennywort Pills	
(ii)Pennywort Poultice	
(iii)For Diarrhoea of Children	
(iv)Pennywort Co. piils	
(v)Pennywort Decoction	
(vi)Pennywort Leaves Powder	
(vii)For Leprosy	
(viii)Pennywort Co. Decoction	
(ix)Juice and Milk	
(x)Pennywort Ointment	
65. Isafgul	145
(i)The Preparation	
(ii)For Dysentery and Diarrhoea	
(iii)A Special Preparation	
CHAPTER XXI	
66. Jatamanji	146
(i)The Uses	
(ii)The Two Varieties	
(iii)Infusion Jatamanji	
(iv)Epilepsy-Hysteria Mixture	
(v)Jatamanji Co. Powder	

(vi)For Grey Hair		
67. Kala-Dana		148
(i)Description and Uses		
(ii)Purgative Powder		
(iii)Fever Powder		
68. Kamela		149
(i)Uses		
(ii)For Tapeworm, etc.		
(iii)For Ringworm, etc.		
69. Kandang Kathri		150
(i)Uses		
(ii)Juice Boiled with Mustard Oil		
(iii)Juice Boiled with Linseed Oil		
(iv)Juice Boiled with Almond Oil		
(v)Seeds and the Fruit		
	CHAPTER XXII	
70. Kuppameni		151
(i)Description		
(ii)Therapeutic Uses		
71. Kurchi		152
(i)Description		
(ii)Kurchi Infusion		
(iii)Kurchi Powder		
72.Lawsonia Alba		153
(i)The Properties		
(ii)The Uses		
(iii)The Flowers, Leaves and the Bark		
73.Lemon-Grass Oil		154
(i)Description		
(ii)Uses		
(iii)Emulsion		
(iv)A Good Liniment		
	CHAPTER XXIII	
74.Lime Fruit		155
(i)Uses of the Fruit—I		
(ii)Uses of the Juice—I		
(iii)Uses of the Fruit—II		
(iv)Uses of the Juice—II		
(v)Lemonade		
75. Linseed		157
(i)Uses of the Leaf, the Seed and the	Flower	

(ii)Linseed Oil	
(iii)Linseed Tea	
(iv)Linseed Poultice	
(v)Carron Oil	
(vi)Linseed and Sugar	
(vii)Linseed Confection	
(viii)Linseed Lehiam	
76. Liquorice	159
(i)Constituents and Preparations	
(ii)Syrup of Liquorice	
(iii)Liquorice Lozenge	
(iv)Liquorice Pill	
(v)Liquorice Extract	
77. Long Pepper (Pipul)	160
(i)Uses	
(ii)Long Pepper with Myrobalan	
(iii)Cough Powder	
(iv)Pipul Infusion	
(v)A Good Digestive Powder	
(vi)Pipul with Honey	
(vii)Pipul with Milk	
(viii)Pipul Confection	
CHAPTER XXIV	
78. Malabar Night Shade	162
(i)Description	
(ii)Uses	
79.Manathakkali	163
(i)The Uses of the Fruit and Leaf	
(ii)Juice and Decoction of the Leaf	
80. Mint	164
(iii)Varieties of Mint	
(iv)Its Uses	
(v)Pudina Tel and Its Utilities	
81. Moringa	165
(i)The Root, Flower and the Bark	
(ii)Murungai Infusion	
(iii)The Leaves and Their Uses	
(iv)Utility of the Flower, Fruit and the Gum	
CHAPTER XXV	

82.	Mudar
(i)N	ludar Root-Bark

(ii)Mudar Powder		
(iii)Mudar Leaf		
(iv)Mudar Flower		
83. Mustard	:	167
(i)The Uses		
(ii)Its Utilities in Foot-Bath		
(iii)Mustard Plaster		
84. Myrobalan	:	168
(i)Description, Properties and Uses		
(ii)A Safe and Gentle Laxative		
(iii)Triphala, Choorna		
(iv)A Good Laxative		
(v)Myrobalan Decoction		
85. Neem (Margosa)	· · · · · · · · · · · · · · · · · · ·	171
(i)The Properties and the Uses		
(ii)Neem Decoction		
(iii)Neem Powder		
(iv)Neem Poultice		
(v)Neem Leaf		
(vi)Children's Friend		
(vii)Neem Flower Chutney		
(viii)Neem Flower Rasam		
(ix)Neem Bark Decoction		
86. Nutmeg		
(i)The Properties and the Uses		
(ii)Nutmeg Co. Powder		
(iii)Pulvis Nutmeg Compound		
	CHAPTER XXVI	
87. Opium		176
(i)Description		
(ii)Properties and Uses		
(iii)Allopathic Preparations		
(iv)Instructions for Uses		
(v)Compound Opium Powder		
(vi)Gall and Opium Ointment		
(vii)Poppy Heads Fomentation		
88. Papaya-I		178
(i)The Fruit and the Milky Fluid		
(ii)The Digestive Powder		
(iii)The Digestive Drink		
(iv)The Uses of Ripe and Unripe Fruit		
(v)The Utility of the Leaves

	CHAPTER XXVIII	
96. Ponnangkani	-	190
Description		
Preparations and Uses		
97. Ptercarpus Marsupium	<u>'</u>	191
Description		
Uses of the Timber		
Kino from the Bark		
The Leaves Germination and Growth of the Tree		
A Piece of Wood and the Drink		
98. Pulichakkerai		193
Properties and Uses		200
Juice of the Flower		
	CHAPTER XXIX	
99. Rice		194
(i)Varieties of Rice and Properties		
(ii)For External Use		
(iii) Internal Use		
100. Salt	2	197
(i)Salt Oil		
(ii)Salt Gargle		
(iii)Salt as an Emetic		
101.Sandal Wood		197
(i)Uses		
(ii)Sandal Wood Oil 102. Sapota		198
(i)For Blood Enrichment	-	150
103. Senna		198
(i)Description		
(ii)Uses		
(iii)Method of Preparation		
(iv)For Children		
	CHAPTER XXX	
104. Sesamum	2	200
(i)Uses of Leaves		
(ii)Uses of the Seeds		
(iii)Uses of the Oil of Sesamum—I		
(iv)Uses of the Oil of Sesamum—II		
105. Spinach	2	201

(vi)The Uses

(i)Importance of Green Leaves	
(ii)Nutritive and Medicinal Value of Spinach	
(iii)Uses of the Juice	
The Decoction of the Leaves	
106. Sundakai	202
(i)A Digestive Tonic	
(ii)Contains Carbohydrates	
(iii)As a Pickle	
(iv)Uses	
(v)Some Preparations	
(vi)As Snuff	
107. Sweet Flag	203
(i)Description and Uses	
(ii)Infusion Acorus	
(iii)Infusion Acorus and Chiretta	
(iv)Decoction of Acorus	
(v)Acorus Paste	
(vi)Acorus Co., Decoction	
(vi)Acorus Co., Digestive Powder	
CHAPTER XXXI	
108. Tamarind	206
(i)Description and Uses	200
(ii)Tamarind Drink—I	
(iii)Tamarind Drink—II	
(iv)A Good Laxative	
(v)Panakam	
109. Thumbai	207
(i)Properties and Uses

CHAPTER I

ABRUS, ACACIA ARABICA, AGATI GRANDIFLORA

1.ABRUS

(COUNTRY LIQUORICE ROOT)

English	:Jequirity
Hindi	:Rati
Kanarese	:Gul-ganji
Tamil	:Kundumaniver
Telugu	:Guru-venda,Guru-ginja
Malayalam	:Kunni-Kuru
Gujarati	:Gumchi
Bengali	:Kunch-ka-jar,Jaishtomodhu,Bengala
Sanskrit	:Gunja
	(i)Description

The root of Abrus Precatorius. The taste of the root is gen-erally not distinctly sweet. It yields an extract which is nearly similar in medicinal properties to the extract of glycerrhiza (Atimathuram in Tamil. Liquorice), though somewhat bitter in taste. The leaves are distinctly sweet. The extract from the dried leaves is much superior both in taste and as a medicine.

The root is obtained from a twining shrub. This shrub is common throughout India. It has brightred seeds which have a black spot at one end. The seeds are used for weighing by goldsmiths. The root possesses many of the medical proper-ties of the true liquorice root. Therefore it is known by the name Country Liquorice.

There are white, black, red, yellow and blue varieties. The chief ones are the white, black and red. The leaves of Abrus are laxative, antiphilegistic, aphrodisiac, expectorant. The seed has purgative properties. It is a tonic as well. The root has emetic and expectorant qualities.

(ii) Syrup Abrus.Co

Re: Fresh Abrus root bruised oz. 2

Lady's finger (vegetable) sliced oz. 1

Water oz. 20

Boil for 30 minutes and strain. Add to the decoction 10 ounces of sugar-candy or honey. Boil down to the consistence of syrup. Dose: One tea to a tablespoonful, several times a day when the cough is troublesome in children whether fever is present or not. This can be administered very freely. This is a good addition or auxiliary to other cough mixtures. You can pre-pare the Syrup without lady's finger also.

Prepare only a small quantity at a time as it undergoes fer-mentation. If you add 10 or 20 grains of acid Salicylic to the Syrup when it is under preparation, it will keep good and sweet for a long time. Acid Salicylic arrests fermentation as it is an an-tiseptic.

(iii) Uses of Leaves

Put a few leaves in the mouth, chew and swallow the juice. Hoarseness of voice will disappear.

(a) Abrus Leaves' Extract

Pour boiling water on the dried leaves till they are cov-ered, Keep the vessel on a slow fire for 6 hours. Then strain the decoction when it is hot and evaporate on a water bath to a proper consistency. It is very sweet. An extract can be prepared from the juice of the fresh leaves also.

If there is pain in the chest or any part of the body apply castor oil to the part and over this fix the leaves The pain will vanish and the fluid inside will also disappear.

Mix the juice of the leaves with mustard or sesamum oil and rub the mixture over the painful swelling, The swelling and the pain will disappear.

(b)Cooling Bathing Oil

Re: Juice of the leaves Juice of Bhringraj	oz. 10
(Karisalamganni)	oz. 10
Gingily oil	oz. 10
Mix and boil. Take oil bath wi	h this oil. It will cool the body, head and brain.

(iv) Uses of Seed

The seed acts as a purgative. The outer covering of the seed has this effect. The seed can be boiled and eaten. It acts as an aphrodisiac (dhatupushti) and is useful in debility or im-potence. It increases the semen.

Powder the seeds and use the powder as a snuff. This will relieve headache due to cold in the head.

Put the powder of one seed in milk, boil it and drink. It will build the body and give strength.

The powder of the seed is useful in diseases of the eye, jaundice, biliousness, fevers which produce unconsciousness, and which are associated with perspiration, bronchitis.

Make a paste of the seed with water and apply it in contu-sion, rheumatic swelling of joints. They will be cured.

2. ACACIA ARABICA

(INDIAN GUM ARABIC TREE)

English	:Babul tree :
Hindi	Kala-babul, Kikar :
Kanarese	Karijali :
Tamil	Karuvel :

Telugu	Nalla-tumma :
Malayalam	Karuvelum :
Marathi	Babul :
Gujarati	Kaloabaval :
Sanskrit	Kala barbura
	(i) Description

A dried gummy exudation from the stem and branches of Acacia Arabica, Acacia Senegal or other varities of Acacia in round or avoid tears or masses. It is odourless and of bland mucilaginous taste. It is straw coloured or yellowish. Its chief con-stituent is Arabic acid combined with Calcium, Potassium and Magnesium. It contains Tannin.

Musilage of Acacia is used for making castor oil emulsion and Bismuth mixture. It is used to suspend oils, resins and in-soluble powders, in water to make pills and lozenges on ac-count of its cohesive property. It acts as a demulcent to soothe the mucous membrane of the throat when it is used in the prep-aration of lozenges.

The leaf, bark, root and seed possess astringent proper-ties.

(ii) The Gum and the Twig

The gum is a demulcent, emollient, nutrisnt, pectoral and aphrodiasiac. The gum thickens the semen, stops the dis-charge in gonorrhoea and gives beauty and strength. It is an auxiliary to medicines which are given in diabetes millitus and insipidus.

Keep a small piece in the mouth and slowly swallow the juice. Dry cough, pain in the throat, burning in the chest will be cured.

The twig of the tree is an excellent tooth-brush. It strength-ens and hardens the teeth.

(iii) Babul bark decoction

Re: Babul bark	2 ounces
Water	20 ounces

Boil for 15 minutes and strain.

This is a useful gargle for spongy gums, ulceration of gums, loose teeth, sores in the mouth, mercurial ulceration in the mouth and sore throat. This is also a very good application (enema) for prolapse or descent of rectum and anus and piles. This is a good lotion (for injection) in leucorrhoea and gonor-rhoea. You can add a teaspoonful of alum to the decoction. Plain Babul bark decoction is useful in chronic diarrhoea. Dose: One or two ounces twice daily.

3. AGATI GRANDIFLORA

English	:Agati Grandiflora
Hindi	:Hadaga
Kanarese	:Agashi
Tamil	:Agatthi
Telugu	:Avise
Malayalam	:Agatti
Marathi	:Agasta
Gujarati	:Agathiyo
Bengali	:Buko
Sanskrit	:Agastya

This is found in abundance in India. It is a tree which grows to the height of 20 or 30 feet. It is cultivated also.

(i) The Uses of Leaves

The leaves, flowers, bark are useful. The leaf is an anti-dote, refrigerant, febrifuge, laxative and digestive. It removes biliousness and digests the food. The leaves are prepared in South India as a vegetable and taken on the day following Ekadasi, i.e., Dvadasi days (12th day of the fortnight).

(ii) The Uses of Juice

Instill 2 or 3 drops of the juice of the leaf into the nose. Quotidian type of fever will be cured. Quotidian fever comes on the fourth day. Headache and nasal catarrh also will be re-lieved.

CHAPTER II

AJOWAN, ALOES, ALUM, AMLA, ANISE, ARAI KEERAI

4.AJOWAN

Hindi	:Ajowan
Tamil	:Omum
Telugu	:Omamu, Vaamu (i) Ajowan Its Usefulness

This is a very good digestive. It has a good aroma. It has carminative properties, i.e., it expels wind from the bowels. It relieves intestinal colic. It has antispasmodic properties, i.e., it relieves spasms or contraction of the muscles of the bowels. It is pungent and stimulating. It is useful in dyspepsia, diarrhoea, flatulence, vomiting of cholera.

(ii) Its Properties and preparations

It is mixed with rock-salt, asafoetida, ginger, black pepper, cardamum, Chhoti Har or myrobalans chubelic to form a diges-tive powder. The two chief preparations of Ajowan are: arrack or omum water (Aqua Ptychotis) and oil of Ajowan. Ajowan has all the properties of thymol. It kills intestinal parasites. The seed contains an oil which has 50% thymol in it.

Omum water (Aqua Ptychotis) is useful in diarrhoea, wind in the bowels, indigestion. Two tablespoonfuls of omum water can be taken. One ounce of omum laudanum water can be mixed with one ounce of lime water and 5 drops of laudanum or Tr. Opii.

5. ALOES

English	: Indian Aloes
Hindi Kanarese	: Kumari, Ghikanvar
Tamil	: Kathalai Gida, Lolisara
Telugu	: Kartazhai : Kalabanda
Malayalam	: Kattuvazha, Katar Vazha
Marathi	: Korakanda
Gujarati	: Kumara
Bengali	: Musabhar, Ghrita Kumari
Sanskrit	: Kumari (i) Its Varieties

Small aloe, big aloe, red aloe. It is difficult to get the red variety. The properties of all the varieties are the same. It tastes sweet. Ghrita Kumari as a fresh juice is much used in Ayurvedic medicine. The inspissated juice is popularly called Musabhar.

It is the solid extract from exudation. It is the juice obtained from the transversed cut leaves of various species of aloe. It occurs in hard masses, yellowish or black-brown in colour with a characteristic smell. It is fairly soluble in alcohol and also in water.

Bazaar aloes must be purified by boiling in water, allowing to stand for ten hours, then straining and setting aside in an open vessel till it evaporate to dryness.

This is a good purgative but is not suitable for pregnant women, children and those who have piles, and in inflamma-tory condition of the pelvic organs.

(ii) Its Properties & Uses

Aloe has tonic, alterative, purgative and emmanagogue properties. It acts chiefly on the large intestine. It is a bitter tonic. It is the slowest of all purgatives. It takes fifteen hours to act. It relieves habitual constipation.

In small doses it is a stomachic bitter. It invigorates the stomach. In absence of menstruation and anaemia (poverty of blood) it is combined with iron. It is a tonic cathartic in habitual constipation associated with ammenorrhoea and anaemia.

It comes mainly from West India Islands. Its active prin-ples are (1) Aloin and (2) Emodin. It also contains a little resin, a trace of gallic acid and a volatile oil. Dose: 2 to 5 grains.

Aloes pill. Dose: 4 to 8 grains. Aloes and iron pill. dose: 4 to 8 grains. Aloes and asafoetida pill. (useful in hysteria and flatulence). Dose: 4 to 8 grains. These are all preparations of aloes.

Aloin is a pale yellow powder with a bitter taste. Dose: y4 to 1 grain.

Mix the fresh inner pulp of aloes with sesamum oil. Boil. This helps the growth of hair. This medicated oil bath brings good sleep.

If you clean the fresh inner pulp of aloes with water several times, it is purified. Put this in a clean cloth, fold the cloth and foment the eyes. This is useful in conjunctivitis, swelling of the eye lids.

6. ALUM

English	: Alum
Hindi	: Phitkari
Kanarese	: Phatikara
Tamil	: Patikaram
Telugu	: Pathikaramu
Marathi	: Phatiki
Bengali	: Phatkiri
Sanskrit	: Sphatikari (i) Description

Alum has an acid, sweetish, astringent taste. It is a crystal-line, semi-transparent mass. It looks like sugar candy crystal. Some take it with great avidity and cupidity, taking it for sugar candy and throw it off with a peculiar castor-oil face.

If the bazzar alum is not pure, you can render it pure by dissolving it in pure water, straining and evaporating the solu-tion. You will get pure crystals of alum.

(ii) Uses of Alum

Alum is a powerful astringent. It stops bleeding from wounds, from the nose. Plug the nostril with a small piece of clean cloth or cotton wool dipped in a solution of alum. It will stop the bleeding at once. It stops bleeding from the gums. It is an ingredient in tooth powder. Alum can be purified and dehy-drated by putting it in the fire or by putting it in the frying pan and then putting the frying pan over the fire. Then you can pow-der it nicely and easily.

It is used as a gargle for sore throat, as an application to the eyes in conjuntivitis or sore eyes. It is used as a wash for sore nipples. It is used for douching the vagina in leucorrhoea. It is seldom used internally but it is useful in diarrhoea and other chronic discharges.

During rainy season when the water is dirty and full of sed-iments, take a big piece of alum and stir the water 5 to 6 times with this piece. Within ten or fifteen minutes the water will be-come

clear. Do not put the alum piece in the water. Mere stirring the water with the piece will serve your purpose.

Alum tablet is applied to the face after shaving. It removes pimples and freckles on the face and renders the skin smooth and glossy.

7. AMLA

English	: Indian Gooseberry
Hindi	: Amlaka, Amla
Tamil	: Nellikai
Telugu	: Usirikaya
Malayalam	: Nellikkai
Sanskrit	: Amalaki (i) Description

Taste: Sour, astringent and sweet. This Amla or Nellikkai (Phyllanthus Emblica), which is very rich in Vitamin C, is a very cheap and common fruit. This, indeed, is one of the richest nat-ural sources of Vitamin C. Amla grows abundantly in all Indian forests. It is obtainable in unlimited quantities from January to April. Its fresh juice contains nearly twenty times as much Vita-min C as orange juice. A single fruit is equivalent in Vitamin C to one or two oranges.

Amla has been held in high esteem in India since time im-memorial and is included as an ingredient in many Ayurvedic medicines and tonics. Tablets made from Amla are now being used to supply Vitamin C to soldiers. The use of Amla tablets will help to prevent the occurrence of scurvy and safeguard health and physical efficiency when there is a shortage of fruits and vegetables. Fresh Amla is the most effective cure for scurvy.

The fresh fruit is diuretic and laxative. A good cooling bev-erage can be made from the fresh fruits. The dried fruit is astrin-gent and is useful in diarrhoea and dysentery.

Amla is a very important ingredient in the most famous confection, Chyavanaprash. It is one of the constituents of Triphala powder.

(ii) Amla Sherbet

Re: Juice of fresh Amla	4 teaspoonfuls
Sugar	3 tablespoonfuls
Water	16 ounces
This is a good sherbet or beverage.	It is diuretic and laxa-tive too.

(iii)A Laxative

Re: Amla Powder	4 teaspoonfuls
Myrobalans	4 teaspoonfuls
Bahera	4 teaspoonfuls

Water

20 ounces

Boil for twenty minutes and strain. Dose: Two ounces in the early morning. This is a good laxative. It corrects digestion.

Amla removes excessive salivation, biliousness, vomit-ing, constipation, giddiness, spermatorrhoea, internal heat of the body, seminal weakness, menstrual disorders in women, and bestows beauty.

Make a paste of Amla, apply it to the head and take bath. Burning in the eyes will be cured. The brain and head will be cooled.

Amlakalpa, Amla Oil, Amla Drink and Amla Confection are preparations of Amla. Amla Oil is excellent for the head. Apply a small quantity to the head before bath. It will cool the head and the brain and remove ninety-six diseases of the eye, night-blindness and bilious giddiness.

Amla confection is useful in syphilis, flatulence, bronchitis, asthma and consumption.

8. ANISE

(SOMB, PERUM JEERAKAM)

Tamil : Teluqu :Sombu :Somp

It is the dried fruit of Pimpinella Anisum, obtained from many parts of India and also from middle and south Europe. It is a carminative, stomachic and an atomatic stimulant. It has an agreeable, aromatic odour.

Oil of anise (oleum anise) is a volatile oil, distilled from the anise fruit. Dose: 1 to 3 minims. It is usually used for flatulence in children. In allopathic system there is Spirit of Anise. Dose: 6 to 20 minims.

Re: Anise 4 drachms

Sugar 4 drachms

Mix. Dose: 1 teaspoonful twice daily

(i) Digestive Powder

The anise must be gently fried and powdered. Useful in cough, indigestion, flatulence, colic, etc.

(ii) Aqua Anise

Re: Anise seed1 ounceWater (Distilled)40 ounceDistill to 20 ounces or boil till it is reduced to 20 ounces and strain. Dose: 1 ounce. This is a
basis for all cough mix-tures. It is an, expectorant and anti-spasmodic in bronchitis or cough.

(iii) For Cough

Re: Honey2 teaspoonfulsAnise water1 ounceMix well. Useful in bronchitis or cough. You can add 2 tea-spoonfuls Syrup Vasaka.

(iv) A Digestive Powder

Re: Anise1 ounceCuminseed1 ounceGently fry. Dose: 1 teaspoonful after food; twice daily.

(v) A Gentle Laxative

Anise seed	1 drachm
Myrobalans	1 drachm
Sugar	1 drachm
Take this in the early morning	or at bed time.

9. ARAI KEERAI

(AMARANTUS TRISTIS)

Kanarese	: Harive Soppu
Tamil	: Araikeerai
Telugu	: Koiya-Kura
Malayalam	: Arakirai
	(i) Introductory

This is a small herb that is cultivated in South India. The leaves and seeds are used. This is a stimulant and aphrodi-siac.

(ii) Uses of Arai Keerai

This is eaten as a vegetable. This is useful in fevers, cough, tremor, collapse, rheumatism and paralysis. It will in-crease the semen and sexual vigour.

Put the seeds into a fresh coconut from which the water is taken out and bury it underneath the earth for 40 days. Then take it out. Remove the shell. Mix the powder of kernel with sesamum oil and boil. Cool it and strain. Apply this oil to the head. Diseases of the head will be cured. The hair will become black and grow nicely.

CHAPTER III

ASAFOETIDA, ASOKA, ASTERCANTHA LONGIFOLIA

10. ASAFOETIDA

English	: Asafoetida
Hindi	: Hing
Kanarese	: Ingu
Tamil	: Kayam, Perungayam
Telugu	: Inguva
Sanskrit	: Hingu (i) Some Particulars

Dose: 5 to 15 grains. Taste: Bitter. Asafoetida is the gum resin of a plant growing in Persia and Northern India. It grows in Kashmir, Afghanistan and Turkistan. It is used as a spice in preparing vegetables, soups, etc. Pilula Aloeset Asafoetida and Tr. Asafoetida are official preparations of Asafoetida. There is also a white variety. It is called 'Soma Kayam' or 'Pal Kayam'. It is more vigorous.

It occurs in the form of irregular masses of dull yellow col-our, becoming darker on keeping. It is obtained by incising the root of Ferula Fetida and other similar species. It contains a vol-atile oil with its characteristic unpleasant smell and also resin and gum. It is a stimulant, expectorant, antispasmodic and car-minative. It brings out sputum easily and expels wind from the bowels. It is beneficial in flatulence and the early stages of diar-rhoea or cholera. It is useful in hysterical fits and nervous affec-tions in women.

It is a laxative (Laghu Vitechani), anthelmintic (Kriminasini or destroyer of worms), diuretic (Mootravardhini), and ammenagogue (Rituvardhini). It is generally given in combina-tion with other remedies.

(ii) For Wind and Colic Bowels

Re: Asafoetida			1 teaspoonful
Rock Salt			1 teaspoonful
Ajowan			1 teaspoonful
Myrobalan Her			1 teaspoonful
Dried Ginger			1 teaspoonful
Cardamom			1 teaspoonful
Powder and mix	Dosa: 1	0 araine	Lleoful in flatul

Powder and mix. Dose: 10 grains. Useful in flatulence and intestine colic. It will energise digestion and increase appetite.

(iii)Asafoetida Enema

Re: Asafoetida	30.grains
Water	8 oz.
	(iv) For Hysteria

Re: Asafoetida2 drachmsBoiling water10 ouncesStrain and cool. Add musk 30 grains. Dose: 1 teaspoonful, thrice daily. This can be takenwithout musk also.

(v) A Good Digestive Powder

(PACHAKA CHOORAN)

Re: Asafoetida	1 teaspoonful
Dried Ginger	1 teaspoonful
Long Pepper	1 teaspoonful
Ajowan Seeds	1 teaspoonful
Cumin Seeds	1 teaspoonful
Black Pepper	1 teaspoonful
Rock Salt	1 teaspoonful
Dowdor and mix wall	Doco: 10 to 20 grains Th

Powder and mix well. Dose: 10 to 20 grains. This is Kshudha Vardhak Choorna also. It increases the appetite and invigorates the Jataragni or digestive fire.

(vi) Asafoetida Ear Drops

Re: Asafoetida60 grainsSesamum oil2 ouncesPut the asafoetida in the oil, boil and strain. Instil a few drops into the ear and plug it with cotton
wool.

(vii) For Scorpion Sting

Make a paste of asafoetida with a little water and apply it over the part stung by scorpion. The pain will vanish.

11. ASOKA

English	: Asoka-tree
Hindi	: Asok, Anganapriya
Kanarese	: Kenkalimara, Asoka
Tamil	: Asogu
Telugu	:Asokamu
Malayalam	: Asogam
Marathi	:Ashoka
Gujarati	:Asupala
Bengali	:Anganapriya
Sanskrit	:Asoka, Gandhapushpa (i) Description

Asoka removes the grief of women; hence the name. The bark of Asoka is used in Ayurveda. It has considerable reputa-tion in uterine diseases. It is a strong astringent. It is used in checking

uterine haemorrhage or bleeding from the womb, menorrhagia or excessive menstruation, and bleeding of piles. The Asoka tree is cultivated in the Western Ghats, Ganjam and Visakapatnam. The flower is red. It is in the form of a bunch. It flowers in February and March. Asoka is an astringent, uterine sedative and uterine tonic.

(ii) For Dysentery

Re: Asoka Flower (powder)30 grainsWater2 ouncesMix: one dose. To be taken twice daily. Useful in dysentery with discharge of blood and mucus.

(iii) Asoka Decoction

Re: Asoka Bark	6 ounces
Milk	6 ounces
Water	20 ounces

Boil to a quarter and strain. Dose: 1 ounce thrice daily. Useful in menorrhagia or excessive discharge of menses bleeding from the womb. The womb will be strengthened. All diseases of the womb will be cured.

The decoction must be freshly prepared daily. Take the fresh juice from the bark and give a tablespoonful twice daily.

Useful in menorrhagia and all diseases of the womb. Tincture of Asoka is also available.

In Ayurveda there are two preparations, viz., Asokarishta (decoction) and Asoka Ghrita (ghee).

(iv) Asokarishta (Asokamritam)

Dose: to 2 tolas twice daily after meals. Specially useful in leucorrhoea, menorrhagia, pain in the womb, irregular monthly periods, scanty menstrual discharge, amenorrhoea or absence of menstruation, painful menstruation, displaced uterus, congested uterus, sterility and other complaints. This is an alterative and stimulant. This prevents miscarriage and re-stores normal action to the uterus. It restores tone to the uterine system and removes all abnormal conditions. It also eradicates general debility, distaste for food, anaemia and weakness after confinement. It improves the conceptive capacity and in-creases general strength.

(v) Asoka Ghrita

Dose: yzi to 1 tola to be taken twice daily. Useful in leucorrhoea, menorrhagia, chlorosis, dark discharges, pain in the waist, back or womb and other female complaints.

Asoka is a real friend of the fair sex. It gives longevity, strength, nutrition and improves the complexion and beauty. What Sterri's Vibutero or Aletris Cordial is to Allopathic doctors, Asokarishta or Asoka Ghrita is to Ayurvedic Kavirajs or Vaids. What Hydrastis or Viburnum or Ergot is to Allopaths, Asoka is to Ayurvedic doctors.

12. ASTERCANTHA LONGIFOLIA

English	: Hygrophila Spinosa
Hindi	: Talmalkhana, Goksura
Kanarese	: Kollavalike
Tamil	: Nirmulli
Telugu	: Nirugobbi
Malayalam	: Vayalchulli
Marathi	: Kolsundara
Gujarati	: Ekharo
Bengali	: Kanta-kalika
Sanskrit	: Kokilaksha (i) Description

It grows spontaneously in wet places throughout India. It is a kind of thorn. The seed and root are obtainable in bazaars. It is sweet and slightly bitter.

The leaf is demulcent and diuretic. The root is refrigerant, diuretic and demulcent. The seed is diuretic and aphrodisiac.

(ii) Kokilaksha Decoction

Re: Root of Kokilaksha

Water

1 ounces 20 ounces

Boil for 15 minutes and then strain. Dose: 1 oz. thrice daily. Useful in ascites or dropsy or swelling of belly on account of water and swelling of body and difficulty in passing urine. This acts as a diuretic and helps the free flow of urine in large quantities. Thus the swelling is reduced.

(iii) Kokilaksha Infusion

Re: Astercantha leaves freshly	
dried	2 ounces
Distilled vinegar	16 ounces

Macerate for 3 days. Press and strain. Dose: 2 table-spoonfuls in 2 ounces of water three times a day. Useful in dropsy, ascites, difficulty in passing urine, etc.

(iv) Aphrodisiac Tonic

Re: Kokilaksha seeds	1 tablespoonful
Milk	1/2 seer

Soak the seeds in the milk and the sugar and drink in the morning and at night. Useful in impotency or sexual debility.

CHAPTER IV

ASWAGANDHA ATIS OR ATEES

13.ASWAGANDHA

(WINTER CHERRY, WITHANIA SEMNIFERA, DUNAL)

English	Winter Cherry
Hindi	Aswagandh
Kanarese	Sogade-beru
Tamil	Amukkurak kizhangu, Achuvagandi
Telugu	Penneru-gadda
Malayalam	Amukkuram
Marathi	Asagandha
Gujarati	Asundha
Bengali	Aswagandha
Sanskrit	Ashvagandha (i) Description
	(., = = = = = = = = = = = = = = = = = = =

This is a small plant cultivated in India and Baluchistan. It is an erect shrubby plant. The leaves, seeds and the root are used. The leaf is a febrifuge. The seed is a diuretic. The root is an alterative, aphrodisiac, deobstruent, diuretic, tonic, nutritive, hypnotic and sedative. Aswagandha increases the Jatharagni or gastric fire and so it is an appetizer. It is useful in Rheuma-tism, eczema, anaemia, dropsy, fever, swelling, debility, etc. Aswagandha Choorna (powder), Aswagandha Rasayana (Confection), Aswagandha Tel (oil) are made out of Aswagandha.

(ii) Aswagandha Choorna (Powder)—I

(Re: Aswagandha root powder 1 part

Sugar candy

```
4 parts
```

Mix well. Dose: One teaspoonful twice daily. The dose of the plain powder is 20 to 40 grains. Drink half a seer of cow's milk after taking the powder. Tonic and alterative. Useful in spermatorrhoea, sexual and nervous debility, rheumatism, old age, consumption, emaciation of children, nervous diseases and leucorrhoea. It gives strength, vigour and vitality. It in-creases the semen. Boil the root in cow's milk, wash it and dry it. Then make a powder.

(iii) Aswagandha Choorna (Powder)—II

Re: Aswagandha Powder	30 grains
Honey	1 teaspoonful

Mix: One dose. To be taken twice daily. Useful in cough, rheumatism, dyspepsia, corpulence or obesity, swelling of body, debility, etc. It gives strength and vigour and increases semen. The powder can be taken along with ghee.

(iv) Aswagandha Choorna (Powder)-111

Dose: 20 to 80 grains. To be taken morning and evening with milk. The only two ingredients are Aswagandha and Vriddha-darak. Alterative and tonic. Removes sexual debility, spermatorrhoea, debility from old age, leucorrhoea, etc. A paste of the root is a valuable nutriment for children and adults. It is taken with milk and ghee.

Aswagandha confection (Rasayana) is beneficial in pul-monary Tuberculosis, debility from senility or old age and rheu-matism, emaciation of children, leprosy, nervous diseases, nervous debility, leucorrhoea. It acts as an alterative tonic and nutriment.

Narayana Tel contains Aswagandha. It is dropped into the nose in deafness. It is rubbed over the body in paralysis, hemiplagia, rheumatism, tetanus and lumbago.

The leaves act as a sedative and hypnotic and relieve pain. The leaves are smeared with castor oil and applied to car-buncles.

(v) Aswagandha Decoction

Re: Aswagandha leaves1 teaspoonfulWater4 ouncesBoil and strain: One dose.Useful in fever.

(vi) Aswagandha Paste

Take the fresh root. Make a paste with cow's urine. Then heat the paste. This is a useful application in lumbago, scrof-ula, rheumatic swellings. Make a paste of the root with equal part of dried ginger. Use hot water for making the paste. Apply the paste to swell-ings. The swellings will subside. This will serve the purpose of Antiphilogistine or Thermofuge.

The leaves also can be made into a paste and applied to painful swellings.

(vii) Aswagandhadi Pills 5-Grains

Dose: 1 to 4 pills to be taken twice daily followed by milk. Efficacious in sexual debility. Removes general debility and tones the nerves

(viii) Aswagandha Arishta—I

It is a sovereign remedy for all cases of debility arising from sexual and bodily exhaustion due to overwork, etc. It is an invigorating tonic for brain and nerves. It increases memory, gives sound sleep and removes loss of appetite. Dose: 1X to 2 tolas to be taken twice a day. The chief ingredients are Aswagandha, sugar, Musali, Manjistha, Haritaki, Rasna, etc.

(ix) Aswagandha Arishta II

Tonic and alterative. Useful in epilepsy, impotency, hyste-ria, general and nervous debility. It increases brain power. It is a brain tonic. It promotes digestion, enriches blood. It has a tonic action on the nerve centres. It recuperates lost vigour, builds up the wasted frames, restores health, strength and brings back to the hopeless the joys of life. This has the power of quickly im-proving the brain matter that has been affected by the use of in-toxicants and smoking. It improves the general health. This will also cure piles and nourish the vital fluids of the system. Mental capacities are stimulated and vitalised. Dose: y2 to 1 oz. after food.

(x) Aswagandhi Ghritam

Ghritam means ghee. This is a marvellous preparation for restoring strength to the system. Those who, by over exertion and by excessive sexual intercourse have become very weak, consumptives, and those who have become weak owing to longstanding wasting diseases will be relieved of all troubles and will recoup their original health and vitality. Even the old will be rejuvenated. Women will develop their conceptive capacity by constant use of this medicine. The resultant pregnancy will bear a fully developed child or foetus.

Rheumatism, paralysis agitar (Vatha Soola), urasthambam, jaundice, fevers and premature grey hair will also be cured. Dose: X to 2 ozs.

(xi) Aswagandha Lehyam

Lehyam means confection. This gives good development to the whole body. It strengthens the vital forces. This is highly beneficial for those who have become emaciated by sexual ex-cesses and other causes. It is a brain tonic. It is antisyphilitic and blood purifier. Useful in debility caused by venereal dis-eases, specially syphilis. Dose: 1 to 2 tolas morning before food and evening after food. Take a cup or half a seer of milk af-ter taking the medicine.

14. ATIS OR ATEES

(ACONITUM HETEROPHYLLUM)

English	Indian atees:
Hindi	: Atis
Kanarese	: Athivisha
Tamil	: Atividayam
Telugu	: Ativasa
Marathi	: Ativisha
Gujarati	: Atavasa
Bengali	:Ataicha
Sanskrit	:Ativisha (i)Description

This is the root of Acontitum Heterphyllum. It is shotmachic, astringent, febrifuge, aphrodisiac, tonic and anti periodic. It has a pure bitter taste. It has no acidity. Atisine is the alkaloid found in Atis.

It is one inch long, wrinkled and grey in colour. It should be white on breaking across. It is a valuable tonic after malarial fe-ver and a good bitter tonic. Atis is chiefly useful in intermittent fever and other periodical fevers.

(ii) Atis Powder

Re: Atis Powder 30 grains

Mix with a little water. One Powder, 3 times a day during fever. It can be given every 4 hours during the intermissions. Start its use during or towards termination of the sweating stage. For children reduce the dose to one-half or three-fourths according to age.

(iii) Atis with Sugar

Re: Atis powder 10 grains

Sugar 2 teaspoonfuls

Dose: 1 powder, thrice daily. This is an excellent tonic for debility after fevers and other diseases.

(iv)Atis with Honey

Re:Atis powder 10 grains

Honey 2 teaspoonfuls

Mix well. Dose: Three times daily. For intermitlent fevers. Debility afler fevers, diarrhoea due to indigestion, dysentery, piles.

(v) Atis Co. Decoction

Re: Atis	4 drachms	
Dried ginger	4 drachms	
Amrita valli Seendil	4 drachms	
Kurchi Kudasappalai bark	4 drachms	
Korai or nut grass	4 drachms	
Water	20 ounces	
Boil down to a quarter. Dose: 1 or 2 ounces thrice daily. For fevers associated with diarrhoea.		

(vi) Compound Atis Powder

Re: Atis powder	2 drachms
Korai or nut grass	2 drachms
Pala (Chitramutti)	2 drachms
Galls (Karkadaga Shringi) powder	
For fevers associated with diarrhoea.	If there is cough with sputum, add long pepper.

Re: Atis powder 20 grains

Dried ginger	20 grains
Kaladana	20 grains
Black pepper	20 grains
Does: 10 grains twice daily. A tonic and a laxative.	

CHAPTER V

BABCHI SEEDS, BARLEY, BEL FRUIT

15. BABCHI SEEDS

English	:Babchi Seeds
Hindi	:Bavanchiyani, Baschi
Kanarese	:Vakuchu
Tamil	:Karpokarishi
Telugu	:Bhavanchi-Vittulu
Malayalam	:Karboga-ari
Marathi	:Bavanchi
Bengali	:Bawachi
Sanskrit	:Vakuchi
	(i) A Reputed Ayurvedic Medicine for Leucoderma

This is a reputed medicine of Ayurveda for leucoderma or white-skin. The active principles are an essential oil and a resin. When the oil is locally applied, it dilates the subcalliarly blood vessels. The skin becomes red and is stimulated. There-fore, its nutrition is improved; melanoblasts are stimulated to form pigment which diffuses into the decolorised area. The oil has potent action against skin streptococci.

Babchi is a brownish-black seed. It grows throughout In-dia. The seed is used for leprosy internally and as an ointment externally. It is named as Kushtha Nasini because it destroys leprosy.

The seed has alterative', laxative digestive, stimulant, aphrodisiac, anthelmentic, diuretic and diaphoretic properties.

(ii) The Seeds, The Oil, The Tablet

Babchi seeds and Harital red (arsenic sulphide) in equal parts are made into fine powder and then rubbed into a paste with cow's urine. The paste is applied on the patch. In a few days, colour begins to change. Spots with normal colour begin to appear. The entire patch is healed in a short time.

Babchi oil is now available. It may be used instead of seeds for making the pigment for leucoderma.

Tablet Babchi/Harital is available. This may be made into paste with cow's urine or water for application on patches of leucoderma.

1 An alterative is a drug that alters the morbid functioning and brings about health functioning of the organ and blood stream. A laxative is a drug that moves the bowels gently. A digestive invigorates digestion. A stimulant stimulates the bowels. An aphrodisiac stimulates and tones the sexual organs. An anthelmentic destroys or expels worms from the bowels. A diuretic helps the free flow of urine. A diaphoretic increases the free flow of perspiration and reduces temperature.

16.BARLEY

English	:Barley
Hindi	:Jau
Kanarese	:Jave-godi
Tamil	:Valkothumai, Barlhiarisi
Telugu	:Pachcha-yavalu
Marathi	:Sattu
Gujarati	:Cheno
Bengali	:Jab
Sanskrit	:Yava
	(i) A Nutritive Food for the Anaemic

Barley is particularly rich in mineral matters. In this respect it is richer than wheat but its protein content is lower than that of wheat. It is a nutritive food. It is highly beneficial for the anae-mic and the nervous on account of its richness in iron and phos-phorus. It is a Sattvic food. Spiritual aspirants take bread made out of barley. Barley has about the same nutritive value as whole wheat but it contains less gluten and so it is not so easily made into bread.

(ii) Manifold Utility of Barley Water

Barley water is useful in dysentery, typhoid, fevers, diar-rhoea, urinary diseases and diseases of kidneys. It has very lit-tle nutritive value. It is soothing and cooling. The value of barley water lies in its demulcent properties. It removes burning sen-sation in the urine and helps the free flow of urine.

(iii) Pearl Barley and the Powder

Pearl barley is the whole barley. One tola of Barley boiled in sixteen ounces of water makes a palatable and soothing drink. It can be mixed with lemon juice, and sugar or salt to taste You can add milk also. Boil for 10 or 15 minutes only. A ta-blespoonful of the powder (Robinson's Barley) also can be used for preparing barley water.

	17.Bel Fruit
English	:Bael Fruit
Hindi	Bel, Bael Sripal
Kanarese	:Bilvapatri-Hannu,Bela

Tamil	:Vilva or Bilva pazham
Telugu	:Bilva pandu, Maredu pandu
Malayalam	:Kuvalappazham, Kuvalam
Marathi	:Belachaphala,Bela
Gujarati	:Belaphal, Bilmiphal
Bengali	:Bel, Siphal
Sanskrit	:Sriphal,Bilva
This is the fruit of Aegle Marmelos. I	t is also called stone-apple. Dose: Half a fruit. Taste: Sweet
and astringent.	

(i) Uses of the Half-Ripe Fruit

The half-ripe fruit is the best. The unripe or half-ripe fruit is astringent, digestive and stomachic. It binds the bowels. The ripe-fruit is laxative, aromatic and cooling. The fruit is about the size of an orange, with a hard wooden rind. It contains seeds and tenacious transparent pulp. It has a mild turpentine-like smell and taste. It contains tannin (tannic acid) and therefore acts as an astringent to the bowels. It contains also gums, a vegetable acid and a very small quantity of sugar.

(ii) Uses of the Unripe Fruit

The unripe fruit is roasted with a covering of mud and the softened pulp is mixed up with water and sugar or butter milk. This is highly beneficial in sub-acute and chronic dysentery of diarrhoea. It is particularly useful in the irregularity of the bow-els in children, characterised by alternate diarrhoea and consti-pation, because it acts like a mild stimulant to the intestinal mucus membrane and thereby checks diarrhoea and acts as a laxative when there is constipation.

Bel is highly beneficial in cases of obstinate diarrhoea and dysentery when unattended by fever and the patient is weak and dyspeptic. It is a good adjunct or auxiliary to specifics in all stages of diarrhoea or dysentery.

The half-ripe fruit can be sliced, dried, powdered and taken with water or butter-milk. It is particularly useful when there are signs of scurvy. Fluid extract of dried Bel is very ser-viceable. Dose: Half to one drachm or one teaspoonful.

(iii) The Pulp, The Leaf & The Root

The pulp of the dried Bel fruit powdered and mixed with a certain proportion of arrowroot is called "Dietetic Bel". It is a good substitute in a patient's diet on account of its pleasant, agreeable, aromatic flavour. It is available in chemist's shops.

Bel leaf is useful in diabetes mellitus. A diabetic can chew a few leaves daily. Juice can be extracted from the fresh leaves and drunk. Some Sadhus live on Bel leaves alone. Bel leaves have a very good aroma. They are diaphoretic (produces more perspiration and thus reduces temperature), aphrodisiac (sex-ual stimulant) and febrifuge (lowers the temperature). The gum of the inside pulp of Bel fruit is aphrodisiac (Kama-vardhani).

The reputed Vilvadi Lehiam or Bel confection is made out of the root of Bel tree. A bathing oil is also made out of Bel fruit.

(iv) Prescriptions

1. Syrup of Bel

Re: Pulp of BelHalf a fruitSugar2 tablespoonfulsWater8 ouncesReject the stringy pieces. This may be taken thrice daily.

2. Be! Sherbet

Re: Pulp of Bel	3 fruits
Boiling Water	20 ounces
Sugar	4 tablespoonfuls
Allow to cool and add sugar. Dose: and sprue	2 ounces, four times daily. Useful in dysentery, diarrhoea

3 Bel Decoction

Re: Dried Fruit or Half-ripe Fruit4 ouncesWater20 ouncesReject rind and seeds. Boil till you get 10 ounce of decoc-tion. Strain. Add sugar, sufficientquantity. Dose: two ounces, thrice daily. 2 teaspoonfuls for a child. Useful in dysentery, diar-rhoea and sprue.

4. Dysentery Powder

Re: Bel Fruit (Powder)10 grainsIsafgul (Powder)10 grainsFennel10 grainsMake one powder. Dose: one powder thrice daily.

5.Diarrhoea Power-I

Re: Bel Fruit (unripe) powder10 grainsPulvis catechu5 grainsPulvis Kino5 grainsPulvish Cinnamon5 grainsSugar5 grainsMake one powder. Dose: Twice or thrice daily.

6. Diarrhoea Powder-11

Re: Bel Fruit (unripe) powder 5 grains

Butea Gum (Palas-ki-Gond) 5 grains Pulvis Cinnamon 5 grains Make one powder. Dose: 1 powder twice or thrice daily.

7. Diarrhoea and Dysentery

1 fruit Re: Soft pulp of unripe fruit Butter milk 8 ozs.

Remove the rind, seeds and fibres. Mix well. Add a little sugar or a little black pepper-powder and salt. Dose: Twice or thrice daily.

8. Dysentery Powder

Re: Bel Fruit (unripe) powder	5 grains
Kurchi	5 grains
Isafgul	5 grains
Pomegranate (rind of the fruit)	5 grains
Mangosteen (rind of the fruit)	5 grains
Make one nowder. Dose: 1 nowder ty	wice or thrice daily. This is very useful and notent

Make one powder. Dose: 1 powder twice or thrice daily. This is very useful and potent

CHAPTER VI

BETEL LEAF, BETEL NUT, BILWA TREE

18.BETEL LEAF

The fresh leaves of Chavica betel or Piper betel.

English	Betel Leaf
Hindi	Paan
Kanarese	Viilayadely
Tamil	Vettrilai
Telugu	Tamalapaku
Malayalam	Vethila
Marathi	Vidyachipaan
Gujrathi	Paan
Bengali	Punj
Sanskrit	Nagavalli (i) Uses of the Leaf

It is a creeper. It is cultivated enormously in India. It is a stimulant, carminative. astringent, aphrodisiac, antiseptic, feb-rifuge, stomachic, tonic, digestive, lactagogue and sialogogue. It contains an aromatic and astringent oil.

It is chewed along with lime, catechu, betel-nut, carda-mom, nutmeg and cloves. Betel chewing removes hoarseness of voice, flatulence or wind in the stomach and bowels, intesti-nal colic and pain in the stomach.

(ii) Betel Poultice

In coughs of children and adults where there is difficulty of breathing, warm the betel leaves and smear them with gingily or castor oil and apply them in layers over the chest. This will give speedy and marked relief.

Betel juice mixed with a little lime can be applied to the throat externally in sore throat. The same application over the liver is beneficial, in congestion and other affections of the liver. The leaf can be used as a dressing for burns.

If a necessity for arresting the secretion of milk in mother arises, warm the betel leaves over the fire and place them in layers over the breasts. This is very effective. It will reduce swelling of breasts. Such application is useful in reducing glan-dular swellings.

Instil 2 or 3 drops of betel leaf juice into the nose. Heavi-ness of head will be immediately relieved. Put 2 or 3 drops into the ears. Ear-ache will be relieved.

(iii) Betel Leaf-Ginger Juice

Re: Betel leaf juice	1/2 teaspoonful	
Fresh Ginger juice	1/2 teaspoonful	
Honey	1 teaspoonful	
Mix one dose. Useful in desease of lungs. Take this mixture twice daily.		

(iv) Songsters'Friend

Chew the root of betel. It will sweeten strengthen the voice of songsters.

(v) Betel Juice and Golochan

Re: Betel Juice1 teaspoonfulGolochan2 grainsMix. Useful in difficuly of breathing, cough with much accumulation of sputum.

(vi) Betel Decoction

Re: Betel leaves	3 ounces
Black pepper (powder)	4 ounces
Water	4 ounces
Boil and strain. Dose: 2 teaspoonfuls	twice daily. Useful in indigestion of children.

(vii) Betel Suppository

Dip the end portion of the betel (stick) in castor oil and in-troduce it into the anus of children. This will relieve flatulence or wind in the bowels and constipation. This is a cheap, readily available, suppository for children.

Mercury is purified by the juice of betel.

19. BETEL NUT

(ARECA NUT)

English	: Areca
Hindi	: Supari
Kanarese	: Adike
Tamil	: Pakku
Telugu	: Poka
Malayalam	: Kazhanga
Marathi	: Supari
Gujarati	: Supari
Bengali	: Supari
Sanskrit	: Kramuka, Pooga (i) Uses

The kernel of the fruit of Areca-catechu. It is astringent, carminative, stimulant and vermifuge. It is useful in diarrhoea due to indigestion, diseases that are associated with urine, worms in the bowels such as tape-worm, round-worm, thread-worm; diseases of teeth and gums, leucorrhoea of women.

(ii) Powder for Diarrhoea

Re: Areca Nut powder10 grainsSugar10 grainsDose: 1 powder thrice daily. Useful in diarrhoea and dis-eases that are associated with urine.

(iii) Areca Nut Decoction

Re: Areca Nut powder4 teaspoonfulwater20 ouncesBoil for half an hour and strain. Use this as a gargle. All diseases of the gums such as spongygums, etc., will disap-pear. The gums will be strengthened. This is useful as an injec-tion inleucorrhoea of women. Use a small syringe.

(iv) Areca Nut Tooth Powder

Burn it till it is charred. Powder it and strain through a fine cloth.

(v) Compound Areca Nut Tooth Powder

Re: Burnt Areca nut powder	1 ounce
Catechu	1 ounce
Cinnamon powder	1 ounce
Camphor	30 grains

Mix and strain. Useful and cheap tooth powder. The gums also will be strengthened. Loose teeth will be steadily fixed. It will relieve pain in the teeth. It will kill worms in the teeth (cari-ous tooth).

(vi) Areca Root Decoction

Re: Areca root 4 ounces

Water 20 ounces

Boil and strain. Useful as a gargle for ulcers in the lips and mouth and diseases of the gums.

(vii) For Tape-Worm

Re: Areca-nut powder	1 teaspoonful
----------------------	---------------

Milk

Useful in tape-worm.

(viii) For Round and Thread-Worms

Re: Areca nut powder 1 teaspoonful

Lemon juice (or pomegranate juice) ½ ounces

Mix. Take internally.

The tender areca-nut is useful for pain in the stomach and the bowels.

6 ounces

Fry the tender sprout with a little gingily oil and apply as a poultice in rheumatic pain and swelling.

20. BILWA TREE

The Bilwa tree grows in almost all parts of India irrespec-tive of the nature of the soil.

(i) Its Properties

The Bilwa being bitter, astringent and dry, causes consti-pation but promotes digestion. It cures all diseases caused by Vata (wind) and gives strength to the body.

Though the above-mentioned are some of the general properties of the Bael, certain portions of the tree possess spe-cial properties.

(ii) Its Uses

The unripe fruit cures Vata, Kapha, indigestion, stomach-ache and dyspepsia. This is stomachic to a high degree and causes constipation more than the root. The leaves possess the excellent property of alleviating diseases caused by Vata and Kapha. The flowers of the tree are found to cure diarrhoea, vomiting and thirst.

(iii) Parts Used

The root of the tree is the most important. The fruit, flowers and the leaves are also medicinal. In Kerala the roots are used for medicine after casting away the outer skin on it.

(iv) Medical Preparations

There are various medicinal preparations making use of the root, leaves, fruits and flowers out of which some of the sim-ple preparations may be enumerated.

A decoction made out of the root of Bael with dried ginger and roasted paddy if taken in small doses will cure vomiting. A decoction made out of the root of Bael with the tuberous root of Padha (cissempelos pereird) will be efficacious in persons suf-fering from piles. The very same preparation is found to be use-ful in cases of dysentery and diarrhoea. Take a well-cleaned root of Bael and at one of its tips roll a piece of silk and after dip-ping that portion in oil, set fire to the tip of the root holding it in such a way as to allow drops of the oil from the burning parts to fall down. Such drops of oil, if collected, cooled and poured into the ears will cure ear-ache. Eight ounces of oil mixed with 32 ounces of the express juice of Bilwa leaves, the mixture boiled till the water is completely evaporated and the oil got out of it, will have splendid results if applied on the head of persons suf-fering from nasal catarrh and diseases of the ear. The same oil warmed and poured into the ear will cure ear-ache, suppura-tion that is caused in the ear and deafness. The decoction of the root is useful in intermittent fever. The fresh juice of the leaves is given with the addition of black-pepper in anasarca with costiveness and jaundice and when diluted with water or honey, it is a highly-praised remedy in catarrh and feverish-ness.

There are many preparations that could be made out of the fruits also. Though in almost all cases the fruits of the plans are found to be with the best results while they are ripe, the un-ripe are more medicinal. The unripe fruits, if sun-dried will be far better. The pulp inside the fruit taken and a confection made cut of it in combination with Amrita (Tensopora cordifolia) with a little honey will suddenly stop vomiting. Milk boiled with the pulp of the fruits if taken in, according to digestion, will cure dysen-tery.

CHAPTER VII

BLACK PEPPER, BONDUC NUT, BORAX

21.BLACK PEPPER

(KALI MIRCH)

The dried, unripe fruit of Piper Nigrum is known as black pepper. It is cultivated in Malabar, Cochin, Coorg and Mysore.

(i) Properties and Uses

It has carminative, antiperiodic, counter-irritant, rubefacient, stimulant, resolvant stomachic and anti-vata or anti-rheumatic properties. It is useful in malaria, fever with rigor, ascites,:cough, chronic diarrhoea, gastric catarrh, rheu-matism, nausea, anorexia, piles, epilepsy gonorrhoea, spermatorrhoea, paralysis, pain in the ear, indigestion and jaundice. Pepper is an ingredient in Ayurvedic tooth powders.

A bath with pepper Tailam (oil) and hot water is useful in paralysis, rheumatism, heaviness in head, deafness, ascites, asthma, headache, itching, debility, fever, etc. Dose: 10 to 15 grains or more.

(ii) Cholera Pill

Re: Black pepper20 grainsAsafoetida20 grainsOpium6 grainsBeat them well together and divide into 12 pills. Does.1 pill. Repeat it in a hour if required.Useful cholera, diarrhoea.

(iii) Digestive powder

Re: Pepper powder	60 grains
Rock salt	60 grains
Dried ginger powder	60 grains
Cummin seeds powder	60 grains
Long pepper powder	60 grains

Mix well. Dose: One teaspoonful. Useful in indigestion, di-arrhoea, colic. This invigorates digestion and augments the Jatharagni or digestive fire.

(iv)Pepper Confection

Re: Black pepper powder	4 drachms
Cumin (Jeera) powder	4 drachms
Honey	6 ounces

Rub them well together in a mortar. Dose: 1 to 2 teaspoon-fuls thrice daily. Useful in piles haemorrhoid, prolapse or de-scent of rectum, etc. This a good digestive, too. This confection can be mixed with equal parts of confection senna or confec-tion of sulphur.

(v) Pepper Infusion

Re: Black pepper powder2 teaspoonfulsBoiling water20 ouncesThis is a useful stimulant gargle in relaxed sore throat, hoarseness of voice, ulcer throat.

Pepper is useful in malaria. It is mixed with Tulsi leaves, a little dried ginger and sugar or sugarcandy.

(vi) Pepper Tulsi Tea

Re: Black pepper	20 grains
Dried ginger powder	20 grains
Tulsi leaves fresh or dried	60 grains

Water (one tumbler)

Boil and strain. Add sugar and milk. Useful in malaria, cold in the nose and head, rheumatism, pain all over the body.

(vii) For Growing Hair

Re: Pepper powder	60 grains
Onion	60 grains
Salt	60 grains
Rub well. Apply to the parts in the	head which are eaten by worms. Hair will grow.

22. BONDUC NUT

(CAESAL PI NA BO NDUCELLA)

English Hindi Kanarese Tamil Telugu Malayalam Marathi Gujrathi Bengali Sanskrit	:Molucca Bean :Kat Kaliza, Kalkaranj :Gaj jag kay Kazharchikkay Gachchakaya Kalanchikkuru Gajaga Gajga Nata Kuberakshi
Sanskrit	Kuberakshi
Sanskrit	Kuberakshi

(i) Description

The seed of caesalpinia bonducella. This is an oval nut y2 inch long. It has a gray colour. It contains a white, starchy ker-nel of a pure bitter taste. It is a antiperiodic, antispasmodic, tonic, anthelmentic; febrifuge. The leaf is deobstruent and emmenagogue.

(ii) Bonduc Seed Powder

Re: Bonduc seed (powder) 1 ounce

Black pepper (powder) 1 ounce

Mix well and keep in a well-stoppered bottle. Dose: 15 to 30 grains 3 times daily for adults. Useful in intermittent fevers. In smaller doses it is a good tonic in debility after fevers and other diseases.

The bark of the root of the bonduc shrub in 10 grain doses is more effective in the above cases than the seeds them-selves.

Make a paste of the seed with the white of egg and apply to swollen testicles. The swelling will subside. You can apply a plain paste of the seed alone.

(iii) Bonduc Seed Tooth-powder

Re: Burnt seed powder	4 ounces
Arecanut burnt powder	4 ounces

Borax 2 drachms

DUIDX 2 UIDUIIIS

Mix and strain through a cloth. Useful tooth-powder. Teeth will be strengthened. Tooth pain will vanish:

(iv)Bonduc Seed Powder with Asafoetida

Re: Bonduc seed powder10 grainsAsafoetida3 grainsDose: One powder twice or thrice daily along with butter-milk. Useful in gastric catarrh or
gastritis (ghunma). It will give strength to the body.

(v) Bonduc Leaf Poultice

Add cocoanut pulp to the leaf and gently fry with castor-oil. Apply this to swellings. The swellings will subside. Swelling of testicles will also subside.

23.Borax

English	Sodium Borati
Hindi	Sodaga
Kanarese	Bilisara
Tamil	Venkaram
Telugu	Vellisaram

Malayalam	Ponkaram
Marathi	Kankankhar
Gujrathi	Tankamkhar
Bengali	Sohaga
Sanskrit	Tankana
	(i) Description and Uses

Dose: 5 to 15 grains. It is known as Biborate of sodium. It is slightly alkaline in reaction. It is prepared by the interaction of sodium carbonate on boric acid. It is soluble in cold water, freely in glycerine, but not in alcohol. It is an antiseptic and parasiticide. It kills parasites. It is a local sedative to inflamed mucus membrane. It relieves pain. It is frequently used as a dusting powder or in lotion with water- or glycerine for the mouth, eyes, nose, and ears.

It is used to irrigate the lower bowels, bladder and genital passages of both sexes, various wounded surfaces and si-nuses. For this purpose 2 or 4 per cent solution is usually em-ployed. An ointment of borax with vaseline (1 to 9) makes a simple, non-irritating application.

Borax makes the urine slightly alkaline which is helpful in dissolving mucus out of the bladder. It is an urinary disinfectant. A solution is used in leucorrhoea (whites) of females and gon-orrhoea for internal wash.

(ii) Glycerine-Boracis

This is prepared by rubbing 12 parts of purified borax and 88 parts of glycerine in mortar.

(iii) Mel Boracis

This is prepared by rubbing 10 parts of powdered purified borax, and 65 parts of purified honey and 25 parts of glycerine in a mortar (1 in 10). These two preparations are useful in sores in mouth. They can be freely rubbed in the sores. They can be mixed with water and used as a gargle for the mouth and throat in sere throat and sores in mouth. They will heal the sores quickly and exercise a soothing influence. They can be used for sores on the nipples.

(iv) Plain Borax

Plain borax can be dissolved in water (1: 20 of water) and used as a gargle. Borax can be mixed with equal parts of Potas-sium Chloras in the preparation of gargle. It can be used as an eye drop. Put 5 grains in one ounce of pure water or distilled water. It removes irritation of the genital organs. Soak a piece of cotton, wool or clean cloth in the lotion and keep it over the part.

(v) Borax Dehydrated

Borax can be dehydrated. Put it in a pan and heat the pan over the fire. Borax will swell like alum and become white. Pow-der it and keep it in a clean dry bottle.

CHAPTER VIII

BUTEA SEEDS I & II, BUTTERMILK

24. BUTEA SEEDS-I

(THE SEEDS OF BUTEA FRONDOSA)

English	Bastand Teak Seeds
Hindi	Palas-ke-bij
Kanarese	Muttaga-bija
Tamil	Porasam-virai, Murukkam-virai
Telugu	Moduga-vittulu, Plash-vittulu
Malayalam	Murukka-vita
Marathi	Palasa-cha-bij
Gujrathi	Palas-paparo
Bengali	Palas-papra
Sanskrit	Palash
	(i) The Leaf and the Seed

The leaf is astringent, tonic, aphrodisiac. The flower is aphrodisiac, diuretic, depurative and tonic. The seed is laxative and anthelmintic. The gum is astringent.

Butea seed is thin, flat, oval or kidney shaped, of a brown colour, 1y4 to 1% inch in length. It has neither taste nor smell. Soak the seed in water and remove the shell. Powder the ker-nel. Dose: 30 to 60 grains. The powder of fresh seeds is very effective. Old seeds are less effective.

(ii) For Round-worm, Tape-worm, Ulcers

 Re: Kernel of Butea seeds
 20 grams

 (Powder)
 20 grams

 Sugar
 20 grams

 Mix: One dose. The powder can also be mixed with honey and taken. Take 3 doses daily for three days. Afterwards take castor oil on the morning of the fourth day. Useful in round-worm and tape-worm.

Sprinkle the powder over the surface of unhealthy ulcers. If there are maggots they will be destroyed.

25. BUTEA SEEDS-II

(PALAS-KI-BIJ)

The seeds of Butea Frondosa. Dose: 30 to 60 grains.

(i) The Powder, The Leaves and The Gum

Useful in round-worms and tape-worms. Soak the seeds in water and remove the testa. Powder the kernel.

Re: Kernel of Butea seeds(Powder)20 gramsSugar10 grams

One dose three times daily for 3 days. Give castor oil on the fourth day. For round and tapeworms.

The powder of the seeds is used for destroying maggots in unhealthy ulcers. Sprinkle the powder over the surface of the ulcer.

The leaves of Butea or Palas are astringent, aphrodisiac and tonic; the flower is aphrodisiac, diuretic and depurative. The seed is laxative and anthelmintic: the gum is astringent.

The gum gives strength to nerves, sperm, joints, intelli-gence and chest. Butea gum is an excellent astringent similar to catechu (katha). The astringency is due to the presence of tannic and gallic acids. As it is mild in operation it is suitable for children and delicate females. Dose: 10 to 30 grains. Useful in chronic diarrhoea, pyrosis, dyspepsia.

(ii) For Cobra Poison

Re: Juice of bark1 teaspoonfulJuice of fresh ginger1 teaspoonfulMix. one dose. To be repeated every hour, for internal use.

(iii) Bark Decoction

Re: Bark of Butea 1 ounce

Water 10 ounces

Boil for 10 minutes and strain. Dose: 1 tablespoonful thrice daily. Useful in heaviness of head, cold in the nose and head, cough.

(iv) Decoction of Butea Leaves

Re: Butea leaves1 ounceWater10 ouncesBoil for 10 minutes and strain. Dose:1 tablespoonful, thrice daily. Useful in piles, diarrhoea andpain in the stomach and bowels.

The paste of the leaves can be applied to boils and swell-ings. They will subside. The flowers can be boiled and then ap-plied to boils and swellings. Crush the flowers, boil and apply it to swollen testicles. The swelling and inflammation will sub-side.

Re: Butea flowers1 ounceWater10 ouncesBoil and strain. Dose: 1 ounce twice daily. This brings out menstrual flow. Useful in
amenorrhoea or absence of menstru-ation and dysmenorrhoea or difficulty of menstruation.

(v)Butea Root (Palas-ka-ark)

Re: Roots of Palas4 ouncesWater20 ouncesDistil. (For external use). This is useful in eye-diseases, particularly cataract. Put a few drops in
the eyes with a dropper.

(vi) Butea Bark (For Snake Bite)

Re: Juice of the bark	1 teaspoonful
Juice of ginger	1 teaspoonful
Water	4 teaspoonfuls
Mix. One dose. To be repeated ever	y hour. Give 4 doses (internal use).

A decoction of the bark will remove the heaviness of head, catarrh of the nose and cough. Cut the bark into small pieces and chew them with sugar-candy. This will relieve excessive thirst.

(vii) Butea Flower

Re: Butea flower

1 ounce

Water 10 ounces

Boil and strain. Dose: 1 ounce twice daily. This brings out menstrual flow. Useful in amenorrhoea or absence of menstru-ation and dysmenorrhoea or difficulty of menstruation.

The flowers can be boiled and then applied to boils and swellings. Crush the flowers, boil and apply it to swollen testi-cles. The swelling and inflammation will subside.

The Decoction of the Butea Flower is useful in amenorrhoea or absence of menstruation or dysmenorrhoea or difficult menstruation. Menses will flow freely.

(viii) Butea Gum Powder (Bengal Kino)

Re: Palas-ki-Gond (gum)10 grainsCloves Powder5 grains

Make one powder. Dose: One powder twice or thrice daily. Useful in diarrhoea, dysentery, bloody urine, vomiting of blood.

Dissolve the gum in a little water. Touch the throat with this solution by a swab. Ulcers in the throat will disappear. This is like Mandels pigment or Tannic Acid Glycerine Paint. It is more suitable for children and delicate females.

(xi)Butea Leaf

Re: Butea leaves 1 ounce

Water 10 ounces

Boil for ten minutes and strain. Dose: 1 teaspoonful thrice daily. Useful in piles, diarrhoea and pain in the stomach and bowels.

The paste of the leaves can be applied to boils and swell-ings. They will subside.

26.Buttermilk

English	:Buttermilk
Hindi	:Mattha
Kanarese	:Majjige
Telugu	:Majjiga
Tamil	:Moore
Sanskrit	:Thakram (i) Description

Curd is mixed with plenty of water and churned. This dilu-ted and churned curd is called buttermilk. The buttermilk re-tains 10 per cent of the vitamin A and the other two vitamins, proteins and sugar. It is, therefore, an important article of diet. It is nearly as valuable as milk.

(ii) Its Medicinal Qualities

Buttermilk has excellent medicinal qualities. It is a very good drink in dysentery. It is more a medicine. In dysentery and all forms of uric acid diseases buttermilk diet for a certain pe-riod will be highly beneficial.

(iii) Properties and Uses

Buttermilk is more easily digestible than whole milk. It is astringent, light, cooling, appetising, nutritive and tonic. It is useful in dyspepsia, digestive trouble, etc.

Boiled rice and buttermilk is useful in diarrhoea, dysen-tery, piles, dropsy, excessive thirst and burning in urine. This will increase the digestive fire.

Cold rice and buttermilk removes burning in the body, bil-iousness. This will give good sleep.

CHAPTER IX

CAMPHOR, CAPSICUM, CARAWAY SEEDS

27. CAMPHOR

English	:Camphor
Hindi	:Kappur
Kanarese	:Karpura
Tamil	:Karpuram
Sanskrit	:Karpur

Dose: 2 to 5 grains. This is an ingredient in Tincture Cam-phor Co. or Paregoric Elixir which is used in cough mixtures. It is also an ingredient in Camphrodyne which is used in cholera. It is a diffusible stimulant. In shock or collapse it stimulates the heart. Two grains can be dissolved in milk and given immedi-ately in such conditions.

(i) An Anophrodisiac

It is an anophrodisiac and checks painful erections in gonorhoea. When it is given in large doses frequently, it pro-duces impotency and destroys erection of the organ. Some Sadhus take recourse to eating camphor to destroy their virile power.

(ii) An antigalactagogue

It is an antigalactagogue. It checks accumulation of milk in the breasts and so it is beneficial in mothers who have lost their children soon after delivery and who suffer from severe pain in the breasts owing to accumulation of milk.

(iii) An Antiseptic

It is an antiseptic. It destroys worms in the caries teeth. The socket or the hole must be filled with powdered camphor. It is an ingredient in tooth-powder. It is useful in spongy gums.

(iv) For Pains

Dissolve a few grains in mustard oil and expose the oil to the sun for sometime. This forms a very useful liniment in rheu-matism, muscular pain, neuralgia, lumbago, sprains, stiffness ot joints, contusion, etc. It is analgesic.

(v) An Anti-Spasmodic

It is anti-spasmodic and so it is useful in spasms of asthma and in chronic bronchitis. It serves as a stimulant in prostrating fever such as pneumonia, etc. It acts as a sedative in delirium. It brings out sputum or phlegm easily and so it is expectorant. It is a carminative as it corrects digestion and expels wind from the bowels. It is useful in flatulence of the bowels.

(vi) The Many Uses

It checks nocturnal discharges and is useful in spermatorrhoea. Two or three grains can be taken in hot milk at bed time. It is useful in dysmenorrhoea or difficult menstrua-tion.

Amritshara and Rubinis Camphor contain camphor. Cam-phor becomes a liquid when mixed and rubbed with thymol, menthol.

In influenza and coryza it is useful a nasal paint, dissolved in oil. In pneumonia it is given as a subcutaneous injection. It is dissolved in olive oil (1 grain in 1 c.c.). it gives strength to the heart and makes irregular rhythms of heart regular. Ampoules of camphor in oil (1 grain in 1 c.c.) is available in the chemists shops.

28.Capsicum

English Hindi Red Chillies Lal Mirch, Gach-mirch

Kanarese	Menasankai Kempu
Tamil	Milakai
Telugu	Mirapakaya
Malayalam	Kappalmilaka, Vattal Milakai
Marathi	Mir-singa
Gujrarati	Lal-Mirch, Marchu
Bengali	Lanka-morich, Lal-morich
Sanskrit	Katuvira

(i) Properties and Contents

The dried ripe fruit of Capsicum Minimum. Capsicum Fastigatum is Guinea pepper (Cheemai-Milakai). Capsicum is an irritant, rubefacient, counter-irritant, a good stomachic, stim-ulant, tonic, carminative, cardiac stimulant. It increases the se-men (Veerya Vriddhi). It contains capsaicin, a crystalline acid, a volatile oil, resin, a fatty substance and a volatile alkaloid. It has a characteristic odour and intensely pungent taste. Dose of the powder. y2 to 2 grains.

In allopathic system there are two preparations, viz., Tr. Capasici (does 5 to 15 minims) and Unguentum Capsici or oint-ment of capsicum.

(ii) Capsicum Gargle

Re: Capsicum bruised	1 teaspoonful
Salt	2 teaspoonful
Boilling water	20 ounces
Re: Capsicum bruised 1 teaspoonful	Salt 2 teaspoonfuls Boiling water 20 ounces

Strain. An excellent gargle for sore-throat. Relaxed throat. hoarseness of voice, etc.

(iii) Capsicum Pill

Re: Capsicum	1 grain
Camphor	1 grain
Asafoetida	1 grain
Make into one pill. For diarrhe	bea and cholera. Dose: one pill thrice daily.

(iv) Capsicum Decoction

Re: Capsicum30 grainsChinnamon10 grainsWater10 ouncesBoil for 10 minutes and strain. Add sugar 4 tablespoon-fuls. For checking the craving of drinkingliquor. Dose: 1 oz. thrice daily.

White sugar	4 drachms
Mix well. Dose: 1 teaspoonful daily.	Useful in indigestion, flatulence

CHAPTER X

CARDAMOM, CASSIA ALATA, CASTOR OIL

30. CARDAMOM

(CHOTI ELACHI)

English	: Cardamom
Hindi	: Elachi, (Choti Elachi)
Kanarese	: Elakki
Tamil	: Elakkai, Ella-kay
Telugu	: Yalakkai
Marathi	: Elachi
Gujarati	: Elachi
Bengali	: Garate
Sanskrit	: Elaam, Truti

The dried ripe seeds of Eletharia Cardamom obtained from Malabar and the Western Ghats. The odour and taste are strongy aromatic. It contains a volatile oil. Dose: 10 to 30 grains. It is a good carminative, stomachic, flavouring agent, stimulant, diuretic and aromatic.

In Allopathy Cardamom is used in the preparation of aro-matic chalk powder, aromatic chalk powder with opium, com-pound tincture of Gention. A tincture called Tincture Cardamom Co., is prepared out of cardamom. Dose: 30 to 60 minims or drops.

Cardamom is useful in flatulence or wind in the stomach and bowels, intestinal colic, excessive headache, dryness of mouth, cough, dyspepsia.

(i) Digestive Powder—I

Re: Cardamom			2 dra	ch	ms						
Ajwan			2 dra	ch	ms						
Cumin seeds			2 dra	ch	ms						
Anise seeds			2 dra	ch	ms						
Slightly parched.	Then	powder.	Dose:	1	teaspoonful	after	food.	Useful	in	dyspspsia	or
indigestion.											

(ii) Cardamom Decoction

Re: Cardamom	1 drachm
Black sugar	1 ounce
Water	8 ounces
Boil and strain. One dose.	Useful in giddiness due to bil-iousness

(iii) Digestive Powder—II

Re: Cardamom powder	4 drachms
Cumin powder	4 drachms
Cloves powder	4 drachms
Dried ginger powder	4 drachms

Dose: 30 grains or half a teaspoonful. Useful in stom-ach-ache, intestinal colic, gastric catarrh. This is a good diges-tive powder.

(iv) Compound Cardamom Powder

Re: Cardamom powder	2drachms	
Liquorice powder	2drachms	
Tail pepper powder	2drachms	
Amla powder	2drachms	
White sugar	1 ounce	
Mix well. Dose: 1 teaspoonful twice daily. Useful in cough, excessive thirst, pain in the stomach		
and bowels.		

(v) Cardamom Ghee

Re: Cardamom powder	4 drachms
Tail pepper powder	4 drachms
Cloves powder	4 drachms
Dried ginger powder	4 drachms
Coriander powder	4 drachms
Sugar-candy	1/2 seer
Cow's milk	1 seer
Cow's ghee	8 ounces
Honey	4 ounces

Put the sugar-candy in the milk. Stir well. Let it boil for some time. Then add the powders and ghee. Stir well. Now add honey. Dose: One teaspoonful twice, daily. Useful in cough. bronchitis, excessive thirst, dry mouth and dry tongue, dis-eases of the stomach and bowels, indigestion, intestinal colic, gastric catarrh, biliousness. The body will become cool. This is a blood tonic as well.

(vi) Cardamom Co. Pill

Re: Cardamom powder	4 drachms
Cinnamon powder	4 drachms
Long pepper powder	4 drachms
Liquorice powder	4 drachms
Black sugar	2 ounces

Beat well. Make into pills. Size of arecanut. Dose: 1 or 2 pills twice daily. Useful in indigestion, pain in the stomach and bowels, flatulence, diarrhoea, biliousness.

31. CASSIA ALATA

(RINGWORM SHRUB)

English	Ringworm Shrub
Hindi	: Dadmurdan
Kanarese	: Shimigida, shime-agase
Tamil	: Vandu-kolli, Vanduhadi-ilai,
Shimaiagatti	
Telugu	: Shima-avisi, Shima-chettu
Malayalam	: Shima Akati
Marathi	: Dadamardana
Bengali	: Dadmurdam, Dadmari
Sanskri	: Dadrughna

This is a parasiticide and purgative. This is useful in ring-worm and parasitic skin diseases. It is a beautiful shrub with its large prominent spike of yellow flowers. It is common in gardens and waste places throughout India.

(i) Dadmurdan Ointment

Re: Bruised fresh leaves	2 ounces
Vaseline, or Cocoanut or Sessamum	
oil	4 ounces

Rub the ointment into the skin thoroughly, twice daily. Use-ful in ringworm or Tinea Tonsurans.

(ii) Dadmurdan Paste

Re: Bruised fresh leaves2 ouncesLemon juiceq.s.Make a paste. Rub the paste thoroughly into the skin twice daily. Useful in ringworm.

(iii) Dadmurdan Oil

Re: Bees' wax	2 parts
Cocoanut oil	5 parts
Juice of the leaf	7 parts

Melt the bees'wax with cocoanut oil over the fire in a ves-sel. Now add the juice. Rub this over the body in parasitic skin diseases.

(iv) Preparation for Many Uses

Re: Leaves of Dadmurda1 ounceFlower of Dadmurda1 ounceWater20 ounces

Boil for 20 minutes and strain. Dose: 1 ounce twice daily. Useful in cough or bronchitis, dyspnoea or difficulty in breath-ing. This can be used as a gargle in stomatitis or ulcers in the wounds.

32. CASTOR OIL

English	: Castor Oil
Hindi	: Arandikatel
Kanarese	: Haralenne
Tamil	: Amanakkanney
Telugu	: Amudam
Malayalam	: Kottenna
Marathi	: Erandela
Gujarati	: Divel, Yarandinutel
Bengali	: Bheerandatail
Sanskrit	: Yeranda Tailam

The expressed oil of the seeds of Ricinus Communis. It is a darkbrown oil. It is acid in taste. The best kind is clear, of a pale straw colour. It has a slightly nauseous taste. The cold drawn expressed oil should always be used when procurable. The darkbrown, viscid oil obtained by boiling and subsequent expression of the seeds should be avoided on account of its acridity.

It is a good laxative. The ordinary dose for a child is a tea-spoonful. It may be gradually raised according to the age of the patient to two or four tablespoonfuls. It is best given floating on milk, coffee or omum water.

It is valuable as an emulsion in infantile diarrhoea and mouth. This is a good antiseptic lotion for washing ulcers and irritative diarrhoea of adults and in dysentery.

Castor oil is highly beneficial in painful affection of the rec-tum, piles, and when it is desirable to prevent the patient strain-ing at stool. It softens the motions and lubricates the intestines without weakening the patient.

(i) Castor Oil Poultice

The leaf is lactagogue and anti-rheumatic.

Re: Castor oil plant leaves4 handfulsWater8 pintsBoil for half an hour. Bathe the breasts for 15 minutes with this decoction. Then spread theboiled leaves over the breasts. The secretion of milk increases in a few hours.

Apply layers of the fresh leaves simply warmed before a fire, over the breasts. This is also an equally effective mode of application. It is simple also.

Smear the nipples freely with castor oil, each time when the child is removed from the breast. This is highly useful in sore nipples.

Re: Castor oil 1 or 2 ounces A purgative for adults. One teaspoonful for a child. (ii) Castor Oil Emulsion

Re: Castor oil	1 teaspoonful
Mucilage	q.s.
Water	1 ounce

Dose: One ounce thrice daily. Useful in dysentery. For a child use 5 or 10 drops of oil.

(iii) Castor Oil with Tr. Opium

Re: Castor oil1 teaspoonfulTr. Opium5 dropsTo be taken twice or thrice daily. Useful in dysentery and diarrhoea.

(iv) Castor Oil Eye Drops

Re: Castor oil 2 or 3 drops Useful in removing foreign bodies such as sand, charcoal particles, dust, etc.

(v) As a Poultice

Cut the leaves into small pieces, warm them slightly with castor oil and foment the swollen rheumatic joints and other painful parts of the body.

In abdominal pain apply a little castor oil over the abdo-men and apply over it the castor oil plant leaves which are slightly warmed before the fire.

(vi) The Three Ghee (Mukkoottu)

Re: Castor oil1 partGingily oil3 partsCow s ghee2 parts

This is a good application for the head. It will cool the head. This can be applied to the whole body also. Take a cold or hot bath.

CHAPTER XI

CATECHU, CHAULMOOGRA OIL, CHIRETTA

33. CATECHU

(KATTHA)

English	: Catechu
Hindi	: Kattha
Kanarese	: Khadira, Kadur
Tamil	: Katha Kambu
Telugu	: Podalimanu
Malayalam	: Khadiram
Marathi	: Khair
Gujarati	: Kher
Bengali	: Khair
Sanskrit	: Khadira

(i) Description

This is an extract from the heart-wood of Acacia Catechu. It is obtained by boiling and drying the decoction. The leaves and young shoots of Uncaria Gambier are extracted with water and dried. It is obtained from Singapore and Eastern Archipel-ago. Taste is at first bitter and astringent, afterwards, sweetish. It occurs in the form of masses of a blackish brown colour. Its chief constituent is Catechu Tannic acid. Catechu is used with pan or betel leaves. Dose: 5 to 15 grains.

(ii) Tincture Catechu

In Allopathic system Tincture Catechu is made out of Catechu. Cinnamon bark is added. Catechu is an astringent. It is serviceable in diarrhoea, ulcers, sore-throat and stomatitis or ulcers in the mouth. Dose: 30 to 60 minims.

(iii) Catechu Powder

Re: Catechu	10 grains
Cinnamon powder	10 grains
Honey	q.s.
Dose: One powder, 3 or 4 tir	nes daily. Useful in diarrhoea.

(iv)Catechu Compound Infusion

Re: Catechu bruised	4 drachms	
Cinnamon bruised	1 drachm	
Boiling water	10 ounces	
Infuse for 2 hours and strain. Dose: 2 tablespoonfuls or 1 ounce three times daily. Useful in		
diarrhoea. 5 or 10 drops of Tr. Opium to each dose will render it more efficacious.		

(v)For Diarrhoea in Children

Re: Catechu powder

3 grais

Cinnamon powder 3 grais Mix. Dose: One powder twice daily in honey with sugar.

(vi)A Good Dentifrice

Re: Catechu	2 drachms
Alum	1 drachm
Myrrh	1 drachm
Cloves	30 grains
Chalk	8 drachms

Powder; then mix and strain. This valuable tooth-powder will stop bleeding from the gums and strengthen loose teeth and the gums.

In relaxed sore-throat, hoarseness, loss of voice, in ulcer-ation and sponginess of gums, in mercurial salivation chew a small piece of catechu and allow it to dissolve in the mouth slowly. You will derive immense benefit.

In toothache and caries tooth, plug the hollow of the tooth with a small piece of catechu. The pain will vanish.

(vii)Catechu Infusion

6 drachms

Re: Katechu	
Boiling water	

Boiling water 20 ounces Infuse for 2 hours and strain. This is a good lotion for sore nipples and old, chronic ulcers. Bathe the parts twice or thrice daily. This infusion is a preventative of sore nipples. The breasts should be bathed with this infusion daily for a month before the confinement. This will harden the tissues.

(viii) Catechu Co. Ointment

Re: Catechu powder	1 drachm
Copper sulphate	10 grains
White vaseline	1 ounce

Mix well. This is useful in chronic ulcers attended by much foul-smelling discharge. This is an astringent and stimulating, healing ointment.

The addition of Catechu to Paan or betel leaves is benefi-cial in strengthening the loose teeth and killing the worms in the bowels.

34. CHAULMOOGRA OIL

English	: Jangli almond
Hindi	: Chaulmoogra
Tamil	: Neradi-mattu

: Niradivittulu
: Niradimuttu
: Kadu-Kawata
: Tuvaraka

(i) Uses and Some Instructions

The fixed oil expressed from the seeds of Gynocardia Odorata. The oil has a peculiar and slightly unpleasant smell and taste. Chaulmoogra seeds are about an inch in length, of oval form.

This is a remedy for leprosy, scrofula, lupus, chronic ec-zema and chronic rheumatism. This is used both externally, and internally.

In South India where Chaulmoogra is rarely obtainable, the oil of the seeds of a tree of the same family, Hydnocarpus Inebrains can be tried. The oil has a great repute among the natives of Malabar as a remedy in leprosy.

The dose of the seeds is 6 grains, three times daily, in the form of a pill. It is gradually increased to 3 or 4 times that quan-tity or until it produces nausea or vomiting, when the dose should be decreased or the use of the remedy stopped for a time. This is the best form of administration.

The dose of the oil is 5 or 6 drops, gradually increased as in the case of the seeds. Give up salted meat, acids, spices and sweetmeats during the use of this medicine. But you can take butter, ghee and oily articles of diet. It may be advantageously combined with a course of Cod-liver oil.

(ii) Chaulmoogra Co. Emulsion

Re: Chaulmoogra oil	5 drops
Cod liver oil	20 drops
Mucilage	q.s.
Water	1 ounce
	(iii) Chaulmoogra Ointment—I

Re: Chaulmoogra oil1 drachmWhite vaseline soft1 ounceUseful in obstinate skin diseases, chronic eczema and lepric spots. You can beat the seeds into
a paste with a little ghee or vaseline. This also will form a good ointment.

(iv) Chaulmoogra Ointment—II

Re: Chaulmoogra oil	1 ounce
Nim oil	1 ounce
Mix well. Rub into leprotic spots.	

(v) Chaulmoogra Tonic

Re: Chaulmoogra oil	5 drops
Warm milk	4 ounces

Dose: Twice daily after food. This is a tonic for lepers.

(vi) Chaulmoogra Pill

Re: Chaulmoogra seeds powder	5 grains
Honey	q.s.

One pill. Dose: One pill thrice daily. Useful in leprosy and eczema.

(vii) Plain Chaulmoogra Emulsion

Re: Chaulmoogra oil	5 drops
Mucilage	q.s.
Syrup	1 drachm
Water	1 ounce
One ounce twice daily after	r food. Gradually in-crease the dose. Useful in leprosy.

35. CHIRETTA

English	king of Bitters:
Hindi	:Kiriyat
Kanarese	:Nelabaevu
Tamil	:Nilavembu
Telugu	:Nelavemu
Malayalam	:Kiriyat
Marathi	:Olen Kirayat
Gujarati	:Kiryato
Bengali	:Kalmesh
Sanskrit	:Bhunimba

(i) Description

Chiretta is the plant of Swertia Chiretta or Ophelia Chiretta. It is collected when in flower and dried. It is obtainable in all bazaars. The whole plant is intensely bitter. Dose: 10 to 30 grains. The allopathic system has two preparations, viz., Infu-sion Chiretta Compositum Concentratum (dose 30 to 60 min-ims) and Tr. Chiretta Co. (dose 30 to 60 minims).

(ii) Uses

The infusion is a popular domestic remedy for general de-bility with poor appetite and digestion, particularly during con-valescence from a serious disease.

Chiretta is a stomachic, bitter tonic, alterative and stimu-lant. It is a tonic after fevers. It clears and brightens the intellect. It is useful in dyspepsia or indigestion, torpidity of liver, giddi-ness due to biliousness.

(iii) Chiretta Infusion—H

Re: Chiretta bruised1 ounceBoiling water20 ouncesInfuse for 4 hours and strain. Dose: 2 ounces three times daily. This a good tonic.

(iv) Chiretta Infusion—II

Re: Chiretta	1 ounce
Cloves powder	1 drachm
Cinnamon powder	1 drachm
Cardamom powder	1 drachm
Boiling water	10 ounces

Infuse for 6 hours and strain. Dose: 2 ounces thrice daily. Useful in all cases of debility, especially after fever, indigestion or dyspepsia, anorexia or loss of appetite, ague, or intermittent fever, gastric catarrh, worms in the bowels, diarrhoea owing to indigestion, vomiting in pregnancy.

Cloves or cinnamon or cardamom increases the efficacy of Chiretta and improves its flavour. You can add Syrup of or-ange or honey to the infusion.

(v) Chiretta InfusionI—III

Re: Chiretta	1 ounce
Skin of Mossambi	1 ounce
Coriander	2 drachms
Boiling water	20 ounces

Infuse for 1 hour and strain. Dose 1 ounce thrice daily. Useful in bilious giddiness, debility, ague, indigestion, loss of appetite. The juice of the leaves is useful in flatulence and diar-rhoea of children.

(vi) Chiretta Infusion—IV

Re: Chiretta bruised	4 drachms
Vassambu (sweet flag) powder	1 drachm
Chatha-kuppal (dill)	1 drachm
Boiling water	10 ounces
Infuse for 1 hour. Dose: 2 tablespoo	onfuls thrice daily. Use-ful in debility, fever, dysentery, etc.

CHAPTER XII

CINNAMON, CLOVES, COCCULUS-INDICUS

36. CINNAMON

(CINNAMOMUM ZEYLANICUM)

English	:Chinese Cassia
Hindi	:Dalchini
Kanarese	:Lavangapatta
Tamil	:Lavangapattai
Telugu	:Lavangapatta, Dasinachakka
Malayalam	:Lavangapatta
Marathi	:Dala-chini
Gujarati	:Dalchini
Bengali	:Dalchini
Sanskrit	:Thwak

(i) Properties and Uses

This is the dried bark of Cinnamomum Zeylanicum. It is obtained from the Deccan, Burma, Malaya and Ceylon. It oc-curs in closely rolled quills containing several smaller quills in-side. It is yellowish-brown in colour. It has a sweet, hot taste. It contains a volatile oil, tannin, sugar and gum. Dose: 5 to 20 grains.

It is a stimulant, astringent, carminative, aphrodisiac, antispasmodic and tonic. It is also a heartstimulant. It is used in the preparation of vegetables, soups, etc. It is useful in spermotorrhoea, diarrhoea, bronchitis, dysentery, poisoning, flatulence or wind in the bowels, dyspepsia, cobra poison and fevers. It cools the body and removes bad odour in the mouth. It contracts the uterus. Hence it is useful in menorrhoea or exces-sive menstruation. It is also useful in dull labour pains.

Cinnamon powder is used in Allopathy in the preparation of compound Catechu powder, Creta Aromaticus powder, Greta Aromaticus with Opium powder and compound Tincture of Cardamom. The oil of cinnamon (dose 1 to 3 minims) enters into the composition of concentrated cinnamon water (dose 5 to 10 minims), and Spirit of Cinnamon (dose 5 to 20 minims or drops).

Cinnamon is closely allied in medicinal properties and use to cloves. It may be substituted for cloves when the latter is not procurable. It is an agreeable adjunct to many other medicines.

(ii) Compound Cinnamon Powder

Re: Cinnamon powder	1 drachm
Cardamon powder	1 drachm
Dried ginger powder	1 drachm

Mix well. Dose: grams 10 to 20 thrice daily. Useful in vom-iting, flatulence, intestinal colic, dysentery, diarrhoea, dyspep-sia, etc.

(iii) Cinnamon Decoction

Re: Cinnamon	1 drachms
Cardamom	1 drachms
Dried ginger	1 drachms
Cloves	1 drachms
Anise seeds	1 drachms
Vidanga (Vai Vilangam)	1 drachms
Water	20 ounces

Boil till the water is reduced to 5 ounces. Dose: 2 tea-spoonfuls thrice daily. Useful in stomach ache, gastric catarrh dyspepsia.

	(iv) Cinnamon and Catechu Decoction
Re: Cinnamon	2 drachms
Cetechu	6 drachms
Boiling water	20 ounces

Keep for one hour and strain. Dose: 2 teaspoonfuls thrice daily. Useful in diarrhoea.

(v) Cinnamon and Catechu Powder

Re: Cinnamon powder	5 grams
Catechu	6 grams
Dried ginger	2 grams
Black pepper	1 gram
Make one powder. Dose: 1	powder thrice daily. Useful in diarrhoea.

37. CLOVES

(CARYOPHYLLUM; LAVANGA)

Hindi	: Lavang
Kanarese	: Lavanga
Tamil	: Kerambu
Telugu	: Lavangam
Malayalam	: Grambuo
Bengali	: Lavanga
Sanskrit	: Lavanga

(i) Properties, Uses and Preparations

This is the dried flowering bud of Eugenia Aromatica or Caryophyllus Aromaticus. It has a strong spicy smell and very pungent aromatic taste. Dose: Two to five grains. This contains the volatile

oil, caryophyllum and gallo tannic acid. It is usually obtained from Jawa, Ceylon, Penang and other places.

Clove is a good stimulant, carminative, stomachic and antispasmodic. It is useful in indigestion, colic, flatulence or wind in the bowels, bilious giddiness, diarrhoea, nausea, dys-entery, sprue, chronic diarrhoea, spermatorrhoea, earache, opacity of cornea. It binds the bowels. It is used as a spice for vegetable curries, soups. etc. It stimulates the appetite and aids digestion.

It removes hoarseness of voice. Therefore, it is useful for songsters and lecturers. It can be chewed as it is or with sugar candy.

The official preparation of British Pharmacopoeia are caryophilli infusion diluted and concentrated, and oil of cloves.

The dose of the diluted infusion is $\frac{1}{2}$ to 1 ounce and the dose of the oil is 1 to 3 minims, or drops. 2 or 3 drops of oil of cloves can be taken in sugar. Useful in indigestion, flatulence, intestinal colic, vomiting, diarrhoea.

Oil of cloves is useful in toothache or dental neuralgia, caries tooth. It strengthens the gums.

Make a very fine paste of clove and apply it to the fore-head and nose. Heaviness of head and catarrh in the nose will be cured.

Fry some cloves over the fire and chew them. Sores in the throat will be cured. The gums will be strengthened.

Cloves enter into the composition of all medicines which are intended for biliousness, spermatorrhoea, diarrhoea.

(ii) Infusion of Cloves

Re: Cloves powdered	4 dramchs
Boiling water	20 ounces

Keep for half an hour and then strain. Dose: One ounce daily. Useful in indigestion, flatulence or wind in the bowels, colic and spasmodic affections of the bowels, vomiting in preg-nancy, dysentery, sprue, chronic diarrhoea.

(iii) A Good Purgative

Re: Cloves20 gramsDried ginger20 gramsSenna leaves4 drachmsBoiling water8 ouncesAllow this to stand for y2 hour and strain. One dose. A good, aromatic purgative.

(iv) Cloves Chiretta Tonic

Re: Infusion of cloves 8 ounces

Infusion of Chiretta 8 ounces

Mix well. Dose: 1 ounce twice daily. Useful in debility. loss of appetite and in convalescence after fevers.

Mix Well. Dose: 20 grains twice daily. Can be made into pills also (5 gr). Useful in bilious giddiness, diarrhoea, vomitting, itching in anus.

38. COCCULUS INDICUS

(INDIAN BERRY; FISH BERRY)

English Hindi	: Indian Berry : Kakmari
Kanarese	: Ka ka-mari-bija
Tamil	: Kakkai-kolli-vilai, Penkottai
Telugu	: Kakamari, Kaki-ceampa
Malayalam	: Nanjin Kuru, Kakka-kolli
Marathi	: Karwi
Gujarati	: Kakphal
Bengali	: Kaka-mari
Sanskrit	: Kakphala, Kakanshika

(i) Description

The fruits of Anamirta Cocculus. This plant grows in Cey-lon, Malabar and Burma. The dried fruit is larger than a pea. The kernel is yellowish, oily and bitter. An oil is extracted from the

kernel. It is called Picrotoxine. This is a virulent poison. If this is mixed with food and given to the crows, they die immedi-ately. Hence the name `Kakkai kolli', 'killer of crows'.

(ii) For Itching Skin

Cocculus Indicus is an emetic, parasiticide and a narcotic. It is used as an agent for destroying pediculi or lice. It is useful in itching of skin.

Re: Cocculus seeds60 grainsVaseline1 ounce

Vaseline 1 ounce Beat the seeds in a mortar and make into a paste and then mix the paste thoroughly with vaseline, butter or ghee. The ointment should not be applied in ulcerated surfaces on ac-count of the danger of absorption of the poisonous principles of the seeds.

(iii) For Intravenous Injection

Picrotoxin: Synonymn. Cocculin. A glycoside obtained from Anamirta Paniculata, This is bitter, colourless, crystal. Dose: 00 to y20 grain. This is given as an intramuscular or intra-venous injection. Picrotoxin is occasionally given orally in night sweats. It is given in barbiturate, paraldehyde and bromethol poisoning in doses of y6 grain intramuscularly or intravenously. Picrotoxin is useful in epilepsy, hemiplegia, headache, sweat-ing of phthisis, and diseases caused by poisonous drugs.

CHAPTER XIII

CORIANDER SEEDS, COUNTRY FIG,

COUNTRY GOOSEBERRY

39. CORIANDER SEEDS

(CORIANDRUM SATIVUM)

English Hindi Kanarese Tamil Telugu Malayalam Marathi Gujarati Bengali Sanskrit

- : Coriander
- : Dhaniya
- : Kottamari-bija
- : Kothumalli
- : Dhaniyalu
- : Kottamalli
- : Kothimbir
- : Dhana
- : Dhane
- : Kustumbari, Dhanyaka

(i) Description

The seeds of Coriandum Sativum. This plant is cultivated throughout India. The seeds are stomachic, carminative, stim-ulant, diuretic, aromatic and antispasmodic. They contain a volatile oil.

(ii) Uses of Coriander Leaf

Coriander leaf is useful in anorexia or distaste for food, dyspepsia, biliousness. It increases the semen. It is used as a flavouring agent in the preparation of pepper water (Rasam), Sambar, Pachadie and Chutney by South Indians. It has a very good aroma.

The leaf can be slightly fried with a little gingly oil and ap-plied to swellings as a poultice. The swelling will either subside or ripen.

(iii) Coriander Infusion

Re: Coriander seeds4 drachmsBoiling water20 ounces

Infuse for one hour. Dose: 1 ounce three times daily. Use-ful in flatulence, dyspepsia, giddiness and biliousness. You can add a little milk and sugar.

(iv) Coriander Coffee

Re: Coriander seeds	2 tablespoonfuls
Sugar	2 tablespoonfuls
Milk	16 ounces

Fry the seeds with a little ghee and powder. You can make a little decoction of 4 ounces and add this to the milk. This is pure milk-coriander coffee. This is a very good substitute for coffee and tea. This will cure piles.

(v) Coriander Co., Powder

Re: Coriander seeds (parched)	4 drachms
Caraway powder (Jira) parched	4 drachms
Cardamom powder (parched)	4 drachms

Dose: 1 teaspoonful after food. This is a very good diges-tive powder. Useful in diarrhoea, indigestion, biliousness.

(vi) Oil of Coriander

Dose: 1 to 4 drops. This is useful in flatulence, dyspepsia, biliousness, giddiness, diarrhoea.

Make a paste of coriander and apply it to the forehead. Headache will be relieved. A paste of coriander and sandal will relieve bilious headache. Make hot poultice of coriander and apply it to chronic ulcers and carbuncles. They will be cured.

40. COUNTRY FIG

(FICUS GLOMERATA)

English	Country fig
Hindi	Gular
Kanarese	Atti
Tamil	Atti
Telugu	Atti,Medi
Malayalam	Atti
Marathi	Umbar
Gujarati	Umbaro
Bengali	Jajnadumar
Sanskrit	Udumbara Uses of Fig Fruit

Fig fruit improves and increases the blood. It is a laxative too. The tender and half ripe fruits are used as a vegetable curry and beneficial for persons suffering from piles.

41. COUNTRY GOOSEBERRY

(AVVERHOEA ACIDA)

English	Country Gooseberry
Hindi	Chelmeri, Haraphalvadi
Kanarese	Kirunelli
Tamil	Arunelli
Telugu	Racha-usirikaya
Malayalam	Arinelli, Chirmi
Marathi	Kanta-avala
Bengali	Nubarse

(i) Description

This is a tree that grows in the Mediterranean climate and yields an abundance of fruits.

This is a small tree. This is grown in the gardens of India. This is cultivated in the Malaya States.

(ii) Leaf, Seed and Fruit

The leaf is a diaphoretic. The seed is a laxative. The fruit is antibilious. The leaf, fruit, seed and the root are used.

Make a paste of the leaves and mix it well in a tablespoon-ful of buttermilk. Take this twice daily for 4 days. Jaundice will be cured. When you take this give up salt. Take goat's milk with boiled rice.

The fruit is useful in asthma, excessive thirst, internal heat, biliousness. It cools the body.

(iii) Gooseberry Juice

Re: Juice of Arunelli	1 ounce
Juice of grapes	2 ounces
Burnt alum	2 grains
Sugar	60 grains
One dose. Useful in gonorrhea.	

(iv) Gooseberry Sherbet

Re: Gooseberry juice20 ouncesSugar20 ouncesBoil gently to the consistency of a syrup. Dose: 1 ounce in a tablespoonful of water. Useful inbiliousness, thirst, internal heat.

(v) For Vomiting

Re: Dried gooseberry powder	10 grains
Cumin seeds jeera powder	10 grains
Long pepper powder	10 grains
Water	4 ounces

Put the powder in water. Let it remain for one hour. Add one tablespoonful sugar. Strain. One dose. Useful in vomiting.

(vi) Gooseberry Chutney

Re: Dried of fresh gooseberry	¼ seer
Black pepper	1 ounce
Fresh ginger	2 ounces
Fresh coriander leaves or	
sweet nim leaves	1⁄2 ounce
A little salt	

Make it into a chutney (rough paste). Useful in bilious-ness, vomiting. This cools the body. The eyes become lus-trous.

(vii) Gooseberry Patchadie

Re: Fresh or dried gooseberry	
bru.	Handful
Curd	¼ seer
Few green chillies in pieces.	

Mix. A very good appetizer. This is anti-bilious. This is taken in South India in Dvadasi days with Akatti Keerai (a kind of leafy vegetable).

(viii) To relieve Constipation

Re: Gooseberry seed powder	1 teaspoonful
Sugar	1 teaspoonful
Useful in constipation.	

CHAPTER XIV

IPECACUANTIA, SARSAPARILLA, CROTON SEEDS, CUBEBS

42. COUNTRY IPECACUANTIA TYLOPHORA

Hir Та Те Ma Be

indi	: Antamul, Jangli-pirwan
amil	: Nachchurupan, Naypalai, Peyppalai
elugu	: Verri-pala, Kukkapala
lalayalam	: Vallipala
engali	: Anto-mul

(i) Description

The plant is found in Bengal and other parts of India. Its roots and leaves are endowed with emetic properties. The dried leaf is a substitute for Ipecacuantia.

(ii) Uses of Powdered Dried Leaves

Dose of the powdered dried leaves as an emetic is 40 to 50 grains for an adult. It is an expectorant and diaphoretic in small doses (5 to 10 grains). The powder of the dried leaves is useful in dysentery and diarrhoea, in doses of 10 grains, three or four times daily.

43. COUNTRY SARSAPARILLA

(THE ROOT OF HEMIDESMUS INDICUS)

English	: Indian Sarsaparilla
Hindi Kanarese	: Magrabu Salsa, Jangli-Chanbelii
Tamil	: Sugandha-palada
Telugu	: Nannariver
Malayalam	: Sugandhi
Marathi	: Nannari
Bengali	: Uparsari
Sanskrit	: Anantamul
Sanskrit	: Saribha

This is the dried root of Hemidesmus Indicus. This is a good alterative, tonic, demulcent, diuretic, diaphoretic.

(i) Its Importance Emphasised in Ayurvedic Scriptures

This is a kind of creeper that grows by itself in India in the jungles. The root has a good aroma. It is slightly bitter.

The freshly collected root is preferable to that bought in the bazaars. The virtues of the drug abide chiefly in the bark of the root.

Ayurvedic scriptures unanimously glorify Sarsaparilla thus "It is a sweet, refreshing nervine tonic. It destroys poison, allays all irritation, increases strength and vitality. It removes indigestion, loss of appetite, difficulty in breathing, cough, venereal diseases in men and women, rheumatism, fever, all skin and blood impurities and mercurial poisons."

(ii) Its Utility in Many Diseases

Sarsaparilla removes excessive thirst, excessive saliva-tion in the mouth, biliousness, ringworm, heat of sexual inter-course, syphilis. Iodised sarsaparilla is an allopathic patent medicine. It pu-rifies blood. It is useful in syphilis.

Hemidesmus is useful in constitutional debility that arises from any cause. Constitutional syphilis, skin diseases and ul-cerations, particularly those of syphilitic origin, chronic rheumatism, indigestion and loss of appetite. It is best given in the form of infusion.

(iii) Sarsaparilla Coffee—I

Re: Sarsaparilla root bruised	1 ounce
Boiling water	10 ounces

Infuse for 1 hour and strain. Add milk and sugar. Dose: 2 to 3 ounces thrice daily. Take the infusion while it is still warm. This is a very good substitute for tea or coffee, for children and adults. Useful in debility and indigestion, syphilis, skin dis-eases, chronic rheumatism, chronic paralysis, sexual debility.

(iv) Sarsaparilla Coffee—II

Re: Sarsa root dried powder	2 drachms
Cow milk	1/2 seer
Sugar	2 tablespoonfuls

Take in the early morning. Useful in all urinary diseases, stricture of urethra with dysuria or difficulty in passing urine, burning urine, etc.

(v) Sarsaparilla Drink

Re: Sarsaparilla powder	1 drachm
Cumin seeds	20 grains

Water

20 ounces

This can be used as drinking water. This is useful in all the diseases described above.

(vi) Sarsaparilla Sherbet

Re: Sarsa root bruised	4 ounces
Boiling water	20 ounces
Sugar	8 ounces

Soak the powder in boiling water for 6 hours. Then strain. Add sugar and put this over slow fire, till you get the consis-tency of syrup. Dose: 2 ounces with a tablespoonful of water. This purifies the blood, cools the body and removes diseases of the skin.

The Bengal Chemical Pharmaceutical Works Ltd., Cal-cutta, prepare Sarsac Liquidum and Sarsa Liquid Compound. Saribadi Asava and Saribadyarishta (Sariva quath) are two good Ayurvedic preparations made out of Sarsaparilla. Asava is an infusion in cold water. Arishta is a decoction made by boiling.

Saribadi Asava is useful in scrofulous swelling, chronic gonorrhoea and syphilis. It improves digestion, invigorates the system, enriches the blood and binds up flesh and strength. It also assists nature in carrying off the morbid or unhealthy se-cretion of the skin and cures pimples, boils, etc.

(vii) Saribadyarishta

This is useful in rheumatic pains, skin diseases, scrofula, constitutional debility, etc. It gives tone to the liver, removes bil-iousness and improves the blood qualitatively and quantita-tively. Dose: $\frac{1}{2}$ to 2 ounces.

(viii) Sariva Quath (decoction)

This is a valuable alterative, diaphoretic, diuretic and tonic useful as a diuretic in rheumatic pains, boils, scanty and high-coloured urine, gravel, etc. As a diaphoretic and tonic it is given in fevers with loss of appetite and disinclination for food (anorexia). As an alternative it is valuable in chronic rheuma-tism, skin-diseases, scrofula, syphilis, cachexia, constitutional debility, etc. Dose: ½ to 2 tolas twice daily.

44. CROTON SEEDS

English	: Croton-oil seed, Purgative Croton
Hindi	: Jamalgotti
Kanarese	: Japala beeja
Tamil	: Nervalam

Telugu	: Nepalam
Malayalam	: Nervalam
Marathi	: Napalacha-bij
Gujarati	: Jamla-gota
Bengali	: Jamal-gota
Sanskrit	: Danthi
	(i) Description and Uses

The seeds of croton Tilgium. They should be fresh. They are about the size of a grain of coffee. They are oval. The taste is acrid and pungent. It is a violent purgative, good local rubefacient and stimulant. It is a powerful gastro-intestinal irri-tant. The extracted oil from the seeds is generally used.

(ii) Croton Pill

Remove the outer shell. Boil the seeds 3 times in milk. Af-ter boiling remove the outer skin and little leaf-like thing which will be found between the two-halves of the kernel. If the latter is not removed, it will cause violent griping and vomiting.

Re: Purified croton seeds powder	30 grains
Catechu	60 grains
Honey or gum	q.s.

Beat them into an even mass. Mix the ingredients thor-oughly. Divide into pills, each weighing 2 grains. Dose: One pill for an adult. This should be given only when a strong purgative is needed as in apoplexy, convulsion, strong fevers, etc. If it causes much griping and vomiting or too violent purging give to the patient a large draught of lime juice. This may be safely re-peated in half an hour if the vomiting and purging continue. Never take any croton pill unless you know well that the croton is purified by a qualified, Ayurvedic doctor.

 Re: Croton oil
 1 drop

 Sugar
 a lump or 1 teaspoonful

 A powerful purgative in cerebral haemorrhage or apoplexy and convulsion. It can be made into

a pill with bread crumb. In apoplexy when the patient is unable to swallow, it is sufficient to place the oil at the base of the tongue. It should not be given to children and boys. It should be given only to adults.

(iii) Croton Oil Liniment

Re: Croton oil Sessamum oil, or Cocoanut oil, or Mustard oil

4 teaspoonfuls

6 ounces

This is a useful stimulating liniment for chronic rheuma-tism, paralysis, diseases of the joints, chronic bronchitis, etc.

(iv) How to Purify Croton

Tie a few seeds in a handkerchief and boil this in cowdung water, cow's urine and fruit Juice (lemon) separately. Then re-move the shell, skin and the inner leaf between the two halves of the seed. Then fry the seeds in cow's ghee.

45. CUBEBS

(KABAB CHINI)

English	Tailpepper
Hindi	Sitalchini
Kanarese	Gandha menasu
Tamil	Val-mulaku
Telugu	Toka-miriyalu
Malayalam	Valmilaku
Marathi	Kankora
Gujarati	Tadamiri
Bengali	Sitalchini
Sanskrit	Sungadha-muricha

(i) Description and the Uses

This is the dried, full-grown, unripe fruit of Piper Cubeba (tail pepper). It is of the size of black pepper. It is a small black seed. It has an acrid camphoraceous taste and a peculiar aro-matic odour. It can be obtained in most of the bazaars. It is a stimulant, urinary antiseptic, carminative, diuretic, expectorant. Its main action is on the genito-urinary passages; it stimulates the secretion of the respiratory and genito-urinary tracts. Dose: 30 to 60 grains.

The two chief allopathic preparations are Tincture Cubebac (dose 30 to 60 minims), and Oil of Cubeb (dose 5 to 20 minims: suspended in mucilage).

Cubebs is useful in cough, gastric catarrh, excessive thirst, gastritis, advanced stages of gonorrhoea, gleet, leucorrhoea and other vaginal discharges in women.

(ii)Cubebs Co. Powder-I

Re: Cubebs powder Alum powder 20 grains 5 grains (iii)Cubebs Co. Powder-II Re: Cubebs powder10 grainsPotassium nitrate5 grainsDose: One powder thrice daily. Useful in gonorrhea.

(iv)Cough Mixture

Re: Cubebs10 grainsCinnamon water1 ounceDose: 1 ounce thrice daily. Useful in Bronchitis or cough and laryngitis.

(v)Cubebs with Hot Milk

Re: Cubebs	20 grains
Sugarcandy	4 drachms
Hot milk	1/2 seer
Useful in hoarseness of voice. The voice will improve.	

(vi)Cubebs Oil Mixture

Re: Oil of Cubeb	5 minims	
Oil of copaiba	5 minims	
Oil of sandal wood	5 minims	
Mucilage	q.s.	
Aqua Cinnamon	1 ounce	
Mix together. Dose: 1 ounce thrice daily after food. Useful in gonorrhea and gleet. The oil can		
be taken along with white suga	ar.	

(vii)Cubeb Decoction

Re: Cubeb powder	1 drachm	
Liquorice powder	1 drachm	
Long pepper powder	1 drachm	
Galangal (Chittaratai)	1 drachm	
Water	1 ounce	
Boil for half an hour. Dose: 2 tablespoonfuls thrice daily. Useful in bronchitis or cough.		

(viii)Cubebs with Honey

Re: Cubeb powder30 grainsHoneyq.s.

Dose: Thrice daily. Useful in cough, gastritis, gonorrhea. The appetite will increase. Instead of honey you can take the powder with milk.

Make a paste of cubeb powder and apply it to the temples and forehead. Headache will be relieved.

CHAPTER XV

DHATURA, DILL SEEDS AND DRIED GINGER

46.DHATURA

(THORN APPLE, STRAMONIUM)

English	: Thornapple
Hindi	: Dhatura
Kanarese	: Ummatte
Tamil	: Umattai
Telugu	: Ummaeththa
Malayalam	: Ummaththam
Marathi	: Dhatori
Gujarati	: Dhatura
Bengali	: Dhatura
Sanskrit	: Datura (i)Properties, Varieties and Uses

The dried and flowering tops of Dhatura Alba Fatuosa and DhaturaTalula. Dhatura is an emetic, antispasmodic, anodyne, narcotic. It is chiefly used for relief of asthma. Seeds are used by poisoners in sweetmeat or hooka. The varieties of Dhatura are white, black and purple. The flowers are white, black and purple. In overdoses, Dhatura acts as a powder narcotic poison.

Dhatura is a substitute for Belladonna in the treatment of cataract and other diseases of the eye. It dilates the pupil. The leaves and flowers contain alkaloids, mostly hyoscyamine, a lit-tle of atropine and hyoscine. The total alkaloids are sometimes called daturine.

In the allopathic system there are three preparations, viz., 1. Extractum Stramonii Liquidium (dose $\frac{1}{2}$ to 3 minims); 2. Extractum Stramonii Siccum (dose: $\frac{1}{4}$, to 1 grain); and 3. Tr. Stramonii (dose: 5 to 30 minims).

Stramonium has the usual belladonna action but is more commonly used as anti-spasmodic in bronchial asthma by in-halation (powdered leaves) as well as orally (extract or tinc-ture). The tincture generally produces all the sedative and narcotic effects of opium. It is very cheap also. It is better to commence with small doses of 10 drops and increase them to 20 or 30 drops according to circumstances. As a general rule 20 drops will be equal in effect to one grain of opium.

Dhatura produces dilatation of the pupil. The eye should therefore be examined when this remedy is being adminis-tered. If the pupil is found very large and dilated, it should be stopped.

(ii) For Inhalation in Asthma

Re: Potassium nitrate	1 ounce
Dhatura leaves	1 ounce

Anisi

1 ounce

Fumes of 60 grains of the burnt powder are inhaled for bronchial asthma.

(iii) Dhatura Cigarette

Re: Dried Dhatura leaves 15 grains

Smoke in a pipe. The leaves can be made into cigarettes also. Useful in asthma and paroxysmal cough.

(iv) Dhatura Fomentation

Re: Dhatura leaves1 ounceBoiling water20 ouncesUseful in lumbago, pleurodynic or neuralgic pain in the chest and dysmenorrhoea or difficulty in
menstruation.

(v) Dhatura Poultice

Bruise the fresh leaves into a pulp with hot water and ap-ply this to painful joints. This is useful in lumbago also. The hot pulp can be mixed with a poultice of rice flour or wheat flour. In Guinea worm Dhatura poultice relieves the pain and hastens the expulsion of the worm.

(vi) Dhatura Liniment

Re: Dhatura seeds (powder)1 ounceGingily oil20 ouncesMacerate 10 days and strain. Useful in lumbago, pain in the chest, etc.

Warm the leaves and foment the swollen joints in rheuma-tism, swollen bones. The pain and swelling will subside.

47. DILL SEEDS

(ANETHI SOYAH)

English	: Dill Seed
Hindi	: Sowa
Kanarese	: Sabbasige
Tamil	: Chatha Kuppai
Telugu	: Shatakupi-vittulu
Malayalam	: Shepu
Marathi	: Chatakuppa
Gujarati	: Surva-nu-bi
Bengali	: Soolpha
Sanskrit	: Sthatapushpi
	(i) Description and the Uses

The dried fruit of Peucedanum Graveolens, Anetheum Sowa. It is cultivated all-throughout India and obtained from Middle and South of Europe. It is brown in colour and the smell is agreeable and aromatic.

The Allopathic preparations are (1) Aqua Anethi Concen-trate (dose: 5 to 15 minims or drops): (2) Aqua Anethi Distillata (dose: y2to 1 fluid ounce) and (3) Oil of Anethi or Oleum Anethi (dose: 1 to 3 minims).

Dill is carminative, deobstruent, diuretic, emmennagogue, stimulant, aromatic, stomachic. The leaf has antispasmodic property. Dill seed is obtainable in all bazaars. Dill is useful in headache, nasal catarrh, paralysis, pain in the anus, coryza. It increases the gastric fire and invigorates the appetite. It stimu-lates and strengthens the liver, lungs and stomach. 1 to 3 drops of Oil of Dill can be given to children with sugar for flatulence, indigestion and colic.

(ii) Dill Water

Re: Dill seeds bruised4 drachmsBoiling water10 ounces

Infuse for y2 hour and strain. Dose: 1 to 4 teaspoonfuls. For children give two teaspoonfuls sweetened with a little sugar. Useful in flatulence or wind in the stomach and bowels, gastritis, abdominal pain or colic, and colic in children. The effi-cacy is much increased by the addition of a teaspoonful of lime water Dill water is a good carminative for children and covers well the taste of sodium salts.

(iii) Dill and Lime Water

Re: Dill water2 ouncesLime water2 ouncesDose: 1 or 2 tablespoonfuls. Useful in abdominal pain or intestinal colic and flatulence.

(iv) D.L.A. Water

Re: Dill water	2 ounces
Lime water	2 ounces
Anisi Water	2 ounces
Syrup of orange	2 ounces

Dose: 2 tablespoonfuls. Useful in flatulence and colic of children. This is a famous recipe or prescription for children.

(v) Dill Flower Decoction

Re: Dill flower1 ounceWater10 ouncesBoil for 20 minutes. Strain. Dose: 1 teaspoonful; twice daily. Useful in flatulence, indigestion and colic.

(vi) For Confinement Women

Re: Dill leaves1 ounceBoiling water10 ouncesInfuse for 1 hour. Useful for confinement women. This will help the free flow of uterinedischarge.

(vii) Dill Leaf Poultice

Apply any oil to the leaves. Fry them a little bit over gentle fire and apply them to boils, abscesses, and swellings. This will hasten suppuration and bursting.

(viii) Dill Leaf Powder

Re: Dry Dill leaf powder1 ounceSugar1 ounce

Mix together. Dose: 1 teaspoonful thrice daily. Useful in cough, headache, cold in the head, earache, indigestion, co-ryza, piles, etc. The leaf should not be given to pregnant women as it will induce abortion.

(ix) Dill Juice

Re: Juice of the leaf	2 ounces
Honey	½ ounce

Dose: 20 drops every 4 hours. Useful in flatulence, fits and colic of children: serviceable in epilepsy also. The juice can also be applied to the body. The juice can be mixed with a little Golochan or Gorochanai. Gorochanai is a panacea or cure-all for all diseases of children. It renders the action of dill juice more efficacious.

48. DRIED GINGER

English	: Dried Ginger
Hindi	; Sonth
Kanarese	: Ona Shunti or Sunti
Tamil	: Chukku
Telugu	: Sonti
Malayalam	: Sunt
Marathi	: Chukku
Gujarati	: Adu
Bengali	: Sonth
Sanskrit	: Nagaram
	(i) Aromatic, Stimulant and Carminative

It is the dried root of zingiber officinale. It is a strong aro-matic stimulant, somachic and craminative. It has an agreeable odour and pungent taste.2

(ii) Uses and Preparations

It is useful in lumbago, indigestion, sour belching, nasal catarrh, flatulence, nausea or retching, intestinal colic, etc.

Put one or two pinch of powder of dried ginger in hot milk and take. This will remove all rheumatic pains.

Make a paste of this powder with water, heat it and apply to the head. It will relieve headache. Apply it to rheumatic swell-ing of joints. The swelling and pain will subside.

Sonth enters into the composition of Soubhagya Sonti Lehiam or confection, Kandathri Lehiam, Sonti Choorna or di-gestive powder,

Infusion of ginger is useful in flatulence and colic. Put one ounce of Sonth in one pint or 20 ounces of boiling water. Infuse for one hour and strain. Dose: two tablespoonfuls.

You can make a plaster of Sonth. Take one ounce of gin-ger powder. Add sufficient water just to make it a plaster. Put it on a piece of lint or cloth and apply to the head. This is useful in headache.

Take Sonth 10 grains. Ajawan 30 gr. Cardamom powder 30 gr. Take one powder after food, twice daily. This is very use-ful in dyspepsia or indigestion, flatulence and intestinal colic.

CHAPTER XVI

EDIBLE HIBISCUS, ESSENCE OF GINGER, FENUGREEK

49. EDIBLE HIBISCUS

(LADY'S FINGER)

English

: Edible Hibiscus

Hindi	: Bhindi, Ram Turai
Kanarese	: Bende
Tamil	: Vendaikkai
Telugu	: Bendakaya
Malayalam	: Venda
Marathi	: Bhenda
Gujarati	: Bhindu
Bengali	: Dheras, Dhenras, Ram-torai
Sanskrit	: Golihwaka

(I) Description, Properties and Uses

Edible Hibiscus is also known by the names Abelmoschus or Okra. This is a vegetable cultivated throughout India. It is re-frigerant aphrodisiac, demulcent, diuretic and emollient. There is an abundant, bland, viscid mucilage in this vegetable which possesses valuable emollient and demulcent properties. The dried fruit may be used where it is not obtainable in a fresh state. It is useful in cough, dysuria or difficulty in passing urine with burning pain, dysentery, gonorrhoea.

(ii) Lady's Finger Decoction

Re: Fresh Vegetable cut
transversely3 ouncesWater20 ounces

Boil for 20 minutes and strain. Add sugar to taste. This can be taken as an ordinary drink. For fevers, cough, irritable state of the bladder and kidneys, gonorrhoea with difficulty in pass-ing urine and scalding pain, dysentery. The urine increases in quantity. In chronic dysentery the mucilage is highly beneficient.

The inhalation of the vapour of the hot decotion is useful in cough, hoarseness and dry and irritable states of the throat, sores in the throat. The fresh vegetable or leaf of the plant bruised is an efficient emollient poultice for boils, wounds, swelling etc.

50. ESSENCE OF GINGER

Its Colour and Its Uses

This is strong tincture of ginger, Tinctura Zingiberis Fortier. This is of a bright, slightly yellowish colour. It increases the ap-petite and stimulates digestion. It is a stomachic tonic. It is use-ful in diarrhoea, flatulence or wind in the stomach and bowels and intestinal colic. Does: 5 to 20 drops for an adult. 1 to 5 drops for a child, one year old.

51. FENUGREEK

(TRIGONELLA FOENUM)

English Hindi Kanarese Tamil Telugu Malayalam Marathi Gujarati Bengali	: Fenugreek : Methi : Menthe Gida : Vendayam : Menthuiu : Venthayam, Uluva : Methi : Methi : Methi
Bengali	: Methi
Sanskrit	: Methi, Methika

(i) Description and the Uses

This is a of edible leaf. It is grown all over India. The leaf is refrigerant and laxative. The seed is diuretic, carmina-tive, demulcent, aphrodisiac, emmenagogue, emollient and as-tringent.

(ii) Methi Leaf

The leaf is useful in flatulence or wind in the stomach and bowels, dyspepsia or indigestion, bronchitis, anorexia or dis-taste for food. The leaf can be used as a poultice for swellings, burns and scalds. Make a paste of the leaf, heat it and apply to the swollen part and burns and scalds.

Boil the leaves. Fry them slightly with a little ghee. Add a little cumin seeds and black pepper and salt and eat. It will re-move rheumatic pain in the back and waist (lumbago) and other parts of the body.

(iii) Confection of Leaf

Re: Fenugreek leaves	8 ounces
Almonds	2 ounces
Pepper seeds	1 ounce
Fine Ravva (semolina)	4 ounces
Ghee	4 ounces
Milk	4 ounces
Sugar	8 ounces

Boil the leaves. Prepare the confection just as you pre-pare Halwa. Dose: 2 teaspoonfuls in the morning. It will give you strength, Pushti and beauty.

Boil the leaves. Add honey and rub them well. Eat it. You will have good motion. It will clean the bowels, remove chest pain, cough, piles and heal ulcers in the bowels.

(iv) Methi Decoction

Re: Methi leaves	1 ounce
Ripe figs	1 ounce
Resins	1 ounce
Water	10 ounces

Boil for 10 minutes and strain. Add a little honey. Dose: 2 ounces three times daily. Useful in pain in the chest and dyspnoea or difficulty of breathing.

(v) Methi Seeds

Methi seeds are useful in diarrhoea, dysentery with mu-cus and blood, excessive heat in the body, excessive thirst, cough, consumption, gonorrhoea, body-consuming fever in children (Kanai). Soak half a teaspoonful of the seeds in quar-ter of a seer of curd. This is useful in dysentery. The seed pro-tects the mucous membrane of the intestines from irritation on account of its demulcent properties. Methi Iddali (Madrasi prep-aration) is also useful in dysentery.

(vi)Methi Laddu

Methi Laddu Methi Laddus are useful in rheumatism, lumbago, etc. Methi Laddu is prepared out of Methi seeds, sugar, ghee and Ravva (wheat).

(vii) Methi Seeds with Rice

Take equal parts of Methi seeds, mustard, turmeric and asafoetida. Fry them in a pan with a little ghee. Powder them. Put the powder in the rice and eat. This is useful in pain in the stomach and bowels, flatulence or wind in the bowels, enlarge-ment or congestion of the liver.

(viii) Methi Soup or Kuzhambhu

Take a few dried chillies, mustard, Methi seeds, Tur-ki dhall, asafoetida, sweet nim leaves. Fry them in a pan with a lit-tle ghee. Pour over this tamarind water. Add salt. Cover this with a vessel. Boil down to half. This can be taken with rice. This is useful in rheumatic pain all over the body. This is a sto-machic, digestive and appetizer.

CHAPTER XVII

FOUR O'CLOCK FLOWER, FRESH GINGER, GALANGAL

52. FOUR O'CLOCK FLOWER

(MIRABILIS JALAPA)

: Four o' Clock Flower : Gule-aabbas

English Hindi

: Andimalli
: Madhyana mallige
: Chandrakanta
: Antimantaram
: Sandhya-raga

(i) Derivation of the Name

This is cultivated in India in the gardens. It gives beauty to the gardens. It blossoms in the evening after 3 or 4 o'clock. Hence the significant name Andhimalli, four o'clock flower. The flower is white. There are the red and yellow varieties also.

(ii) The Leaf a Deobstruent, the Root a Laxative

The leaf is a deobstruent, or resolvent. It reduces swelling. The root is laxative and a nutrient.

(iii) Preparations and Uses

The leaves are warmed, smeared with castor oil and then applied to swellings. The swellings subside; or the suppuration or ripening is hastened. The juice of the leaf is useful in itch or scabies. It can be applied to the affected parts. A paste of the leaf heals wounds. A paste of the root is useful in contusion as an external applica-tion.

Make a paste with a little milk, mix it in milk and drink. This will remove constipation.

Fry the root with a little ghee and eat. This will give you strength and vigour.

53. FRESH GINGER

English	: Fresh ginger
Hindi	: Adrakh
Kanarese	: Hose Shunti
Tamil	: Ingi
Telugu	: Allamu
Marati	: Ala
Bengali	: Ada
	: Ardhrakam

Sanskrit

This contains a volatile oil which gives the flavour, gingerol which gives the pungent taste and some resins and allied sub-stances.

(i) Ginger with Milk

Make thin slices of ginger after removing the skin and put them in milk when it is heated. This will give good flavour to the milk and remove rheumatic pains, dyspepsia, wind, etc.

(ii) Ginger Juice Preparation

Mix equal parts of fresh ginger juice, fresh lemon juice and honey. Take 2 or 3 tablespoonfuls in the early morning in empty stomach. This will remove dyspepsia or biliousness, purify the blood, stop bleeding from the gums and stimulate digestion.

(iii) Allopaths and Ginger Preparations

Allopaths prepare strong tincture of ginger, weak tincture of ginger and syrup of ginger (Syrupus Zingiberis) from ginger. Put in a vessel some fresh ginger slices, some coriander seeds, some cumin seeds and some resins. Pour half a seer of water. Boil and reduce it to a quarter of a seer. Strain. Add some sugarcandy to taste. Drink this. This is useful in biliousness and dyspepsia.

(iv) Kitchen & Some Common Uses of Ginger

Fresh ginger is always added in Sojee Dosais, Vadais, Patchadie, Adais, etc., as it has stomachic and carminative properties.

54. GALANGAL

(ALPINIA GALANGA)

English	: Java Galangal
Hindi	: Saphed-Panaki-Jhael
Kanarese	: Rasmi
Tamil	: Arattai
Telugu	: Sanna-rashtramu
Malayalam	: Aratha
Marathi	: Kosht-Kulinjan
Bengali	: Sugandhavacha
Sanskrit	: Rasna
	(i) Its Two Varieties and Its Uses

There are two varieties, namely, Galangal the lesser (Chittaratai) and Galangal the greater (Perarattai). This is culti-vated in the hottest parts of India. Galangal is an expectorant, febrifuge and a stomachic. Galangal is useful in cough with sputum, asthma, bronchitis, eczema, chest pain, piles, swell-ing, dental neuralgia or tooth-pain, vomiting, biliousness, wind or flatulence, headache and fever. It increases the appetite.

(ii) Galangal PowderRe: Galangal powder Honey20 grainsHoney2 teaspoonfuls(iii) Galangal InfusionRe: Galangal powder2 teaspoonfulsBoiling water20 ounces

Pour the water over the powder that is kept in a vessel. Keep it for 2 hours. Strain. Dose: 2 tablespoonfuls twice daily. Add 2 tablespoonfuls of honey for a dose. The above powder and the infusion are useful in the above diseases.

Chew a small piece of Galangal. Bronchitis or cough and vomiting will be relieved. The sputum will be expelled easily. You can take a small piece of sugarcandy along with the piece of Galangal.

Burn a piece. Mix 2 or 3 grains of the ash with a little honey and human milk. This is useful in cough, vomiting and cold of children.

(iv) Galangal Decoction

Re: Liquorice powder	1 teaspoonful
Galangal (small) powder	1 teaspoonful
Talisapathra powder	1 teaspoonful
Long pepper powder	1 teaspoonful
Water	20 ounces
Doil for 20 minutos Doos 2 -	tablaanaanfula turiaa dai

Boil for 20 minutes. Dose: 2 tablespoonfuls twice daily. Add 2 teaspoonfuls of honey. Useful in bronchitis, cough, accu-mulation of sputum in the chest, fever, headache, cold in the head, etc.

Galangal (the great) is useful in rheumatism, biliousness, fever with cold, cough with sputum, cold in the head, menstrual disorder, Sannipath, and all kinds of poisons.

CHAPTER XVIII

GALLA. GARJAN OIL, GARLIC, GULANCHA

55. GALLS OR GALLA

English Hindi Tamil : Galls : Mazhufal, Kakra Singi : Masikkai, Kakata-Shingi

Telugu	: Kakara Shingi
Marathi	: Kakad Singi
Gujarati	: Kakad Singi
Bengali	: Kakra Singi
Sanskrit	: Karkata Shringi

(i) Description

Gall nut is the excrescence on Quercus Infectoria due to the puncture and deposit of eggs of Cynips Gallae Tinctoria. It contains 60 to 75 per cent of tannic acid and 2 to 5 per cent of gallic acid. It is obtainable in all bazaars. Gall is imported from Greece, Asia Minor, Syria and Persia. Dose: 10 to 20 grains.

(ii) Three Varieties and Many Uses

There are three varieties, viz., black, blue and white. Black and Blue varieties are the best. This is a powerful astringent. styptic, tonic and anti-periodic. Gall gives strength to the body and removes persistent, inner heat, "Kanaichoodu" of children (heat with wasting of body). Gall is an antidote to lime water, opium, aconite, copper sulphate.

The two allopathic preparations are: (1) Gall Ointment and (2) Gall and Opium Ointment. The Ointment of galls and opium is a reputed and a favourite application for piles or haemor-rhoids. This ointment relieves pain and stops bleeding.

Krakadaga Singhi (Tamil), Karkata Shringi (Sanskrit), Kakra Singi (Hindi), Pistacia Integerrima (Latin) are different names of the Galls (English). The galls contain 60 per cent of tannin and a little volatile oil. This is used in Ayurvedic and Yunani medicines.

Galls can be taken in the form of powder or infusion. A de-coction is better

(iii) Gall Decoction

Re: Galls (bruised)2 ouncesWater20 ounces or 1 r

Water 20 ounces or 1 pint Boil for 15 minutes and strain. Dose: 2 tablespoonfuls thrice daily. Useful in diarrhoea, internal haemorrage, dysen-tery, dyspepsia, cough and much sputum or bleeding, exces-sive perspiration. It is a beneficial astringent, gargle and application for piles, prolapsed or descent of rectum, and a useful injection for prolapse or descent of uterus or womb, gon-orrhoea. In children keep a pad saturated with the decoction over the external parts after the protruded bowel has been re-turned. Gall decoction can be used as a lotion for washing wounds in all parts of the body and ulcers in the nose, as an en-ema in diarrhoea, dysentery; for stopping bleeding in the nose. Plug the nose with a little cotton dipped in the lotion.

(iv) Compound Gall Powder

Re: Galls (powder)

10 grains

Cinnamon powder 5 grains One powder. Dose: One powder thrice daily. Useful in di-arrhoea.

(v) Compound Gall Pill

Re: Gall powder	5 grains
Cinnamon powder	5 grains
Opium powder	1/4 grains
Honey	q.s.

Make one pill. Dose: One pill twice daily. Useful in diar-rhoea. As soon as the motions stop, discontinue the pill. The pill should not be given to a child.

(vi) Gall and Ghee Ointment

Re: Gall powder2 drachmsGhee1 ounceMix well. Useful in piles. If there is intense pain, 30 grains of opium may be added. Instead ofGhee you can use Vaseline white or yellow.

(vii) Gall Gargle

Re: Alum	30 grains
Honey or glycerine	1 ounce
Decoction of galls	10 ounces
Useful in tonsillitis and sore throat; ulcer in the tongue and mouth.	

(viii) Plain Gall Powder

Re: Gall powder20 grainsSugar10 grains

Mix one powder. Dose: One powder thrice daily. Useful in gleet, vomiting of blood. bloody urine, menorrhagea or exces- sive menstruation, bleeding in piles, bleeding from nose, chronic or long-standing gonorrhoea. This will check the dis-charge. This is also beneficial in leucorrhoea or whites and other vaginal discharges of women. The decoction may also be injected. Then the treatment is more effective.

(ix) Gall Snuff

Re: Gall powder (fine) 1 ounce Use this as snuff for coryza or old standing nasal catarrh with bleeding from the nose.

(x) Gall and Benzoin Ointment

Re: Gall powder

1 drachms

Benzoin powder (Sambrani)	1 drachms
Opium	20 grains
White Vaseline	1 ounce

Useful in piles or haemorrhoids.

In poisoning by nux vomica, Datura, opium and aconite, give an emetic and then give a decoction of galls 4 ounces ev-ery 15 minutes for 5 times. This will serve the purpose of an effective antidote.

(xi) For Intermittent Fever

Re: Gall powder20 grainsSugar20 grainsOne powder. Dose: One powder 3 times daily.

(xii) Gall and Chiretta

Re: Gall powder10 grainsInfusion of Chiretta1 ounceOne dose. Repeat this every hour four times before the period at which the fever usually
returns. Useful in intermittent fever.

(xiii) Tannic Acid

This is a kind of salt obtained from galls. It is a styptic and astringent. This is a pale, brownish powder. It is also known by the name Tannin. Tannic acid glycerine, tannic acid suppository for introducing into the rectum in diarrhoea, etc., tannic acid lozenges, are all prepared from tannic acid.

Tannic acid glycerine is applied to the throat and tonsils in inflammatory conditions. A solution of tannic acid (3%) is useful in burns. It should not be used on the face. Whenever you are exposed to the risk of injury by fire, keep a tin of tannic acid oint-ment

(xiv) Tannic Acid Ointment

Re: Tannic acid Vaseline 1 drachm 1 ounce

56 GARJAN OIL

(WOOD OIL)

Hindi Bengali : Garjan-ka-tel : Garjion-tel (i) Characteristics & Effective Uses The balsamic exudation from disperocarpus turbinatus of laevis. It is an oleo-resin or balsam. It is a transparent liquid of the consistence of olive oil of a dark-brown sherry colour. It has an odour and taste like that of copaiba but less powerful. It is a good demulcent. It acts on the mucous membrane of the bron-chial tubes like copaiba.

It has been used as a substitute for copaiba in the treat-ment of gonorrhoea. It is a remedy of great value in this dis-ease. It is most useful in the advanced stages of gonorrhoea or gleet. It is useful also in leucorrhoea and other vaginal dis-charges. Dose: A teaspoonful two or three times a day. It is given floating on omum or other aromatic water or made into an emulsion with lime water or mucilage.

(ii) Garjan Oil Emulsion—I

Re: Garjan oil1 drachmMucilageq.s.Aqua1 ounceDose: 1 ounce twice d ally after food. Useful in gonorrhoea and gleet. This acts like paiba.

(iii) Garjan Oil Emulsion—II

Re: Garjan oil	1 drachm
Mucilage	q.s.
Lime water	4 drachm
Water	1 ounce
One dose. To be taken twi	ce daily after food. Useful in lep-rosy. Garjan oil is used externally in
the form of ointment.	

(iv) Garjan Oil Ointment

Re: Garjan oil1 partLime water3 partsUseful in leprosy. Rub the body thoroughly and perseveringly for 2 hours.

57.GARLIC

(LATIN: ALLIUM SATIVUM)

English	: Garlic
Hindi	: Lasan
Kanarese	: Bellulli
Tamil	: Vellulli, Vellaipoondu, Poondu
Telugu	: Vellulli, Thella-gadda
Malayalam	: Vellulli
Marathi	: Lasun
Gujarati	: Lasan
Bengali	: Rasun
Sanskrit	: Lasuna

(i) Properties of Garlic

Garlic is more pungent than chillies. It is a root. Properties: Carminative, stomachic, tonic, alterative. stimulant, expecto-rant, diuretic and anthelmetic. It expels wind from the bowels, invigorates the stomach, tones the system, expels sputum readily by liquifying it, increases the secretion and flow of urine and kills thread and round worms in the bowels.

(ii) Uses of Garlic

It is useful in deafness, ear-ache, chronic bronchitis, asthma, consumption, shock or collapse, dysentery, piles, fe-ver, debility, etc. Garlic is used externally as a counter-irritant, and rubefacient. Make a paste of garlic with a little water and apply to small boils, chronic inflammation, and swelling. The boils and swellings will be resolved.

Garlic contains an essential oil, Oleum Allii, which is a po-tent antiseptic. Allyl Sulphide (1 to 2 drops) is given in foeted bronchitis and consumption cavity. It is used as a lotion for washing infected wounds and foul ulcers. Garlic juice one part with water 8 parts makes a good antiseptic lotion.

Garlic juice is useful in Pneumonia. Give 30 drops of juice thrice daily. It is serviceable in whooping cough. It reduces blood pressure in an effective manner. It is beneficial in atonic dyspepsia, wind in the bowels and intestinal colic. Give a tea-spoonful of the juice every four hours in early cases of typhoid. The attack will be checked.

Garlic rasam, a preparation like pepper water relieves all sorts of rheumatic pain, lumbago, etc. Garlic confection is taken by women after a delivery. It is a tonic for them.

The juice is useful in sprain and contusion. It should be applied to the affected parts.

A little juice of garlic poured in the ear removes temporary deafness and earache.

(iii) Ear Drops

Re: Garlic1 drachmNim-leaves1 drachm

Mustard oil (or sessamum oil) 2 ounces

Heat the mixture till the garlic and nim leaves become black. Strain. This is useful in earache, discharge from the ears, etc.

(iv) Dysentery Confection

Re: Boiled garlic1 ounceGhee1 ounceBlack sugar1 ounceMix well. Dose: One teaspoonful twice or thrice daily. Use-ful in dysentery.

(v) Liniment

Re: Garlic1 ounceMustard oil (or Cocoanut oil)8 ouncesBoil well. This is useful as an external application in rheu-matism, itching, etc. The juice is usefulin elongation of the uvula. Apply it with a cotton swab. It is useful in diphtheria too. Give 20 or 30drops of the juice, twice or thrice daily. This is useful in bronchitis and worms in the bowels.Instead of juice you can give a decoction of garlic.

(vi) Garlic Decoction

Re: Garlic1 drachmWater8 ouncesBoil for 10 minutes. Dose: One teaspoonful thrice daily. Garlic may be boiled in milk also.

58. GULANCHA

(TINOSPORA CORDIFOLIA)

English	: Heart-leared moonseed
Hindi	: Gulancha, Gulbel
Kanarese	: Amritavalli
Tamil	: Shindikodi, Amritavalli
Telugu	: Tippa-tiga, Gaduchi
Malayalam	: Amruta, Chitramruta
Marathi	: Gula-veli
Gujarati	: Gul-vel
Bengali	: Gulancha
Sanskrit	: Guduchi

(i) Description

This twining shrub is common in most parts of India. The root and stems are the parts used in medicine. They should be collected in the hot season when the bitter principle is most abundant and concentrated. It is obtainable in most bazaars. It is found in abundance in Western India, Burma, Ceylon. The bitter principle is known by the name berberine.

Tincture Tinosporoe. Dose: 30 to 60 minims or drops.

(ii) Beneficial Effects of Tinosporoe

Tinosporoe is a bitter tonic without tannin. It is a good sub-stitute for calumba. It is an antiperiodic. It may be used with iron and quinine during convalescence from malaria. It is a diuretic, alterative, antiperiodic, aphrodisiac, demulcent, hepatic, stimulant, stomachic. Gulancha is a very useful tonic. It is best given in infusion.

(iii) Gulancha Compound Infusion

Re: Gulancha bruised	1 drachm
Coriander	1 drachm
Liquorice	1 drachm
Anisi	1 drachm
Boiling water	10 ounces

Infuse for 1 hour and strain. Dose: 1 ounce twice daily. Useful in intermittent fever, dyspepsia, flatulence, debility after fevers, heat in the stomach, chronic rheumatism and paralysis.

Gulancha oil. Gulancha ghee are made out of this drug: The leaf is a good medicine for ulcers. Show the leaf over a gentle fire then apply it over the ulcer and then bandage. The ulcer will heal up quickly.

(iv) Sat-Gilo or Giloka-sat

This is an extract of Gulancha. It is a white powder ob-tained by powdering the stem and extracting the starch with water. It is held in high repute in intermittent fever. Dose: 1 to 3 drachms with milk and sugar. It is a tonic in debility after fever, in spleen affections, enlargement of spleen etc. It is an efficient remedy in diseases of the bladder, particularly in chronic in-flammation of the bladder. It is useful in Jaundice, cough, faint-ing, vomiting, accumulation of phlegm or sputum in the respiratory tubes.

(v) Gulancha Infusion

Re: Gulancha bruised2 ouncesCold water20 ouncesInfuse for 4 hours and strain. Dose: 1 ounce thrice daily. This is a tonic. This is useful in
dyspepsia after fevers, in mild forms of intermittent fevers, in constitutional debility and loss of
appetite after these and other fevers. It is useful in chronic rheumatism also. Gulancha is
rendered more agreeable by the addition of cinnamon, cloves or other aromatics.

(vi) Gulancha Decoction

Re: Gulancha	1 drachm
Cloves	1 drachm
Cinnamon	1 drachm
Water	20 ounces

Boil till decoction is reduced to 10 ounces. Dose: 1 ounce thrice daily. A tonic after fever; useful in dyspepsia. Gulancha can be combined with Chiretta.

(vii) Gulancha-Chiretta Decoction

Re: Gulancha	1 drachm
Chiretta	1 drachm
Dried Ginger	1 drachm
Cloves	1 drachm

Cardamom 1 drachm Water 1 drachm Boil down to half. Dose: 1 ounce thrice daily. A tonic after fever.

CHAPTER XIX

HOLY BASIL, HONEY, INDIAN ACALYPHA

59. HOLY BASIL

English	: Holy Basil
Hindi, Kanarese, Tamil, Telugu	
Malayalam,Gujarati, Sanskrit	: Tulasi

Marathi	: Chojharr
Bengali	: Krishna Tulasi

(i) Religion and Holy Basil

Every Hindu keeps this plant in his house. A special altar is consecrated for the purpose. Daily worship is offered. It is adored as a Goddess. The leaf is offered to Lord Hari, Lord Rama, Lord Krishna during worship. Food that is prepared in the house is first offered to Tulasi.

Binda, wife of Sankhachuda was favoured by Lord Krishna and transferred into this herb. Tulasi Jayanti is cele-brated on Sukla Dwadasi in the month of Kartik (Tamil: Appasi) October-November. Every Sukla Dwadasi is very famous for Tulasi worship.

Holy Basil is a well-known small herb in India, about 1-3 feet long. It is found in most of the gardens. It is cultivated for its medicinal value and worship in Hindu temples, especially by the Vaishnavites.

(ii) The Black and the White

There are two important varieties. One is black and the other white. The black variety is most efficacious medicinally. There are the red and blue varieties also. The other varieties are Mul-Tulasi, Kal-Tulasi, Tiruneetu Pacchai. The white vari-ety is called Siva Tulasi also. The blck one is called Krishna Tulasi. Tiruneetu Pacchai is also called Vibhuti Pachalai or Ramatulasi. In Hindi it is called Sabja.

(iii) Properties of Leaves

The leaves posses stimulant, expectorant, aromatic, car-minative, antifebric, anti-periodic and diaphoretic properties. The seed is a demulcent. The whole Tulasi plant is used for medicinal purposes but the leaves are generally used.

(iv) The Uses of Leaves

The leaf checks the formation of sputum in the respiratory passages. It is beneficial in bronchitis, pneumonia, whooping cough, influenza, consumption and Asthma. It is beneficial in every disease where there is excess of sputum. The powder of dry leaves is used as snuff in ozaena for destroying maggots. Like eucalyptus, Tulasi drives away all mosquitoes. It is advisable to keep Tulasi plant in front of the houses and back-yards. If body is covered with leaves, mosquitoes will not bite.

(v) Insect-bite and Tulasi

Tulasi is useful in all kinds of insect bites. In snake bite it is very efficacious. Rub the bitten part well with the juice of Tulasi. It may be repeated. Internally give two teaspoonfuls of the juice. Apply the leaves as poultice to the part.

Tulasi tea is very useful in fever and cold. You can add milk also to this tea.

(vi) The Tea, the Oil, the Seeds

This tea can be given to children when they suffer from fe-ver and cough with sputum; or the juice of fresh leaves can be given. The juice can be mixed with a little honey or breast milk. If it is given with an equal quantity of fresh ginger juice the effect is more marked. The powder of a little pepper and long pepper may also be added.

The leaves are rubbed with the lime juice over ringworm.

The medicated oil (Tulasi leaves boiled with gingerly oil) is used as drops in ear-ache and in the discharge of pus in the ears. It is put into the nose in ozaena.

The seeds are mucilaginous. They are used as a diuretic in scanty urine and cough.

Tulasi is useful in scorpion bite, constipation, remittent and intermittent fevers.

In Malaya people strew the leaves over the graves of their dead persons for the peace and benefit of departed souls.

60. HONEY

(MEL DEPURATUM)

English	: Honey
Hindi	: Shahad
Kanarese	: Jenu, Jenutuppa
Tamil	: Taen
Telugu	: Taene
Malayalam	: Taen
Marathi	: Madh
Gujarati	: Madha
Bengali	: Modha
Sanskrit	: Madhu

(i) Value of Honey for Medicine Chest

Always keep some honey in your domestic medicine chest. It is an agreeable sweetening ingredient for mixtures. It is a good vehicle in which to administer powders for children, and Bhasma or metallic oxides like Makaradwaja, Vasanta Kusumakara, etc. Pills can be made with the aid of honey.

Mel Depuratum is purified honey. Commercial honey is heated in water bath and while still hot, is strained through warm flannel. This is the way to purify honey.

(ii) Glucose and Laevulose in Honey

It contains mainly glucose and laevulose. It has a charac-teristic odour with a sweet and faintly acid taste.

Honey has got the nutritive value of sugars and is an arti-cle of diet with certain people. It is prescribed for its soothing and flavouring properties. It makes good cough linctus. It is a laxative and is given to children for this purpose. It relieves dry-ness of the mouth and facilitates swallowing.

Honey contains 70 per cent of dextrose and laevulose also wax, dextrin, volatile oil and pollen.

(iii) Mel Borax

Re: Powder borax10 partsPurified honey90 parts

Useful in ulcers in mouth, tongue, and nipples of nursing mother. This is a soothing, emollient and demulcent applica-tion.

(iv) Oxymel

70%
15%
15%

Dose: 30-120 minims or drops. This is a common ingredi-ent of cough mixtures. It is a very good expectorant. It brings out the sputum easily.

(v) The Morning Drink

2 tablespoonfuls of honey with 2 tablespoonfuls of lemon juice and 1 ounce of water is a beautiful drink in the early morn-ing. This is anti-bilious, and anti-scorbutic. It is useful in spongy gums, impure blood and skin diseases.

(vi) A Substitute for Sugar and Useful in Burns

Honey is a substitute for sugar in diabetes. Honey and milk is a very good combination. This supplies much energy and vigour. Honey is useful in burns and scalds. It is a soothing application. It will prevent the formation of blebs if applied in time.

Re: Yellow wax 1 ounce

Clarified honey 4 ounce

Melt these together with the help of gentle heat and strain. This is a beneficial stimulant application for indolent and other ulcers. This is admirably adapted for use in hot climates, where animal fats, the basis of so many ointments soon become ran-cid and unfit for medicinal use.

61. INDIAN ACALYPHA

(CAT'S CHARM) (See article No. 70 Kuppameni)

English	: Indian Acalypha
Hindi	: Cuppi, Khokali
Kanarese	: Kuppi gida, chilmari, Kuppi
Tamil	: Kuppai Meni
Telugu	: Kuppi-chettu, Harita Manjiri
Malayalam	: Kuppa Mani
Marathi	: Khokli
Gujarati	: Venehi Kanto
Bengali	: Muktajhuri, Muktabarsi
Sanskrit	: Aritta Manjarie

(i) Description

The cat is supposed to be very fond of this plant. Hence the name cat's charm. This is known also by the name "Marjara Mohini". This shrub is commonly found in India. It mostly grows in the waste or deserted places throughout the plains of India. It is one foot in height.

(ii) Its Properties and Medicinal Purposes

It is an anodyne (pain reliever), anthelmintic (killer of worms in the bowels), cathartic, diuretic (increases the flow of urine), emetic (causes vomiting), expectorant (liquifies and brings out sputum easily) and emmenagouge (brings out menstrual fluid). The root, leaves, young shoots and whole plant are used for medicinal purposes. Especially the leaves are used for medici-nal purpose. Its flowers are small and of a yellowish colour. The fruit also is small.

(iii) Beneficial in Chronic Bronchitis

Acalypha Indica contains an alkaloid or active principle, acalyphine. It is highly beneficial in consumption and chronic bronchitis. The fresh juice of the leaves, the decoction of the leaves and the powder of the leaves may be given internally. Dose of the juice /2 to 1 teaspoonful. Acalypha acts like senega in its expectorant property. It is particularly useful in the Bronchitis or cough of children.

(iv) Juice of the Leaves: An Emetic

The juice of the leaves is a good emetic for children. It is quite safe. It is certain in its action. Its action is speedy too. It acts like Ipecac. It has no depressing action. It brings out the sputum easily by liquifying it. The dose of the juice for an infant is a teaspoonful.

(v) Powder Useful in Cough

The powder of the dried leaves (weight of 15 jeguirdy seeds, Kundrumani) is useful in cough, excessive sputum. The powder of the dried leaves expels worms in the bowels in chil-dren. You can give a decoction or infusion of the leaves and a little garlic.

(vi) Uses of the Juice and the Decoction

The juice of the leaves or decoction 1 to 4 teaspoonfuls will produce good evacuation of the bowels in children. There will be no exhaustion. All the worms in the bowels and sputum will be expelled. Cough also will be relieved. The decoction of the leaves is a safe, speedy and sure laxative and emetic like senega or Ipeacac. It is useful in consumption, croup, asthma and bronchitis of children. The suppository of bruised leaves relieves constipation of children.

The decoction of the root acts as a purgative. Prepare a decoction of the leaves, add a little salt. This is useful in constipation.

Make a paste of the leaves. Add a little turmeric also. This is useful as an application in syphilitic ulcers, stings of poisonous insects, poisonous bites etc.

The juice can be applied to the head for relieving headache. The powder of the dry leaves is useful in bed sores. The maggots will die.

The juice from fresh leaves is useful in scabies and other skin diseases. The juice is mixed with lime and onion and ap-plied to rheumatic swollen joints and boils. It is a good, stimulat-ing application. This can be applied externally around the ears in earache. Take the juice. Add equal parts of gingelly oil. Boil well. This is a useful liniment for rheumatism.

(vii) Paste of the Leaves

Make a paste of the leaves. Add salt. This is useful in sca-bies or itch.

CHAPTER XX

INDIAN PARSELANE, INDIAN PENNYWORT I & II, ISAFGUL

62. INDIAN PARSELANE

(ARTULACEA OLERACEA)

English Hindi Kanarese Tamil Telugu Malayalam Marathi Gujarati Bengali Sanskrit

- : Common Indian Parselane : Khursa : Duda Gorai : Paruppu Keerai : Pappu-Kura : Korichira : Bhuigholi : Loni : Baraloniya : Loni
 - (i) Description

This is a small herbal plant. The leaf, seed and the whole plant are used. This is a mild astringent, refrigerant, diuretic, demulcent and emollient. This is useful in biliousness, urinary diseases of the skin, syphilis and mucous dysentery.

(ii) Uses of the Juice and the Paste

The juice of the leaf, one or two tablespoonfuls twice daily, is useful in dysuria or difficulty in passing urine, burning in the urinary passage, and dysentery.

Apply a paste of this leaf to the forehead. Headache will be relieved.

Boil this leaf and eat. This is useful in diseases of the liver. Boil the leaf with turki dhall or green dhall and eat. This is a lax-ative. It will remove heat in the body and biliousness.

The paste of the leaf and seed is useful in burns, scalds and skin diseases.

Make a paste of a teaspoonful of the seed and dissolve it in cocoanut water. This is useful in dysentery, burning in the urine and gonorrhoea.

The stem of this plant is useful in sudamina or summer eruptions in the body, burning in the hands and feet. Make a paste of the stem and apply.

63. INDIAN PENNYWORT—I

(HYAROCOTYLE ASIATICA)

English	: Pennywort
Hindi	: Brahma Manduki, Khula-Kudi
Kanarese	: Vondelagi
Tamil	: Vallarai
Telugu	: Bokudu Chettu, Manduka,
	Manduka-Brahma, Kuradu
Malayalam	: Kudakam
Marathi	: Karivana
Gujarati	: Karbrahmi
Bengali	: Tholkuri or Thankuni
Sanskrit	: Brahmi, Mandukaparni

(i) A Very Precious Herb

This is a weed found near the banks of rivers and lakes all over India and in South Africa. This is a very precious herb. The • whole plant (particularly the leaves) is used for medicinal purpose. The entire plant consists of root, twigs, leaves and seeds. It is an alterative tonic, aperient, diuretic, stimulant, emmenagogue and local stimulant. That herb which increases the flow of urine is diuretic. That herb which increases the men-strual flow is an emmenagogue.

(ii) Uses of the Powder

Brahmi in the form of powder is useful in diarrhoea, dysen-tery, fever, hoarseness of voice due to consumption, elephanti-asis, orchitis, scrofula, leprosy, jaundice, chronic skin diseases, skin eruptions such as eczema, lupus psoriasis, ski eruptions, syphilis, gonorrhoea, dropsy, leucorrhoea, nervou debility and seminal weaknesses. Brahmi is a nervine and brain tonic. It increases memory and bestows long life.

(iii) The Brahmi Drink

A small quantity soaked in water over night and made into a paste with a few almonds, sugarcandy and milk—this could be taken as a first rate tonic and a cooling beverage, excellent for health and strength. It tones up the liver and eliminates all kinds of worms in the bowels. It is specially useful for nervous debility and invigorates and improves the brain.

(iv) The Juice and Powder

The juice and the powdered root are used. The dose of the juice is 2 tolas, powder of the leaves 5 to 10 grains, 3 times daily. Under its medication in the treatment of leprosy the appe-tite improves. The skin becomes soft. The thick skin is cast off.

It contains resin, gum, sugar, albuminous matter, sulphates, tannin and an oleoginous substance, vellarin, an ac-tive volatile principle. The leaves are dried in the shade. By drying in the shade no active principle is lost. The leaves are powdered and kept in well-stoppered bottle.

The powder can be made into an ointment with vaseline or butter. This is useful in eczema, leprosy, secondary syphillitic ulcers. It can be used as a dusting powder also.

(v) Decoction of the Entire Plant

A decoction of the entire plant is a very useful preparation. Put one ounce in 20 ounces of water. Boil for 20 minutes. Strain. Dose: 1 to 2 ounces. It is used in ozaena as a snuff.

(vi) The Paste and the Juice

Make a paste of the leaves and apply it to the navel in chil-dren. Dysentery and diarrhoea will be cured.

Mix one or two teaspoonfuls of the juice with cow's milk. It is useful in the skin diseases and impure blood of children and syphilis, fever, stomach troubles of adults.

The application of a paste of the leaves is highly useful in elephantiasis, swelling of testicles, rheumatic swellings, boils, contusion. You can apply the juice of the leaf also in these dis-eases.

Brahmi Ghrita is prepared from fresh Brahmi and pure cow's ghee. It is used as a nervine and brain tonic.

64. INDIAN PENNYWORT—II

(HYDRO-COTYLE AS IAT ICA)

(i) Pennywort Pills

Re: Indian pennywort leaves	2 drachms
Tulasi leaves (basil)	2 drachms
Pepper	2 drachms

Grind the three well and make into pills of the size of big pea. Dose: One pill to be taken twice daily, morning and eve-ning. Useful in all sorts of fevers.

(ii) Pennywort Poultice

Grind the leaves and make them into a paste. Useful in el-ephantiasis leg, swelling of testicles, rheumatic swellings, boils, contusion, etc. The juice of the leaves may be applied in the above diseases. Four or five drops of the juice may be given thrice daily in the fevers that accompany the above dis-eases.

(iii) For Diarrhoea of Children

Re: Pennywort leaves	4
Cumin seeds (jeera)	20 grains
Sugar	30 grains

Grind these well. One Dose: Twice daily. Useful in diar-rhoea and dysentery of children. Grind the leaves and apply the paste to the navel. This is also beneficial in the above diseases of children.

Vallarai oil and Vallarai Ghee are useful in Kanai (fever with wasting of body) in children.

(iv) Pennywort Co. Pills

Re: Pennywort whole plant	
powder	5 parts
Koshtam (costus root) powder	4 parts
Honey	6 parts
Make into pills the size of big pea.	Dose: One pill twice daily. Useful in nervous debility caused
by diseases of the lower belly.	

(v) Pennywort Decoction

Re: Pennywort whole plant	1 drachm
Myroballan	1 drachm
Adhadota (Vasaka)	1 drachm
Long pepper	1 drachm
Sweet flag	1 drachm
Water	20 ounces

Boil for 10 minutes; strain. Add honey 2 ounces. Dose: 1 ounce twice daily. Useful in laryngitis or hoarseness of throat that accompanies consumption.

(vi) Pennywort Leaves Powder

Re: Pennywortleaves (powder) 5 grains

Cow's milk 1/2 seer

Twice daily. This increases memory power and tones and strengthens the brain. This powder is useful in leprosy.

Separate the good fresh leaves. Spread them on a mat in the shade. Freely expose them to the air, but not to the sun. Do not use any heat, as this destroys all its virtues. When the leaves are thoroughly dried, powder them finely and keep the powder in a well corked or stoppered bottle. Dose: 3 to 5 grains three times daily.

The powder may also be sprinkled on the ulcers. Poultice made of the fresh leaves bruised into a paste may be applied. The patient improves very much in all respects in the course of a few weeks. Discontinue the medicine for a week if there is great itching of the skin over the whole body. Give a purgative and then continue the medicine. This is also useful in scrofula and syphillis.

This is highly beneficial in chronic ulcerations of syphilitic and scrofulous origin. It can be used internally and externally also. But it needs to be steadily persevered in.

(vii) For Leprosy

Re: Pennywort leaves 5 Pepper 5

Garlic 1 small piece Grind this well. Once daily. Useful in leprosy, leprotic ul-cers. Give the medicine from 20 to 40 days. The diet should be butter milk and rice.

(viii) Pennywort Co. Decoction

Re: Pennywort leaves	5
Methi seeds (Fenugreek)	20 grains
Water	10 ounces

10 ounces

Boil for 10 minutes and strain. Dose: 1 ounce twice daily. Useful in fever and abdominal diseases of children such as di-arrhoea, dysentery, etc.

(ix) Juice and Milk

Re: Juice of the leaves	1/2 teaspoonful
Liquorice powder	10 grains
Cow milk	8 ounces

Useful in the skin diseases of children, nervous diseases of children, impurities of blood in children, syphilis, abdominal diseases and fever of grown up persons.

(x) Pennywort Ointment

Re: Juice of the !eaves1 drachmBlack cumin seeds1 drachmGhee2 ouncesMix well. Apply to the boils. Useful in boils caused by im-pure blood or hot blood.

65_ ISAFGUL

The Latin name is Plantago ovate. It is a small seed. Dose: 1/2 to 2 drachms

(i) The Preparation

This is soaked in water. It becomes a mucilaginous sub-stance. This is mixed with sugar and drunk_ This is highly useful in irritative conditions in the stomach and intestines. It is very frequently prescribed in dysentery associated with painful grip-ing. The result is excellent. It is useful in bacillary and amoebic dysenteries.

(ii) For Dysentery and Diarrhoea

It is soaked in curd and taken in dysentery. It is a demul-cent. It protects the surface of the stomach and intestine from irritation. It is soothing and sedative (allays irritation and pain).

It is useful in diarrhoea and also in other inflammatory and functional derangements of digestive organs. The mucilage does not help the growth of bacteria. It forms a coating between the faces and the gut. It lines the membrane of the bowels.

Tablet Isafgul, 20 grains, is also available.

(iii) A Special Preparation

Isafgul seed powdered (1 drachm) is mixed with Indra Jat (Kurchi seed) 5 grains and taken in dysentery. This is a very good combination.

It also relieves painful stranguary of acute gonorrhoea. Two teaspoonfuls are given in 8 ounces of water. It is diuretic, i.e., increases the flow of urine and soothing. It is useful in cysti-tis or inflammation of the bladder.

Isafgul seed one drachm is mixed with 10 grains of Potas-sium Nitrate or in 10 grains of Cubebs and is taken in gonor-rhoea. Two or three powders can be taken daily.

CHAPTER XXI

JATAMANJI, KALADANA, KAMELA, KANDANG KATHRI

English Hindi Kanareso Tamil Telugu Malayalam Marathi Gujarati

66. JATAMANJI

(INDIAN SPIKENARD)

English	: Valerian root
Hindi	: Jatamashi
Kanarese	: Jatamavashi
Tamil	: Jatamanji
Telugu	: Jatamamshi
Malayalam	: Jatamanchi
Marathi	: Jatamayshi
Gujarati	: Jatamasi
Bengali	: Jatamansi
Sanskrit This is the root of Nardostechys Jatar	: Jatamansi manji. This is obtain-able in all bazaars.
· · · · · · · · · · · · · · · · · · ·	-,

(i) The Uses

It is a good stimulant, digestive, carminative, diuretic, ex-pectorant and a good antispasmodic and nervine tonic for hys-teria, chorea, convulsion and epilepsy. Jatamanji is useful in leprosy, old fever, internal heat, diarrhoea, diseases of the eye, asthma, dyspnoea or difficulty of breathing, rheumatism.

(ii) The Two Varieties

There are two varieties, viz., English and country. The English variety is found in Northern Asia, Northern Kashmir, Burma, Ceylon. The country variety is found in Himalayas, Kashmir, Bhutan. It has deep root. The root is covered towards its tapering extremity or almost entirely with coarse, dark hair-like fibres. The odour is peculiar and fragrant, The fresh root is sweet. The two varieties possess almost the same prop-erties. It is a good substitute for the official valerian. It is useful in hysterical affections, palpitation of the heart, chorea, flatu-lence, etc.

(iii) Infusion Jatarnanji

Re: Jatamanji bruised4 drachmsBoiling water20 ouncesInfuse for 1 hour and strainDose: 2 tablespoonfuls or 1 hour

Infuse for 1 hour and strain. Dose: 2 tablespoonfuls or 1 ounce three times daily. Useful in hysteria, nervousness, palpi-tation of heart and convulsion. Tincture of Jatamanji is available in the Bengal Chemical and Pharmaceutical Works, Calcutta. Dose is 1 to 2 drachms. It may be combined with Camphor, ammonia and potassium bro-mide.

(iv) Epilepsy-Hysteria Mixture

Re: Tr. of Jatamanji Tr. Valeria Potassium Bromide Spt. Ammonia Aromatics 1 drachm 15 minims 10 grains 10 minims Spt. Camphor10 minimsAqua1 ouncesMix. 1 ounce twice or thrice daily. Useful in hysteria, epi-lepsy, palpitation, convulsion, etc.

(v) Jatamanji Co. Powder

Re: Jatamanji powder5 grainsCamphor2 grainsCardamom5 grainsOne powder. Dose: One powder twice daily. Useful in hys-teria, epilepsy, palpitation of heart.The oil is given internally for the above diseases.

(vi) For Grey Hair

Re: Oil of Jatamanji

Apply it to the hair daily. The grey hairs will become black.

67. KALA-DANA

(PHARBITIS SEEDS)

English	: Pharbitis seeds
Hindi	: Kala-danah
Kanarese	: Gouribija
Tamil	: Kodi-kankatan-virai, Jiriki virai
Telugu	: Kolli-vittulu, Jiriki-vittulu
Marathi	: Nil-pushpi, Kala-dana
Gujarati	: Kala-dana
Bengali	: Nilkalmi

(i) Description and Uses

The dried seeds of Ipomoea hedercea, Pharbitis Nil. It is obtainable in all bazaars. This is a good laxative, purgative and anthelmintic. Dose: 30 to 45 grains in powder. It has the same action as Jalap. It is useful in chronic constipation and pain in the stomach or bowels. Kala-dana seeds are black, angular, a quarter of an inch or more in length. It has a sweetish and sub-sequently acrid taste. It contains powerful resins with action similar to Jalap. It is prescribed in generalised swelling of the body.

(ii) Purgative Power

Re: Kala-dana seeds powdered	1ounce
Rock salt or cream of tartar	1ounce
Dried ginger powder	1drachms

Rub these well in a mortar and pass the powder through a fine sieve. Dose: For adults, 1 or 1/2 teaspoonful (60 to 90 grains). A good purgative. Small thread-worms will come out.

(iii) Fever Powder

Re: Kala-dana seeds powdered10 grainsBlack pepper5 grainsDried ginger10 grainsAtis10 grains

One powder. Dose: One powder twice daily. Useful in fever.

68. KAMELA

(MONKEY FACE TREE)

English	: Indian Kamala
Hindi	: Kamala
Kanarese	: Vasare
Tamil	: Kamala
Telugu	: Kamela
Malayalam	: Kampillam
Marathi	: Shendri
Gujarati	: Kapilo
Bengali	: Kamela
Sanskrit	: Kampilla, Kambha

(i) Uses

The powder from the capsules of Mollotus Phillippiensis. It is cathartic, anthelmintic, aphrodisiac, lithontriptic. It is used as a dye. It is a beautiful red powder. It is useful in tapeworm, chronic skin disease and ringworm.

(ii) For Tapeworm etc.

Re: Kamela powder 2 drachms

Honey q.s.

Mix. One dose to be taken at bed time. Take one ounce of castor oil in the morning. Repeat after an interval of a week if the first dose is not successful. The worm is generally expelled in a lifeless state in the third or fourth stool.

(iii) For Ringworm, etc.

Re: Kamela powder1 ouncesGingily oil8 ouncesBoil. Apply morning and evening. Useful in itch, ringworm,

69. KANDANG KATHRI

(KALYANT) (Solanum Jacquini; Solanum Xanthocarpum)

English	: Wild eggs plant
Hindi	: Kateli, Bhatkatai
Kanarese	: Nella-gula
Tamil	: Kandang kathri
Telugu	: Nela Mulaka-vakudu
Malayalam	: Kantankaththiri
Marathi	: Bhuiringani
Gujarati	: Patharingami
Bengali	: Kantakari
Sanskrit	: Kanta-karika, Nideghhika (i) Uses

This is a small thorny plant, bitterish in taste. We can make a delicious dish out of this vegetable. It is a beneficial sto-machic. It aids digestion. Its nutritional value is very little. It is given even to feverish patients. The leaf, flower, unripe fruit, ripe fruit, seed, root and the whole plant is useful. It is useful in asthma, bronchitis, consumption, fever, dullness of digestive fire, rheumatism, paralysis, etc. It is an expectorant, diuretic and carminative. The seed is a drastic purgative.

(ii) Juice Boiled with Mustard Oil

Boil the juice of the leaf with mustard or sessamum oil. This is useful as a local application in headache, rheumatism and bad smell in arm-pit.

(iii) Juice Boiled with Linseed Oil

Boil the juice of the leaf with linseed oil. This is useful as an application in fissure foot.

(iv) Juice Boiled with Almond Oil

Boil the flower in almond oil. This is beneficial as a local application in piles.

(v) Seeds and the Fruit

Burn the seeds and allow the fume to come in contact with the teeth. Pain in the teeth will disappear.

Boil the fruit perfectly, churn it and strain the juice. Add one part of oil of Lauki seed (bottlegourd) to four parts of juice. Boil. Strain. This is useful in pain in the ear (otitis). Put a few drops of the oil into the ear and plug it with cotton.

CHAPTER XXII

KUPPAMENI, KURCHI, LAWSONIA ALBA, LEMON-GRASS OIL

70. KUPPAMENI

(i) Description

There are many indigenous drugs which will work won-ders and of which we are quite ignorant. They possess very many medicinal properties which are astonishing. One of the very commonest and very useful drug which grows in abun-dance everywhere is Acalypha Indica. It is a valuable laxative, Lagu Soanam. Its root is catharic (that which causes violent purge).

(ii) Therapeutic Uses

The juice of the fresh leaves is a reliable emetic and this is used in Croop (cough with guru guru). It can be used as varthi for a free motion to children. The varthi is to be made out of the leaves, i.e., the leaves are to be turned into a cigarette and to be inserted into the anus of the child. When the juice is used as Nasyam it relieves insanity_ Mix rock salt (Sendha Namak) with one teaspoonful of this juice and put it into the nose or ear of the patient. This possesses hypnotic effect. It cures snake-bite or insect poison. This was for a long time a Yogic secret.

The important thing to note is its effect on scorpion poi-sons. Apply the Juice of the leaves with Ananthavairava and Seetham surasa (both Ayurvedic preparations) and take three or four fresh leaves internally. You will have a radical cure.

71. KURCHI

(TELLICHEFRY BARK)

English	Tellichefry Bark
Hindi	Karva-indarjour
Kanarese	Korasingina-gida
Tamil	Kudasappalai, bitter Vetpalai
Telugu	Chedu-Kodisha
Malayalam	Kaipa-kotakappala
Marathi	Kuda
Gujarati	Indrajavanu
Bengali	Indrajab
Sanskrit	Kutaja (I) Description
	() 2000 17101

The bark and seed of Wrightea Anti-dysenterica. This is obtainable in most bazaars This is a specific for dysentery. The bark is as soft as cotton. It is a stomachic, febrifuge, anthelmintic. The seed is carminative, tonic, aphrodisiac and littonriptic.

In allopathic system also there is a preparation of Kurchi, viz., Extractum Kurchi Liguidom. Dose: 180 to 240 minims or drops. Kurchi et Bismuth is another preparation. Dose: 5 to 10 grains.

Kurchi does not produce any nausea or vomiting and so may be given by the mouth. It is nontoxic and non-cumulative and so may be taken for a long time without interval. It is easily excreted by the kidneys. When compared with emetine its ac-tion is slow and less powerful. It is not effective intra-venously and intra-musculary, because it is readily excreted in the urine and so fails to concentrate sufficiently at the site of infection. If the bowels are acting frequently, Kurchi may be thrown out and may fail to act. Tablets are often passed out entire with the stools in the acute stage.

(ii)Kurchi Infusion

Re: Kurchi bark (bruised)10 ouncesBoiling water20 ouncesInfuse for 8 hours and strain. Dose: 2 tablespoonfuls thrice daily. Useful in chronic dysentery.Can be used as a gar-gle for relieving toothache.

(iii) Kurchi Powder

Re: Kurchi bark dried powder	2 ounces	
Pomegranate bark dried powder	2 ounces	
Bael fruit pulp dried powder	2 ounces	
Dose: 1 teaspoonful with honey or sugar. Useful in diar-rhoea, dysentery.		

Mix the juice of the bark with gingily oil and boil the oil. This is useful in eczema, itch and other skin diseases as an external application. Apply the bark that is sliced, to painful parts of the body and bandage. Pain will be relieved.

72. LAWSONIA ALBA

(HENNA SHRUB)

English	: Henna-Samphire
Hindi	: Mehindi
Kanarese	: Gorante
Tamil	: Marutonri, Marutani, Aivanam
Telugu	: Goranta
Malayalam	: Marutoni
Marathi	: Mendhi
Gujarati	: Mendi
Bengali	: Mehedi
Sanskrit	: Raktogarba, Kurantaka

(I) The Properties

This is a common Indian shrub that is grown throughout India. The leaves are astringent, detergent and deodorant. The flower is refrigerant and soporific. The seed is deodorant. The bark is astringent.

(ii) The Uses

The leaves are used by the ladies for staining the nails and palms. It gives beauty and also prevents all diseases of the nails. The leaves are useful in burning of the feet, sprain, contu-sion and rheumatism of the joints.

(iii) The Flowers, Leaves and the Bark

The fresh leaves should be beaten into a paste with vine-gar or lime juice and applied as a poultice to the soles of the feet. The plain paste without vinegar or lime juice can also be applied. You can also rub the parts with the bruised leaves. Use strong friction.

Keep the flowers underneath the pillow when you go to sleep. You will get sound sleep. The heat of the body will disap-pear.

The leaves purify sulphur. The bark is used in turning cop-per into an oxide.

73. LEMON-GRASS OIL

English	: True Lemon-grass
Hindi	: Gandha-bena-tel
Kanarese	: Purvali-hullu-yanne
Tamil	: Karpura-pullu-yenney
Telugu	: Nimma-gaddi-nunay
Malayalam	: Vasanap-pulla-enna
Marathi	: Sugandhichaha
Gujarati	: Lilli-chaya-tel
Bengali	: Gandha-Bena
Sanskrit	: Bhustrina (i) Description

This is the oil obtained by distillation from several species of Andropogon (citratis, etc.). This is also known as Indian oil of Verbena, although it only resembles Verbena. This is a power-ful stimulant whether taken internally or applied externally. It is a carminative. It is a good rubefacient liniment. It is of a pale-sherry colour, transparent. It has a pungent taste. It has a peculiar fragrant lemon-like odour.

(ii) Uses

It gives speedy relief in obstinate vomiting, vomiting of cholera, flatulent colic and other spasmodic affections of the bowels. Three to six drops may be given in sugar or in the form of emulsion.

(iii) Emulsion

Re: Lemon-grass oil 5 drops

Mucilage q.s.

Peppermint water 1 ounce

Useful in flatulent colic and vomiting.

Re: Lemon grass oil 5 drops

Sugar 1 teaspoonful

For vomiting and colic. In cholera it acts as a stimulant and stops vomiting. The dose of 5 or 6 drops may be repeated ev-ery hour or oftener in severe cases.

(iv) A Good Liniment

Re: Lemon-grass oil 6 ounces

Sweet oil 6 ounces

Useful in lumbago, neuralgic pains, sprains, chronic rheu-matism and other painful muscular affections. Apply this lini-ment with great friction twice daily. In old chronic cases apply the undiluted oil.

CHAPTER XXIII

LIME FRUIT, LINSEED, LIQUORICE, LONG PEPPER

74. LIME FRUIT

(CITRUS BERGAMIA)

English	: Lime Fruit
Hindi	: Nimbu
Kanarese	: Nimbo-hannu
Tamil	: Elurnichchampazham
Telugu	: Nimrna, Nimmapandu
Malayalam	: Cheru-Naranga
Marathi	: Lirnbu
Gujarati	: Limbtu
Bengali	: Nebu
Sanskrit	: Jambira

(i) Uses of the Fruit-I

The fruit is refrigerant i.e. quenches thirst and reduces temperature, and antiscorbutic, i.e., acts against scurvy by pu-rifying the blood. The leaf is also refrigerant. The skin is rubefacient and carminative.

(ii) Uses of the Juice—I

The fresh juice of the lime is the best remedy in the treat-ment of scurvy. Three ounces should be taken twice daily. It is useful in spongy gums. It prevents scurvy. Dilute it with an equal quantity of water. This is an excellent gargle for scorbutic and other ulcerations of the mouth and spongy gums.

(iii) Uses of the Fruit—II

The fruit is useful in biliousness, bilious giddiness, nau-sea, vomiting, anorexia or loss of appetite. excessive thirst, el-ephantiasis, earache, eye-diseases, whitlow. It binds the bowels.

(iv) Uses of the Juice—II

Before going to bed apply the juice to the body. This will af-ford protection from the bites of mosquitoes. It also relieves the irritation caused by the bites of mosquitoes.

The juice is an antidote for poisoning by croton oilseeds, castor oil seeds, physic nut, the fresh root of bitter cassava, mandioc or tapioca plant. Give four ounces of the juice diluted with plain water or conjee. There will be immediate relief to the purging and vomiting. Give a full dose of castor oil subse-quently.

(v) Lemonade

Re: Lemon fruits peeled and cut into slices 5 fruits

Boiling water

20 ounces

Cool it and strain. Add sugar to taste. This is a very useful refrigerant drink in all sorts of fevers and diabetes.

75. LINSEED

English	: Linseed, Flax Plant
Hindi	: Halim, Chansar, Ulsi
Kanarese	: Allibija
Tamil	: Aliverai
Telugu	: Adeli, Adiyalu, Avisa
Malayalam	: Alivitta
Marathi	: Javas
Gujarati	: Alshi

Bengali	: Masina
Sanskrit	: Chandrasura
The seeds of Linum Usitatissimum.	

(i) Uses of the Leaf, the Seed and the Flower

The leaf has stimulant and diuretic properties. The flower has tonic properties. The seed is alterative, aperient, aphrodi-siac, carminative, demulcent, diuretic, emmenagogue and galactagogue. The leaf gives strength to the body. It breaks re-tention of urine and helps free flow of urine. The leaf can be taken along with curd in the form of pachadie.

The flower also gives strength to a weak body. It also can be taken along with curd in the form of pachadie.

The seed is useful in dyspepsia, mucous dysentery, swell-ing or congestion of liver, flatulence, hiccough, cough, piles. It increases the semen, removes the internal heat of body, in-creases the flow of milk in nursing mothers, moves the bowels, helps the free flow of retained urine, and produces abortion.

(ii) Linseed Oil

Linseed oil (oleum lini) is extracted from linseed. It is a vis-cid yellow fixed oil, commonly called "drying oil", because it unites with oxygen and becomes resinoid on exposure.

Dose: $\frac{1}{2}$ to 1 fluid ounce. If you soak in water the seeds, they become a viscid mucilaginous, jelly like mass. This is a good demulcent.

(iii) i) Linseed Tea

Re: Linseed 1 ounce

Water 20 ounces

Boil the seeds in the water for 10 minutes and strain. Add sugar. Dose: 10 ounces twice daily. Useful in dysentery, cold, cough, cystitis (inflammation of the bladder), hiccough. For hic-cough give a little infusion frequently.

(iv) Linseed Poultice

Pour 10 ounces of boiling water in a basin. Put Linseed powder into the basin and stir till the mixture is like thick por-ridge or hulva. Pour the mixture on a piece of lint or cloth. Spread it nicely with a spatula. Make it y inch thick. Smear the surface with oil. Apply to the chest when it is hot. This is useful in pneumonia or inflammation of the lungs. Abscesses will burst easily, if you apply this poultice.

(v) Carron Oil

Re: Lime water

4 ounces

Linseed oil 4 ounces

Rub well. It will form a white emulsion. Useful in burns. Soak a piece of lint or cloth in the emulsion and apply it to the affected parts.

(vi) Linseed and Sugar

Re: Linseed powder 2 ounces

Sugar 2 ounces

Dose: 1 teaspoonful thrice daily. Useful in dyspepsia, diar-rhoea due to indigestion, mucous dysentery.

(vii) Linseed Confection

Re: Linseed powder	4 ounces
--------------------	----------

Sugar 4 ounces

Ghee 2 ounces

Mix. Dose: 1 teaspoonful thrice daily. This is a tonic to strengthen a weak body and increases semen.

(viii) Linseed Lehiam

Re: Linseed powder 4 ounces

Milk 8 ounces

Sugar 4 ounces

Boil the linseed in the milk and add the sugar. Dose: 1 tea-spoonful twice daily. Useful in flatulence, lumbago. This will in-crease the flow of milk in nursing mothers and the flow of semen in males. Make a paste of linseed powder and apply it to any skin disease caused by impurities of blood. It will be cured.

76. LIQUORICE

English	: Liquorice, Sweetwood
Hindi	: Mulatthi
Kanarese	: Ati-madhura
Tamil	: Ati-Maduram
Telugu	: Ati-madhuramu, Yasti-madhukam
Malayalam	: Ati-madhuram, Iratti-madhuram
Marathi	: Jashtimadh
Gujarati	: Jashtimadh

Bengali	: Yeshto-madhu
Sanskrit	: Yashti-madhukam
	(i) Constituents and Preparations

It is the root of glycyrrhizae glabra. It is obtainable in all ba-zaars. The root of Abrus precatorious (jequirity, Indian of Ja-maica liquorice) is often sold in its place. Liquorice is emollient, demulcent, expectorant and laxative. It has sweet taste. It is dark-brown. It occurs in cylindrical pieces and is longitudinally wrinkled. It has a faint odour. It is obtained in India, Afghani-stan, Persia, South Europe and England. Its chief constituents are glycyrrhizin, an amorphous glucoside, asparagin, sugar, resin, starch, gum, etc. Dose: 15 to 60 grains.

In allopathic system there are three preparations, viz., Glycirrhiza Extract (Dose 10 to 30 grains); Liquid Extract of Glycirrhiza (Dose 30 to 60 minims or drops); and Compound Glycirrhiza Powder (Dose 60 to 120 grains). This is useful in piles and constipation. This contains Senna leaf, liquorice, fen-nel, sublimed sulphur and sugar. Take one or two teaspoonfuls at bed time.

(ii) Syrup of Liquorice

Re: Liquorice root	3 ounces
--------------------	----------

Water 20 ounces

Boil for 30 minutes and strain. Add 8 ounces of sugar. Boil till the solution assumes the consistency of a syrup. Dose: 1 to 4 teaspoonfuls. Useful in cough, bronchitis, etc.

(iii) Liquorice Lozenge

Re: Extract of liquorice	3 grains
Tto. Extraot of liquorioo	o granio

Menthol	1/4 grain
Oil of anisi	1 m

Gum Arabic q.s

Make one lozenge. Useful in cough, bronchitis, etc.

	(iv) Liquorice Pill
Re: Liquorice powder	1 teaspoonful
Black pepper powder	1 teaspoonful
Sugarcandy	1 teaspoonful
Gum Arabic	q.s.

Dose: 5 grains for a pill. Useful in cough, bronchitis, etc. Chew a piece of liguorice. Cough will be relieved.

Liquorice is useful in thirst, hiccough, leucoderma, bilious-ness, jaundice, spermatorrhoea.

(v) Liquorice Extract (Essence)

Soak 8 ounces in 20 ounces of water for 10 hours. Then strain. Again soak the same liquorice in 5 ounces of hot water. Strain. Now add this infusion with the previous one. Then boil down the infusion to the consistence of an extract.

English Hindi Kanarese Tamil Telugu Malayalam Marathi Gujarati Bengali Sanskrit

77. LONG PEPPER (PIPUL)

English	: Dried Catkins
Hindi	: Pimpli
Kanarese	: Hippili
Tamil	: Thippili
Telugu	: Pippallu
Malayalam	: Tippli
Marathi	: Pimpli
Gujarati	: Pipara
Bengali	: Pipli
Sanskrit	: Pippali
The fruit, root and stems of piper longum.	

(i) Uses

Long pepper is a stimulant, carminative, alterative and ex-pectorant. This is useful in cough, gastritis, dyspnoea, dropsy, anorexia, flatulence, headache. fainting, cold in the head and nose, diarrhoea, fever with shivering, worms in the bowels, pharyngitis, pain in the anus.

(ii) Long Pepper with Myrobalan

	(iii) Cough Powder
One dose. To be taken twice daily. Useful in consumption.	
Honey	1 teaspoonful
Myrobalan powder (Harad)	10 grains
Re: Long pepper powder	10 grains

Re: Long pepper powder	1 ounce
Black pepper	1 ounce

Liquorice powder 1 ounce

Mix well. Dose: 20 to 60 grains. Useful in cough, bronchi-tis, etc. A good expectorant powder.

(iv) Pipul Infusion

Re: Pipul	1 ounce
Boiling water	10 ounces

Infuse for 2 hours. Dose: 1 tablespoonful with two tea-spoonfuls of honey; thrice daily. Useful in cough.

(v) A Good Digestive Powder

Re: Pipul	1 drachm
Dried ginger	1 drachm
Rock salt	1 drachm
Asafoetida	30 grains
Caraway (jira)	1 drachm
Black pepper	1 drachm
Ajowan	1 drachm

Dose: Grains 30 or 1-2 teaspoonful after food twice daily.

(vi) Pipul with Honey

Re: Pipul powder	1-2 teaspoonful
Betel leaf juice	1 teaspoonful
Honey	1 teaspoonful

Useful in cough, phlegm, bronchitis, fever.

	(vii) Pipul with Milk
Re: Pipul powder	1-2 teaspoonful
Milk	16 ounces

Boil the milk with this powder. Add sugarcandy or sugar. Useful in asthma, cough, rheumatism, fainting, Sannipath.

(viii) Pipul Confection

Re: Long pepper	2 drachms
Black pepper	2 drachms

Dried ginger	2 drachms
Cumin seeds	2 drachms
Cinnamon	2 drachms
Ajwan	2 drachms
Cloves	2 drachms
Cardamom	2 drachms

Gently fry these drugs. Powder them well. Mix. Add equal of sugar. Add 4 ounces of honey. Mix well. Dose: 1 teaspoonful. thrice daily. Useful in asthma, cough, difficulty of breathing, bronchitis, fainting, biliousness, anaemia, etc.

CHAPTER XXIV

MALABAR NIGHT SHADE, MANATHAKKALI, MINT MORINGA

78. MALABAR NIGHT SHADE

(PORTULACES QUADRIFIDA)

English	: Indian Spinach
Hindi	: Poi
Kanarese	: Hali Baccheli
Tamil	: Pasalai
Telugu	: Sannu pappu, Bacchali
Malayalam	: Cheru Basali
Marathi	: Velbondi
Gujarati	: Mava-ki-baji
Bengali	: Rukhtopuri
Sanskrit	: Laghu Lonika

(i) **Description**

It is small spreading herb. The leaf and the seed are used. It is a diuretic and stomachic.

(ii) Uses

This is useful in dysuria or difficulty in passing urine, gon-orrhoea, anorexia or loss of appetite, vomiting and retention of urine. This can be cooked as vegetable and eaten.

79. MANATHAKKALI

(SOLANUM NIGRUM, SOLANUM RUBRUM)

Hindi	: Mako
Kanarese	: Kakmunchi
Tamil	: Manathakkali

: Kamanchi Chettu
: Manithakkali
: Piludu
: Kakmachi
: Kakamachai

This is a small herb that is cultivated easily in all parts of India. There are two varieties; red and black. (There is no differ-ence in their qualities.) The leaf and the very tiny fruits are useful.

(i) The Uses of the Fruit and Leaf

It is an alterative, diuretic, diaphoretic and expectorant. The fruit is useful in bronchitis and liver troubles. The leaf is useful in ulcers of the tongue. The dried, salted, 'Vatral' of the fruit is an excellent article of diet for the invalids and the conva-lescents. The fruit is soaked in sour curd, salted and dried in the sun. This is 'Vatral' in -Tamil. This is later, whenever re-quired, fried in ghee and used. The fruit removes constipation and throws out the phlegm. The Vatral or the decoction of the Vatral is useful in vomiting due to biliousness. It removes an-orexia or disgust for food and moves the bowels also.

(ii) Juice and Decoction of the Leaf

A tablespoonful of the juice of the leaf three times daily will increase the flow of urine and removes ascites and dropsy. The decoction is useful in dysuria or difficulty in passing urine.

80. MINT

(MENTHA SATIVA, MENTHA ARVENTIS)

English	: Mint, March mint
Hindi	: Pudinah
Kanarese	: Chetni Maragu
Tamil	: Puthina
Telugu	: Pudina
Malayalam	: Putiyina
Bengali	: Pudinah
Sanskrit	: Pudina (i) Varieties of Mint

This is a small plant; its varieties are known as spearmint, pepper mint and mentha viridis.

(ii) Its Uses

It is an astringent, refrigerant, stomachic, diuretic, stimu-lant, carminative and antispasmodic. It is usually used as 'chut-ney' in loss of appetite, nausea or tendency to vomit. It is useful in anorexia or loss of appetite and diarrhoea. It improves appe-tite. The whole plant can be dried and powdered and made use of as tooth-powder.

Bind Mint across your forehead. This will relieve you of headache. A cup of Mint-tea, morning and evening, improves digestion. It is useful in fever, jaundice, hiccough, stomach ache, pain in the bowels, headache, vomiting, nausea and loss of appetite. Also useful in dysmenorrhoea or difficulty in men-struation and the pain in the abdomen caused by this. It gives good sleep and increases the flow of urine. Mint can also be added to hot milk or tea and drunk.

(iii) Pudina Tel and Its Utilities

Pudina Tel or oil is the oil distilled from the fresh flowering spear mint, mentha viridis or mentha crispa. Its main active principles are carvone and menthone. It resembles the oil of pepper mint. This is useful in headache as an external applica-tion. It is taken internally in dyspepsia, flatulence or wind in the bowels and abdominal pain. The dose is 1 to 3 minims or drops. Pepper mint water is made out of oil of spear mint 1, water 1500 and distilled to 1000. Dose is 1 to 2 fluid ounces. This is also useful in loss of appetite, colic or pain in the belly, vomiting, wind in the bowels, etc.

81. MORINGA

(DRUM-STICK TREE)

English	: Drum stick, Horse-radish
Hindi	: Segva, Sahijna
Kanarese	: Nugge-gida
Tamil	: Murungai
Telugu	: Munaga, Mulaga
Malayalam	: Muringa
Marathi	: Shegat
Gujarati	: Suragavo
Bengali	: Sojna
Sanskrit	: Sigru
	(i) The Root, Flower and the Bark

The fresh root of this tree closely resembles in taste, smell and general appearance the common Horse-radish tree of Eu-rope. It is an antispasmodic, stimulant, expectorant and diuretic. The flower is a tonic. The bark is an emmenagogue and abortifacient. The fresh root has acrid, vesicant and antilithic properties.

(ii) Murungai Infusion

Re: Fresh Moringa root bruised	1 ounce
Mustard seed bruised	1 ounce
Boiling water	20 ounces

Infuse for 2 hours in a covered vessel and strain. Dose: 1 ounce every three .iours. Useful in dropsy. This infusion is highly beneficial as a gargle in hoarseness and relaxed sore throat.

(iii) The Leaves and Their Uses

The leaves are used as a curry. It removes excessive heat of the body, invigorates the digestive fire and increases the ap-petite. The unripe fruit (Murunga Kai) is used in the preparation of soup (Sambar). It is very tasty and helps removing phlegm.

(iv) Utility of the Flower, Fruit and the Gum

The flower removes biliousness and anorexia or distaste for food, cools the eyes and increases and strengthens the se-men. The tender fruit is useful in fevers; and the seeds thicken the semen. The semen will become thick like the gum. The gum of this tree is useful in polyuria or excessive urine. It thick-ens the semen and gives beauty to the body. The addition of the juice of the fresh root increases the efficiency of the mus-tard-poultice. The leaves can be made into a paste or poultice and applied to swellings. The flower enters into the composi-tion of Dhatu Pusthi Lehia or confection which invigorates the sex-indriya and gives sexual vigour.

CHAPTER XXV

MUDAR, MUSTARD, MYROBALAN, NEEM, NUTMEG

82. MUDAR

(CALOTROPIS GIGANTEA, CALOTROPIS PEROCERA)

English	: Gigantic Swallow wort
Hindi	: Ak, Akan, Akond or Mudar
Kanarese	: Yekkada Gida
Tamil	: Erukku
Telugu	: Jilledu Chettu
Malayalam	: Erukka
Marathi	: Ravi-Akda
Gujarati	: Akado
Bengali	: Akanda
Sanskrit	: Arka
	(i) Mudar Root-Bark

The root-bark is used in medicine. It should be collected in April and May from plants grown in sandy soil and dried in open air without exposure to the sun until the milk juice contained in them becomes so far dried that it ceases to flow on incision be- ing made. The bark is then to be carefully removed, dried, re-duced to powder and preserved in well corked bottles.

The root-bark is febrifuge, alterative, stimulant, tonic dia-phoretic, emetic, expectorant. It is a gastro-intestinal tonic; in large doses from 30 to 60 grains for adults, it acts freely as an emetic.

(ii) Mudar Powder

Re: Mudar powder 3 grains

Dried ginger

5 grains

One powder. Dose: One powder three times daily. This is a tonic and an expectorant. This is useful in leprosy, constitu-tional syphillis, obstinate ulcers and chronic rheumatism; in skin diseases arising from the abuse of mercury. In these dis-eases the starting dose is 3 grains. It is gradually increased to 10 grains or more, three times daily.

In dysentery it has been highly spoken of. In severe cases in adults a large dose from 20 to 60 grains may be given at once in the same manner as Ipecacuantia. In ordinary cases smaller doses are preferable.

(iii) Mudar Leaf

The leaf is anthelminitic, alterative, laxative and stimulant. Warm the leaves gently and apply them to the boils. They will ripen quickly and burst.

Dip the leaves in hot neem oil and foment the swollen joints gently; the swelling and pain will subside. Give from 2 to 5 drops of the juice of the leaf in scorpion sting and bites by poi-sonous snakes.

(iv) Mudar Flower

The flower is an expectorant, stomachic, digestive and tonic.

83. MUSTARD

English	: Black Mustard
Hindi	: Kalarai
Kanarese	: Karisasivey
Tamil	: Kadagu
Telugu	: Avalu
Malayalam	: Kaduka
Marathi	: Mahori
Gujarati	: Rai
Bengali	: Krishnrai
Sanskrit	: Sarshapah

(i) The Uses

This is an emetic. A teaspoonful in a glass of warm water can be used as an emetic fora child. A teaspoonful can be used for an adult.

(ii) Its Utilities in Foot-Bath

Mustard is used for a foot-bath. Place the feet in a bath of hot water to which a tablespoonful of mustard has been added. This will relieve your cold or nasal catarrh. A foot-bath will re-lieve bleeding from the nose by taking blood away from the head.

(iii) Mustard Plaster

Mustard plaster is useful in relieving deep pain and severe vomiting. Mix a small quantity of mustard with a little cold water and make it into a thin paste and spread it on linen, paper or lint. Cover this with gauze or thick handkerchief before applying it to the skin. Otherwise a blister may be formed. As soon as there is burning in the skin, remove the plaster, wipe the part, dry and apply a little ghee, vaseline or oil to the part.

To relieve vomiting apply the mustard plaster over the pit of the stomach.

It is mixed with linseed meal for making poultice. The poul-tice also must be covered with gauze.

84. MYROBALAN

English	: Myrobalan
Hindi	: Har, Harra, Pile Harra, Chhoti Har
Kanarese	: Anile kayi
Tamil	: Kadukkai
Telugu	: Karakkaya
Malayalam	: Katukkai
Marathi	: Hirada
Gujarati	: Himaja
Sanskrit	: Haritaki

(i) Description, Properties and Uses

Taste: Astringent. This is dried, immature fruit of Terminalia Chebula. There are two varieties, viz., Chhoti Har (small) and Bari Har (big variety). The small variety is used for medicinal purposes. The big variety is used for tanning. The hard outer covering of the fruit should be taken and not the seed. Properties: digestive; increases gastric fire, bestows in-tellectual vigour, longevity, memory power; nourishes the body; rejuvenates; gives good appetite; invigorates the bowels; pre-vents old age; removes excessive fat.

Just as mother feeds her children with food of six tastes, and nourishes the body, Myrobalan drives away diseases of the body and nourishes it. Therefore, Myrobalan is superior to nursing mothers. Myrobalan is useful in epilepsy, diabetes, insipidus nausea, diseases of the heart, Grihani or chronic diar-rhoea, eye diseases, asthma, jaundice, leprosy, chronic gastri-tis, burning in the hands and feet, impotency, ascitis, dropsy of abdomen, enlargement of spleen, salivation, hiccough, bron-chitis, orchitis, leucoderma, old long-standing fevers, Phthisis, syphilis, gonorrhoea and fistula. Myrobalan ghee, myrobalan confection, myrobalan essence are all preparations of myroba-lan.

Myrobalan is a safe and effective aperient. It is also one of the ingredients of Triphala. It contains tannic acid, a purgative principle and a vegetable acid. The immature fruit Jangi

Haritaki contains more tannin and is more suitable for diar-rhoea. It has anthelmintic properties. It expels roundworms. You can take three fruits at a time.

The decoction is used as a gargle. The dried pulpy portion is chewed after meals as a sialogogue. That which increases the flow of saliva is a sialogogue. For purgative action the outer pulp of 2 or 3 fruits is ground up with common salt, which improves its taste and is given at bed time. This will give 2 or 3 painless evacuations in the early morning. The liquid extract is also frequently used.

Chhoti Har is a good laxative, and an astringent too. It is a good tonic and alterative also. You can also make a good as-tringent lotion and ointment.

(ii) A Safe and Gentle Laxative

Re: Myrobalan	3 drachms
Senna leaves	3 drachms
Rose petals	2 drachms
Dried ginger	20 grains
Water	4 ounces

Boil for 10 minutes and strain for one dose. This is a safe and gentle laxative.

(iii) Triphala Choorna

Re: Myrobalan (Har)

Amla (Nellikai)

Myrobalan (Bahera) (Thandrikai)

Powder equal parts of these separately, strain and mix. Dose: 2 teaspoonfuls at bed time.

(iv) A Good Laxative

Dissolve 2 teaspoonfuls of the above powder in 4 ounces of water at bed time, strain and drink the solution in the early morning. A good laxative. Myrobalan removes constipation by regular use. It is an effective cure for indigestion or dyspepsia, pain in the bowels, flatulence or wind in the stomach and bow-els, palpitation, biliousness, headache, etc. Take one myroba-lan at night daily. You will be cured of chronic sores in the mouth and the tongue which trouble you for a long time.

On account of its astringent properties ulcerated wounds heal quickly if they are covered with a paste of myrobalan.

Skin diseases with profuse discharge can also be suc-cessfully treated with the paste. The paste can be made either with water or with oil.

Make a paste of myrobalan and add a little opium. This is highly useful in piles and prolapse of rectum of anus. Apply it to the anus.

(v) Myrobalan Decoction

2 fruits (powdered)

Water

10 ounces

Boil for ten minutes strain and cool. Soak a piece of clean cloth or lint in the decoction and apply it to burns. Repeat this every three hours. This is highly beneficial.

Mix one teaspoonful of Har powdered with one teaspoon-ful of Fennel (Bari Sonf) and sugar. This is a useful laxative.

Mix well equal parts of Myrobalan powder, rock salt arised and dried ginger. Take 15 grains twice daily. This is a liver tonic and a digestive too. You can take this either before or after food.

Just as in Chandrayana Vrat morsels of food are taken, take one myrobalan fruit on the first day of Suklapaksha or the bright fortnight, on the second day two fruits, and increase the number until full-moon and then reduce the number by one till New-Moon. This is known as Myrobalan Kalpam, and is highly recommended for health, vigour, rejuvenation and longevity

85. NEEM (MARGOSA)

(AZADIRACHTA INDICA)

English	: Neem, Margosa tree
Hindi	: Neem
Kanarese	: Bevina Mara
Tamil	: Vembu, Veppamaram
Telugu	: Vepa Chettu
Malayalam	: Veppa
Marathi	: Kudunimba
Gujarati	: Limba
Bengali	: Nim
Sanskrit	: Nimba
	(i) The Properties and the Uses

The leaf is stimulant, anthelmintic and discutient. The flower is a stimulant, stomachic and tonic. The fruit is antiperiodic and tonic. The seed is anthelmintic. The oil is stim-ii ulant, antiseptic and insecticide. The bark is antiperiodic, bitter, tonic and astringent. The bark contains a bitter, neutral resin. The activity of the remedy dwells in this resin.

(ii) Neem Decoction

Re: Neem bark bruised	2 ounces
Cloves	30 grains
Cinnamon	30 grains
Water	20 ounces

Boil for 15 minutes and strain. Dose: 2 ounces. Useful in ague or intermittent fever, loss of appetite, convalescence after fever, general debility. It is a tonic as well. In Malaria it should be given every second hour previous to time at which the attack is expected to return. The decoction should be prepared fresh for use when required, as it gets spoiled in hot weather.

Prepare plain decoction with a large quantity of neem leaves. Boil till the water becomes golden yellow. This is useful for foot-bath, in swelling ulcers, eczema and for washing un-healthy ulcers, itch or scabies, leprotic ulcers, etc.

	(iii) Neem Powder
Re: Neem bark powder	30 grains
Cloves powder	3 grains
Cinnamon powder	5 grains

Mix well. Dose: 1 powder twice daily. This is a tonic in con-valescence after fevers, malaria, general debility, etc.

	(iv) Neem Poultice
Re: Bruised neem leaves	1 ounce
Rice (flour, or wheat) in hot water	1 ounce

Useful in chronic, sluggish ulcers, eczema, etc. This is a stimulant and antiseptic. Spread it on a piece of lint or clean white cloth and apply to the affected part. It will ripen the ab-scess.

The Neem tree is held in veneration by the Hindus. It is dedicated to the Goddess Mariamma, the deity which is sup-posed by them to preside over all epidemics, particularly small-pox. The epidemics themselves are thought to be visitations of this goddess. The leaves are in common use in honour of God-dess Mariamma, in smallpox cases. The leaves are spread on the bed of the patient. A bunch of the leaves is fixed above the door as a sign of the presence of the Goddess in the house. Fans made up of the leaves are used for fanning the patient. The fresh tender young leaves are given as an internal medi-cine. Many cases have recovered. Five grains may be given 3 times a day.

It you cannot get fresh leaves use dry leaves and make a decoction or infusion (one teaspoonful to 20 ounces of water). Give an adult one ounce daily.

In allopathic system there are two official preparations, viz., Infusion Azed dirachtal Indica (Dose: ;2 ounce) and tinc-ture Azad dirachtal Indica (Dose:1/2 to 1 drachm).

This tree is planted in India in front of dwelling houses in the neighourhood of temples, on the roads on both sides, as it prevents epidemic fevers. If you have a bunch of leaves in front of your doors and windows, no mosquito will enter the room.

(v) Neem Leaf

It is applied as a paste in drying pustules of smallpox. It is given internally on the following day after a purgative is taken. It destroys all intestinal worms. The leaves are made into a fine paste. A little Ajwan is added. Chew a few leaves daily, Pyor-rhoea will take to its heels. Cobra poison will not affect you.

(vi) Children's Friend

Re: Tender neem leaves	1 ounces
Garlic	5 grains
Ajwan	20 grains
Black pepper	10 grains
Dried ginger	10 grains
Sweet neem leaves	1 ounces
Fennel	30 grains

Fry all these with a little ghee. Add a little salt. Dose: 10 grains to be dissolved in a little water. Useful in intestinal worms, flatulence, constipation, indigestion, phlegm in chest of children. It will improve their appetite.

(vii) Neem Flower Chutney

Fry the flower with a little ghee. Add a little tamarind, fried red chillies, sweet neern leaves and a little salt. Make a chutney with a little water. Useful in anorexia or distaste for food vomit-ing or nausea, sour belching, worms in the bowels, fainting due to biliousness, etc.

(viii) Neem Flower Rasam

Make pepper water or Mysore Rasam with dhall and ghee. Powder neem flower and then add this to the pepper wa-ter or Mysore Rasam. This is useful in anorexia or distaste for food, bilious vomiting, sour belching. bilious giddiness, etc.

Fry the flower in ghee. Powder it and add this to the pep-per soup or Milagu Kulambhu.

Dry the unripe fruit of neem. Remove the seed. Powder the pulp. Take 20 grains twice daily. Useful in intermittent ma-larial fever.

Make a paste of the seed and apply it to the ulcers which contains maggots. Maggots will come out.

Oil of neem is useful in eczema, herpes, itch or scabies and other skin diseases. Maggots will come out. Wherever there are maggots or worms use neem oil.

(ix)Neem Bark Decoction

Re: Neem bark bruised2 ouncesCardamom1 teaspoonfulCoriander2 tablespoonfulsWater20 ounces

Boil for half an hour. Dose: 2 ounces. Give this some time before malaria comes. This will prevent the attack. Even if it co-mes, it will be very mild.

86.Nutmeg

English	: Nutmeg
Hindi	: Jaephal
Kanarese	: Jaji Kayi
Tamil	: Jadikayi
Telugu	: Jaji kaya
Malayalam	: Jatikkaya
Marathi	: Jayiphal
Gujarati	: Jayiphal
Bengali	: Jayphal
Sanskrit	: Jati-Phalam
	(i) The Properties and the Uses

Nutmeg is a stimulant, carminative, narcotic, aromatic, aphrodisiac and tonic. The country nutmeg is the dried fruit of Myristica Malabarica. It is not so good. Nutmeg is closely allied to cloves and cinnamon. It may be substituted for them. Nut-meg in large doses is a narcotic. Therefore, some care is nec-essary in its use.

It is useful in spermatorrhoea, headache, asthma, cough, intestinal colic, flatulence, indigestion, dull gastric fire. It is taken along with betel. Dose: 5-10 grains.

It enters into the composition of Pulviscreta Aromaticus (aromatic chalk powder), and aromatic chalk powder with opium, in the allopathic system.

Its chief constituents are a fixed oil and a volatile oil, and amylodextrin.

(ii) Nutmeg Co. Powder

Re: Nutmeg powder	3 grains
Dried ginger	5 grains
Cardamom	5 grains
Black pepper	2 grains
Cumin (Jira)	5 grains

Make one powder. Dose: One powder twice a day after or before meals. This is a good digestive and carminative.

Mix oil of nutmeg with gingily oil. This is an excellent appli-cation for indolent ulcers. It cleanses the surface and produce healthy action. It is a good liniment for chronic rheumatism. It is a valuable application in toothache; it is useful in diarrhoea and dysentery. Dose: 1 to 3 minims.

Re: Nutmeg powder	3 grains
Milk	2 ounces
Useful in diarrhoea.	

(iii) Pulvis Nutmeg Compound

Re: Nutmeg powder	3 grains
Camphor	1 grain
Cardamom	5 grains
Cloves powder	5 grains

One powder. To be taken twice daily. Useful in intestinal colic, pain in the stomach, hem icrania or one-sided headache, menorrhagia (excessive menstruation), intestinal pain, and rheumatic pains.

CHAPTER XXVI

OPIUM, PAPAYA I & II, PEEPAL TREE, PELLYWORTH ROOT

87. OPIUM

(POPPY)

English
Hindi
Kanarese
Tamil
Telugu
Malayalam
Marathi
Gujarati

- : Hafeem : Aphimu : Abhin : Nallamandu : Apim, Kasha-kasha, Karappa
- : Afim

: Opium

: Afim

Bengali	: Afim, Afin
Sanskrit	: Ahipehnam

(i) Description

This is the juice obtained by incision from the unripe cap-sules of Papaver Somniferum, the white poppy and inspissated by spontaneous evaporation. Opium occurs in rounded masses. Colour is blackish brown. The taste is nauseously bit-ter.

(ii) Properties and Uses

The alkaloids contained in opium are morphine, codeine, thebaine, narcotine, papaverine and narceine. Opium is an an-algesic or anodyne. It is the most valuable drug for relieving pain. It is an antispasmodic, antiphilogistic, disphoretic, di-uretic, expectorant, haemostatic, styptic, hypnotic, sedative and stimulant. Dose: 1/2 to 3 grains.

This is useful in diarrhoea, cholera, intestinal colic, renal colic and hepatic colic. It stops bleeding, when it is adminis-tered internally. It alleviates cough. It relieves pain. It produces sleep. It is given in diabetes. The amount of sugar in the urine is diminished.

(iii) Allopathic Preparations

In allopathic system there are the following preparations. All contain opium.

Compound Aromatic chalk powder (Pulvis Cretae Aromaticus cum opio). Dose: 10 to 60 grains. This is useful in diarrhoea and dysentery.

Dover's Powder (Pulvis Ipecacuantia et opia). Dose: 5 to 10 grains. This is useful in dysentery. This is given at bed time for inducing sleep.

Tr. Opii (Laudanum). Dose: 5 to 30 minims (drops). 15 minims contain one gram of opium.

Tr. Camphor, Co. (Paregoric). Dose: 30 to 60 minims. En-ters into the composition of cough mixtures.

(iv) Instructions for Uses

Opium should not be given to pregnant women and chil-dren. If opium is administered judiciously at the proper time and in proper cases, it does much good, but its indiscriminate use often produces the worst effects.

In dysentery or colitis an enema of 2 ounces of conjee with 30 drops of Tr. Opii gives relief immediately.

Omum water, or infusion of cloves and catechu may be advantageously combined with Tr. Opii in the treatment of diar-rhoea and vomiting.

Simple opium liniment is very useful in chronic rheuma-tism, lumbago, spasms, bruises, enlarged glands, mumps, muscular and neuralgic pains. It can be combined with an equal quantity of camphor liniment.

Equal parts of Tr. Opii and glycerine or any soothing oil such as oil of sessamum, etc., are useful in earache.

Gall and opium ointment is beneficial in painful piles. This will stop bleeding also.

Put a piece of cotton dipped in Tr. Opii in the socket of a decayed tooth. This will relieve toothache. A grain of opium can be put into the hollow of the decayed tooth. Do not swallow the saliva. In diabetes opium gives most beneficial results.

(v) Compound Opium Powder

Re: Opium powder	1 grain
Dried Ginger powder	2 grains
Camphor powder	1 grain
Cinnamon powder	3 grains

Make a powder. One powder twice daily. Useful in diar-rhoea, flatulence and intestinal colic.

(vi) Gall and Opium Ointment

Re: Gall		2 drachms
Opium		30 grains
Vaseline		1 ounces

Useful in piles or Haemorrhoids.

(vii) Poppy Heads Fomentation

Poppy-heads, the capsules of Papaver Somniferum are used as a sedative fomentation and poultice. Bruise the poppy heads and boil in water. Dip a piece of flannel into the hot fluid and apply locally in painful areas.

88. PAPAYA—I

(CARICA PAPAYA)

English	: Papaya
Hindi	: Popaiyah, Papita
Kanarese	: Pappalam
Tamil	: Pappai
Telugu	: Boppayai
Malayalam	: Pappaye

Marathi	: Popai
Gujarati	: Papai
Bengali	: Papaya, Penpay
This small tree	e is cultivated in all parts of India. It is a use-ful, small soft-wooded tree, originally
native of Papu	a New Guinea.

(i) The Fruit and the Milky Fluid

Its green fruit is an edible vegetable and largely used in making Indian curries. Ripe fruit is sweet and delicious. Both are used in liver diseases and disorders of digestion.

The fruit contains a soft, yellow resin, fat, pectin, sugar, albuminoids, citric, malic and tartaric acids, dextrin, etc.

Papaya oil is found in its seeds. The leaves contain an al-kaloid called carperine.

The unripe fruit, milk and seeds possess emmenagogue and anthelmintic properties. The fruit is laxative, tonic and di-uretic.

The papaya milk, the milky fluid that comes out of scratch-ing the surface of the raw papaya fruit contains an enzyme which can digest starch, mucous membranes and animal pro-teins.

(ii) The Digestive Powder

Papaya milk, is dried at a low temperature and Papain a digestive powder, is obtained. Dose 2 to 10 grains. It is very useful in dyspepsia and liver complaints. It may be rubbed in ringworm patches. It is highly beneficial in all cases when di-gestion is weak or when the liver is not functioning properly.

(iii) The Digestive Drink

The fruit should be well crushed and the seeds should be removed. Then cold milk may be added. Sweeten this with honey or syrup of dates or syrup of jaggery. This is a delicious, digestive drink.

Cut the fruit into small bits and then boil in a small quantity of water. Filter the essence through a clean muslin or porus cloth. Add milk and syrup of jaggery. This is also a palatable, di-gestive drink.

(iv) The Uses of Ripe and Unripe Fruit

The ripe fruit is alterative. It is useful in habitual constipa-tion, dyspepsia or indigestion, bleeding piles and chronic diar-rhoea.

The green fruit is laxative and diuretic. It can be cooked as a curry. In women, this stimulates secretion of milk.

Slices of unripe fruit can be rubbed on ringworm patches.

The juice is useful in ulcers of the tongue, and throat.

The fresh milky juice removes roundworms in children. Take 2 tablespoonfuls of fresh juice and 2 teaspoonfuls of honey. Add 2 ounces of boiling water to this. This must be fol-lowed by the dose of castor oil one ounce. Dose of the juice for adults one teaspoonful, for children half teaspoonful, and for children under three years 10 to 15 drops.

The juice of the unripe fruit is useful in dysmenorrhoea. It helps the free flow of the menses. If this is applied locally in the shape of pessary to the os-uteri, it causes abortion. In large doses it acts as an ecbolic, exciting uterine contraction. The fresh milky juice is useful in scorpion stings as a local applica-tion.

Take one teaspoonful of the milky juice of unripe fruit and add a teaspoonful of sugar. This is useful in reducing enlarged spleen.

The dried ripe fruit or salted ripe fruit is useful in enlarge-ment of spleen and liver.

(v) The Utility of the Leaves

The leaves dipped in hot water or warmed over a fire are applied to the painful parts for nervous pains or neuralgias.

Bruised leaves warmed over a fire can be applied as a poultice in boils, swellings, elephantoid growths, etc.

89. PAPAYA—II

(CAR I CA PAPAYA)

Papaya fruit is laxative, tonic and diuretic. The unripe fruit, milk of papaya and seeds possess emmenagogue and anthelmintic properties.

(i) Papaya Juice with Honey

Re: Fresh juice of unripe fruit	1 tablespoonful
Honey	1 tablespoonful
Boiling water	2 ounces

One dose. Take the whole thing as a draught, when it be-comes cool. Useful in round-worm of the bowels. After two hours give one ounce of castor oil with half a tablespoonful of lime juice if available. Otherwise give plain castor oil. This must be repeated two days in succession. Half the dose can be given for a child between 3 and 7 years of age.

Give a tea-spoonful for a child under 3 years of age. If colic follows its use give sugar and water or sugar and milk freely. Collect the juice by making incision on the unripe fruit. It should be mixed with honey when it is fresh.

(ii) Papaya Juice with Sugar

Re: Milky juice of unripe fruit	1 teaspoonful
Sugar	1 teaspoonful

Divide into 3 doses. One dose 3 times a day. Useful in en-largement of spleen and liver. For children give 2 or 3 drops of the juice with sugar. Continue the treatment for 20 days. Give a nutritious and liberal diet.

A poultice of the pulp of the unripe fruit over the enlarged spleen is also beneficial.

(iii) Papaya Juice with Milk

Re: Juice of the unripe fruit	1 teaspoonful
Milk	8 ounces
Sugar	2 tablespoonfuls

Mix. Useful in dyspepsia, gastritis, pain in the stomach.

The juice of the unripe fruit is useful in ulcers in the tongue and throat. It can be applied to the tongue and throat.

(iv) Papain

Dry the juice of the unripe fruit. You will get a powder. Dry it in the sun. You get Papain. Dose: 2 to 10 grains. Useful in dys-pepsia, pain in the stomach, gastritis or gastric catarrh.

Allopaths prepare Elixir of Papain. It contains Papain, di-lute hydrochlore acid, simple elixir and glycerine. Dose: 30 to 60 minims or drops. This is given in chronic dyspepsia with acidity. It acts both in acid and alkaline media.

(v) For Ringworm

Rub slices of unripe fruit on ringworm. Ringworm will dis-appear. It is a simple and efficient remedy.

Mix a little alum with the juice of unripe fruit and apply it to eczema. Eczema will be cured. Mix the juice with a little borax and water and apply it to prickly heat on the skin. Prickly heat will disappear.

(vi) Papaya Leaf Poultice

Crush the leaves_ Warm them. Apply them to swelling and boils. The swelling will be reduced. Boils will get resolved.

Soak the leaves in hot water and foment the parts where there are swelling and pain. Swelling and pain will disappear. Show the leaves before the fire and apply them to the swollen and painful parts. Swelling will subside. Pain will vanish.

Unripe Papaya can be used for making vegetable currie. The skin should be removed. This will increase the flow of milk in nursing mothers. Papaya fruit is useful in enlargement of spleen and liver, constipation, piles and pain in the stomach and the bowels.

90. PEEPUL TREE

(FICUS RELIGIOSA)

Hindi: PeepulKanarese: Aswatha mara, PimpalaTamil: ArasuTelugu: RavichettuMalayalam: ArasuMarathi: PimpalaGujarati: JariBengali: Asud	
0	
Sanskrit : Aswattha	

(i) Description

This is a big tree that is cultivated throughout India. It is cultivated in temples and in the vicinity of temples. It is wor-shipped by the Hindus.

(ii) The Uses

The seed is a laxative, refrigerant and astringent. It is use-ful in diseases of semen like spermatorrhoea, etc., hoarseness of voice and thirst.

The tender leaves increase the semen. They are useful in fevers.

Re: Tender leaves

2 tablespoonfuls

Milk8 ouncesSugar2 tablespoonfuls

Boil the leaves in the milk. Add sugar and then eat. Useful in fever, sexual debility and impotency.

	(iii) Powder
Re: Pulverised seeds	2 drachms
Sugar	1 drachm

Useful in constipation, spermatorrhoea, hoarseness of voice, excessive thirst. This is a good appetiser and increases the digestive fire.

The juice obtained by incising the tree is useful in fissures of the feet.

(iv) Dusting Powder

Re: Powder of the bark 4 ounces

This is useful as a dusting powder for ulcers and wounds. Ulcers, etc., heal up quickly.

	(v) Decoction
Re: Powdered bark of fig tree	2 drachms
Powdered bark of Peepul tree	2 drachms
Powdered bark of Baniyan tree	2 drachms
Powdered bark of Jambul tree	2 drachms
Water	20 ounces

Put the powder in a vessel. Add the water. Boil for 15 to 30 minutes. Strain. Useful as a gargle in ulcers of the tongue and the mouth. This can be used as an injection in gonorrhoea to stop the discharge.

	(vi) Infusion
Re: Powder of the bark	1 teaspoonful
Water	20 ounces

Soak the powder in the water and strain after half an hour. This is useful as a drink in scabies or itches and other skin-dis-eases. This will cool the body also.

(vii) Ash of the Bark

Re: Burnt bark

1 ounce

Powder it. Put half a teaspoonful in four ounces of cold water. Let it remain for 15 minutes. Then strain. Useful in hic-cough.

English Hindi Kanarese Tamil Telugu Malayalam Marathi Gujarati Bengali Sanskrit

91. PELLYWORTH ROOT

(ANACYCLUS PYRETHRUM)

English	: Pyrethri radix
Hindi	: Akar kara
Kanarese	: Akkala-kare
Tamil	: Akkara-karam
Telugu	: Akkara-karam
Malayalam	: Akkila-karam
Marathi	: Akkal-kara
Gujarati	: Akar-karo
Gujarati	: Akar-karo
Bengali	: Akar-kara
Sanskrit	: Akara Karaba

(i) The Properties and the Uses

The root is of the size of the finger. It is largely cultivated in Bengal and Arabia. If you chew a small piece of this root, it pro-duces salivation in the mouth. It produces a tingling and burn-ing sensation in the tongue and the lips. It will relieve dryness of the mouth and tongue. It is a stimulant, sialogogue and rubefacient.

It is useful in toothache, elongation of the uvula, hoarse-ness of voice, fever with thirst, Jihwasthambana (when the tongue fails to move), dryness of the mouth in fevers. If you chew a small piece of this root all the above diseases will be cured. You can gargle the mouth also by making a decoction of the root. It is useful in rheumatism also.

Put a few grains of the powder in the nose (nasyam). Epi-leptic attacks will subside.

(ii) Compound Pellyworth Powder

Re: Pellitory root powder	5 grains
Dried ginger powder	2 grains
Cloves powder	1 grain
Long pepper powder	3 grains
Saffron powder	2 grains
Sugar	15 grains

Make into one powder. Take one powder twice daily, morning and evening, either before or after food. Useful in stomach ache, intestine colic, indigestion, loss of appetite and nervous debility.

CHAPTER XXVII

PHYSIC NUT PLANT, PINE APPLE, PLANTAIN, POMEGRANATE

92. PHYSIC-NUT PLANT

(JATORPHA CURCAS)

English	: Molucca Bean
Hindi	: Jungle-arandi
Kanarese	: Bettada-haralu
Tamil	: Kattamanaku
Telugu	: Pepalam
Malayalam	: Katta-vanakka
Marathi	: Rana-yerandi
Gujarati	: Jungle-arandi
Bengali	: Eranda-gach, Bon-bheranda
Sanskrit	: Parvata-yeranda (i) Description and the Properties

This is a common plant which grows in waste places throughout India. This is cultivated also. It is used as a fence also. It converts iron into lead. It is a galactagogue (that which increases the flow of milk in nursing mothers), haemostatic (that which stops bleeding) and vermifuge (that which expels worms from the bowels). The leaves, milk, root and the seeds are used.

(ii) The Utility of Leaves and Milk

The leaves increase the semen. They are useful in ec-zema, skin-diseases, scabies, internal piles, syphilitic swell-ings, head-ache, ulcers, gonorrhoea, etc.

Gently warm the leaves and apply them to the breasts of nursing mothers. The milk will increase and flow freely.

The application of the juice of the leaves in diseases of the skin is very useful.

The milk is useful in gonorrhoea, ulcers of the male organ, and toothache. The fresh juice stops bleeding in wounds and heals them quickly. It coagulates the blood and covers the bleeding surface with a tenacious layer. A varicose aneurysm situated just above the inner ankle was cured by the subcuta-neous injection of a drachm of this juice.

(iii) The Uses of the Oil

The oil obtained from the seeds is a cathartic and an emetic. The oil acts in doses of 10 or 12 drops, as a purgative equal in action to one ounce of castor oil. It causes more grip-ing and so it is rarely used. Its ill-effects are corrected by lime juice.

It is applied externally in chronic pains, rheumatism and skin-diseases. It is mixed with some bland oils such as sweet oil, mustard oil, etc. (1 part to 2 or 3 parts).

(iv) The Stick and the Root-bark

The bark of the root is made into a paste and applied in rheumatic swelling of joints.

People use the stick of the plant for cleaning the teeth. Toothache is relieved.

93. PINE APPLE

(ANANAS SATIVUS)

English Hindi	: Pine apple : Ananas
Kanarese	: Ananasu-hannu
Tamil	: Annasipazham
Telugu	: Anasa-pandu
Malayalam	: Kaitha-chakka
Marathi	: Ananas
Gujarati	: Ananas
Bengali	: Anaras

(i) The Properties of Leaf and Fruit

This is cultivated throughout India. The leaf is a germicide and a purgative. The unripe fruit is a diaphoretic, digestive, lax-ative and diuretic. The fruit is germicide, diuretic, styptic and emmenagogue.

(ii) The Uses of the Fruit

The fruit is useful in gonorrhoea, enlargement of spleen, vomiting, biliousness, thirst, headache. It gives beauty to the body. In enlargement of spleen take one fruit daily.

Re: The juice of the leaf	1 teaspoonful
Sugar	1 teaspoonful
Water	2 tablespoonfuls

Mix. This is useful in hiccough. If you take 2 teaspoonfuls, it will act as a purgative. If the fruit is taken in a large quantity abortion will take place. Therefore, pregnant women should not take this fruit in abundance. Warm fruit juice is useful in vomit-ing, dysentery, jaundice and biliousness.

94. PLANTAIN

(BANANA TREE)

English	: Plantain
Hindi	: Kela
Kanarese	: Bale
Tamil	: Vazhai
Telugu	: Arati, Kadali
Malayalam	: Vazha
Marathi	: Kela-jhada
Gujarati	: Kela-nu-jhada
Bengali	: Kelagachh
Sanskrit	: Kadali

(i) Description

The flower, unripe plantain or tender plantain are astrin-gent. The stem is antibilious and diuretic and lithontriptic. The bark is refrigerant. The fruit is demulcent, laxative and nutritive. The stem will remove the hair that is stuck up in the intestines.

(ii) The Flower

The flower is useful in piles, spermatorrhoea, gonorrhoea, cough, burning in hands and feet. It increases the semen. Crush the flower and fry it with a little castor oil and foment the hands and feet; then apply it to the parts and bandage. The burning will be relieved. Take the juice of the flower, and pal-myra sugarcandy or ordinary sugarcandy and drink in the early morning. This is useful in gonorrhoea, menorrhagia or excessive menstruation.

(iii) The Fruit

The tender plantain is useful in piles. The tender fruit is use-ful in dysentery, diabetes insipidus or Bahumutra (excessive urine). Plantain fruit removes leucoderma, biliousness, fainting.

Unripe plantain is useful in bilious vomiting, diarrhoea, ex-cessive salivation, dysentery, cough. It gives strength and in-creases the blood and the appetite. Plantain is a valuable article of diet. Dried plantain is useful in scurvy.

The tender plantain leaf can be applied in burns and scalds. They will heal and dry quickly. Smear the leaf with gingily oil or castor oil and apply it to the denuded skin or a blister after removing the skin and put on a bandage. It will be cooling and soothing. The blistered surface heals quickly. It should be changed twice or thrice daily.

The tender leaf can be used as a substitute for oiled silk, oil cloth or gutta-percha tissue in the dressing of wounds and ul-cers. The leaf should be sufficiently large to cover the whole part. Evaporation of any subjacent fluid is efficiently prevented.

The leaf can be used as a shade for the eyes in opthalmia and other diseases of the eye. No manufactured shade is su-perior to this.

(v) Plantain Fruit with Milk

Re: One plantain fruit smashed

Milk 6 ounces

Take this thrice daily. Useful in dysentery, sprue and diar-rhoea.

(vi) Plai	ntain	with	Tamarind
-----------	-------	------	----------

Re: Plantain fruit	one	

Tamarind pulp	2 drachms
---------------	-----------

Salt a little

Mash and mix well. Take twice daily. Useful in diarrhoea and dysentery.

95. POMEGRANATE

(PUNICA GRANATUM)

English	: Pomegranate
Hindi	: Anar
Kanarese	: Dalimba
Tamil	: Mathali
Telugu	: Danimma
Malayalam	: Mathalam
Marathi	: Dalimba-jhada
Gujarati	: Dadam-nu-jhada
Bengali	: Dalim-gash
Sanskrit	: Sheekdana (i) Properties

Pomegranate is astringent and styptic. The rind of the fruit is astringent and stomachic. The bark of the tree and the root is anthelmintic. Fruit is refrigerant. The seed is astringent, anthelmintic and toenifuge.

(ii) Pomegranate Decoction

Re: Rind of the fruit (dried)	2 ounces
Cloves bruised	2 drachms
Cinnamon bruised	2 drachms
Water	20 ounces

Boil for 15 minutes and strain. Dose: 1 ounce thrice daily. Useful in dysentery and diarrhoea.

(iii) Pomegranate and Kurchi Decoction

Re: Rind of the fruit	1 ounces
Kurchi bark	1 ounces
Rind of Mangostin	1 ounces
Pulp of Bael fruit	1 ounces
Water	20 ounces
Boil for 15 minutes and strain. Dose:	1 ounce three times daily. Useful in dysentery.

(iv) Pomegranate Decoction with Alum

Re: Rind of the fruit dried4 ouncesWater20 ouncesBoil for 15 minutes and strain. Add one drachm of alum. This is a very useful gargle in relaxedsore throat. This is also a good astringent injection in vaginal discharges of women(leucorrhoea, etc.)

(v) Root-Bark Decoction

Re: Root-bark of pomegranate sliced 2 ounces

Water 2 pints

Boil down to 1 pint. Dose: 2 ounces in the early morning. Repeat every half hour. This should be followed by 1 ounce of castor oil.

(vi) The Uses

Useful in tape-worm. The tape-worm will generally be ex-pelled within twelve hours. The flower is useful in bilious vomit-ing, dysentery, heat in the body, piles, etc. It increases the blood and gives strength.

The tender fruit is useful in constipation, dysentery and di-arrhoea. The fruit is useful in vomiting, cough, excessive thirst, biliousness, sterility in women, excessive salivation, hiccough, fever, burning in chest, giddiness. Pomegranate juice with sugar-candy removes excessive heat

in the body and pro-duces coolness in the body, and gives immense strength to consumptives and others.

The seeds thicken the semen and remove burning pain and difficulty in passing urine in gonorrhoea.

CHAPTER XXVIII

PONNANGKANI, PTERCARPUS MARSUPIUM, PULICHAKKERAI

96. PONNANGKANI

(ALTERNANTHERA SESSILES)

Kanarese	: Vanagone soppu
Tamil	: Ponnangkani
Telugu	: Ponnagantikura
Malayalam	: Minankanni
Sanskrit	: Meenakshi; Mathsyakshi (i) Description

This is a creeper that is commonly cultivated in India. It can be obtained everywhere. This is a kalpa-moolikai. There is gold in this herb. He who eats daily this herb has a golden com-plexion. Hence the name Ponnangkani. "Pon" in Tamil means gold. Pon, Aum, Kan, Nee, i.e., if you eat this you will see your body as lustrous as gold. This is an alterative and cooling. This is useful in eye diseases, diseases of cornea, heat of the body and piles.

(ii) Preparations and Uses

Boil this without salt and eat with butter for 40 days. All dis-eases of the eye will be cured. The juice is useful as an Anupana. It is used in making copper oxide. Take oil bath with the oil prepared out of this herb. Diseases of the eye will be cured.

It is very beneficial for cough, asthma, fever, piles, gonor-rhoea, syphilis and intestinal worms. Take one seer juice and y seer of gingily oil. Boil the juice along with oil. When the juice is absorbed in the oil and the mixture reduced to y seer, then strain. This can be daily rubbed to the head. It will give eye sight, memory and cool the brain.

Take Ponnangkani juice 2 toles and mix equal part of car-rot juice, add a little salt (Saindhava), and drink. It is useful in piles.

97. PTERCARPUS MARSUPIUM

(LEGUMINCSAL GUM KINO TREE)

English	: Indian Kino
Hindi	: Brija sal
Kanarese	: Honne
Tamil	: Ponne
Telugu	: Peddagi
Marathi	: Brija sal
Bengali	: Pit-sal
Sanskrit	: Pitasala

(I) Description

A large handsome deciduous timber tree of the moist de-ciduous forests of India with a round headed crown and rounded leaves. It is a native of the forest of Madras, Bombay, Madhya Pradeh and some parts of North India.

The wood is valuable and priced next to Teak in parts of South India including the table land of Mysore. The bark on chopping exudes a red viscous gummy substance called kino-gum which has medicinal properties.

The copious yellow and scented flowers appear sometime in July-August. The tree requires a moderately well drained moist loavy soil, but it sometimes tolerates soil which is not too well drained provided it is not heavy. It is found on soils from graintes, gnaisses or from deccan Trap.

Silvicultural characters: A light laying tree. Moderately fast growing. It attains large dimensions, 100 to 120 ft. high and 6 to 8 ft. or over in girth being common. It attains best sizes in moist situations with rainfall of 50 to 60 inches, but can grow in locali-ties with much less rain, though in such places it attains only smaller dimensions.

(ii) Uses of the Timber

The timber is used very largely for house building, furni-ture, door and window frames, planking, occasionally for small dugouts and the like. It works easily, can be seasoned with ease and though not so long lasting as teak, is just used for var-ious purposes for which teak is used but is not easily available or is considered too costly.

The timber is hard and closed grained. The heartwood is yellow-brown but unlike Teak with which this tree is found asso-ciated in many forests the wood of petrocarpus marsupium is not proof against termite attack. The timber stains yellow when damp.

(iii) Kino from the Bark

The red gum resin which is exuded from wounds in the bark furnishes the KINO of commerce, which is valuable astrin-gent used in medicine.

(iv) The Leaves

The leaves of the tree make excellent fodder and they are reported to be specially valuable as manure. The bark is occa-sionally employed for dyeing. It contains a brownish and colouring matter which dyes tassar silk a raddish fawn colour. Kino gum is also stated to have tanning properties.

The tree sheds its leaves in April-May and is leafless for a short period, the new leaves appear in May-June. The fragrant yellow flowers appear from June to September. Seeds are ripe from December-January to March-April. The pods which are produced abundantly, are 1 inch to 2 inches in diameter flat and the central portion bony.

(v) Germination and growth of the tree

The important factors which help its natural reproduction are loose, clear soil free of weeds. Natural reproduction may sometime take place in grass areas. Grazing is inimical to natu-ral reproduction. Fire dangerous. The best course is to protect against fire and grazing and give overhead freedom to estab-lish regeneration.

Germination can be hastened by soaking the seed in wa-ter or cutting through the ends of the pod before soaking to ad-mit water readily.

The tree can be grown by direct sowing. Stump planting i.e., pruning root and shoot, is advantageous. Entire transplant-ing can also be done but this is better done with basket plants.

(vi) A Piece of Wood and the Drink

A piece of this wood cut in cross section half inch by half inch may be dipped in X, seer of cold water in a glass and not in a metal tumbler, and the water drunk twice a day. The colour of the water changes into yellow, and the wood piece should not be used when the colour is not given out by it. It should be soaked on the previous evening and the water taken on the fol-lowing morning. Again fresh water should be kept for the eve-ning dose. Some people make a cup out of this wood and drink water from it after allowing the water to remain in the cup for a few minutes. Many have been cured of Diabetes by this treat-ment.

98. PULICHAKKERAI

(HIBISCUS CANNABINUS)

- English Hindi Kanarese Tamil Telugu Malayalam
- Brown Indian Hemp Patsan Pinidrike Gida Pulicch akkerai : Gongura : Pulich-cheera

Marathi	: Ambadi
Gujarati	: Ambadi
Bengali	: Mestapat
Sanskrit	: Mechika Phalamla
	(i) Properties and Uses

This is cultivated throughout India. The leaf, flower and seed are used. The leaf is an emolient and purgative. The seed is an aphrodisiac (Kama Vardhini). The leaf is eaten as a vege-table.

This is useful in cough, rheumatism, paralysis, anorexia or disgust for food, eczema and swelling. It removes laziness. It gives strength to the body and increases the semen and sexual vigour.

(ii) Juice of the Flower

The juice of the flower is mixed with black pepper and black sugar, and taken. This is useful in anorexia or disgust for food and vomiting due to biliousness.

CHAPTER XXIX

RICE, SALT, SANDAL WOOD, SAPOTA, SENNA

99. RICE

English	: Rice
Hindi	: Chaval
Kanarese	: Akki
Tamil	: Arisi
Telugu	: Biyyam
Malayalam	: Ari
Marathi	: Tandula
Gujarati	: Chokha
Bengali	: Chal, Chanvol
Sanskrit	: Vrihi
	(i) Varieties of Rice and Properties

The varieties of rice are Basmati, Milakusarnbha, Jeerakasambha, Eerkucchamba, Ku runjcharribha, Pulukuchamba, Koraichamba, Kalanchambha, Marchambha, Kodaichambha, Kadaichambha, Mallikaichambha, Man chambha, Chenchambha, Kallundaichambha, Illuppaipoochambha, Kunduchambha, Kundrumanichambha, Valaithadichambha, Kaivaraichambha, etc. Rice is a nutrient. The conjee or rice-water is demulcent and refrigerant.

(ii) For External Use

(a) Rice Flour

Rice flour can be used as a dusting powder in Measles, small pox, erysipelas, prickly heat and other inflammatory af-fections of the skin. This is a very cooling and soothing applica-tion. It allays heat and irritation. It is pleasant to the patient's feelings.

It is an excellent application in burns and scalds. It should be used as soon as possible after the occurrence of the injury. It should be dusted thickly over the whole of the burnt surface so that the discharge may be absorbed and air may be excluded.

(b) Rice Poultice

Place the rice flour in a basin and then gradually add boil-ing water; constantly stir the flour. Add a little sweet oil. Spread smoothly the poultice on a piece of clean cloth or white surgical lint to the thickness of a quarter of an inch and apply it over the affected parts. Apply the poultice two or three times daily. This is an excellent application in abscesses, boils, buboes, in-flamed piles and other local inflammatory affections.

(c) Rice Poultice for Chronic Coughs

Apply a large, soft rice poultice to the chest and back be-tween the shoulder blades, at bed time. This is highly beneficial in chronic bronchitis and other chronic coughs. Great relief is obtained. The surface of the poultice may be smeared over with oil of turpentine.

(iii) For Internal Use

	(a) Conjee Water
Re: Cleansed rice	1 ounce
Water	40 ounces

Boil for 20 minutes. Strain and flavour with lime juice. Add salt or sugar to taste. This is an excellent drink in fevers, gonor-rhoea, and in cases where there are pain, burning and difficulty in passing urine.

(b) Panchamushti Conjee

Take a handful of thuvar-ki-dhall, black gram, Bengal gram, green gram and rice and tie them separately in a piece of cloth. Place the bundles in a vessel. Pour over them four pints of water. Boil till it is reduce to one pint. This is a beneficial drink for breaking long fasts. It relieves exhaustion and gives strength immediately. This can be taken by ordinary persons also. It is nutritious and gives energy and strength.

(c) Green Gram and Rice Conjee

This is a very healthy drink. It removes biliousness. It is nutritious too.

(d) Milk and Rice Conjee

This removes burning due to biliousness. It increases se-men and sharpens the intellect.

(e) Hot Rice Water

The water or conjee that is removed while rice is boiling is beneficial in removing dysuria or difficulty and burning in pass-ing urine.

(f) Horse-Gram and Rice Conjee

This increases appetite and the semen, and gives im-mense strength, even for old people.

(g) Milk and Rice

This removes biliousness and excessive thirst. This is very nutritious. This increases semen.

(h) Ghee and Rice

This cools the eyes, increases the appetite and removes biliousness.

(i) Buttermilk and Rice

This increases the digestive fire and removes thirst. This is useful in diarrhoea and dysentery.

(j) Cold Rice Rice

that is soaked in water is taken in the morning with buttermilk or curd. This increases semen, cools the system and gives a healthy glow to the body. The rice water also may be drunk. It is very cooling and strengthening.

100. SALT

English	: Common Salt
Hindi	: Nimak
Kanarese ,Tamil	
Telugu , Malayalam	: Uppu
Marathi	: Chemitrneeth
Gujarati	: Mithun
Bengali	: Nimok
Sanskrit	: Lavanam
	: Pitasala
	(i) Salt Oil

Put a little salt in mustard oil and expose the oil to the sun. This oil is useful in rheumatism. Rub the oil to the painful parts with great friction. This oil can be used for cleansing the teeth in pyorrhoea, spongy gums, bleeding from the gums, carious tooth, etc.

(ii) Salt Gargle

Salt can be used as a gargle in sore throat. Half a tea-spoonful of salt in a tumblerful of warm water will form a good gargle.

(iii) Salt as an Emetic

It is useful as an emetic in cases of poisoning. If you find a small child has eaten any poisonous thing, you can give him salt to make him sick and so get rid of the poison. It will take two teaspoonfuls of salt in a tumblerful of warm water for a child's emetic and two tablespoonfuls for an adult.

101_ SAN DAL WOOD

English	: Sandal Wood
Hindi	: Chandan
Kanarese	: Gandhada-chekke
Tamil	: Chardanam
Telugu	: Chandhanapu-chakka,Gandhapu-chakka
Malayalam	: Chandana-mutti
Sanskrit	: Sri-gandha (i) Uses

This is grown in abundance in Karnataka State. This is an alterative, diuretic, diaphoretic, stimulant, disinfectant, astrin-gent. This is cooling.

Red Sandal wood contains a little tannin and is therefore slightly astringent also. It is used as a colouring agent.

Rub the sandal wood with lemon juice. This paste is useful in itching, Scabies, Herpes, Ringworm, Tinea versicolor (Themal in Tamil).

(ii) Sandal Wood Oil (Chandan Tel)

Oleum Santali is distilled from wood of Santali Album. It can be obtained from the bazaar and chemists. Only a good oil should he used. It is a stimulant and disinfectant of the genito-urinary tract. It is also an expectorant. Dose: 5 to 15 min-ims or drops.

Re: Sandal wood oil 5 drops

Mucilage q.s.

Water 1 ounce

Dose: 1 ounce thrice daily after food. Useful in gonor-rhoea, gleet, leucorrhoea and cystitis or inflammation of the bladder and painful and burning urination. The oil is best given in a little omum water or infusion of ginger.

102. SAPOTA

(ACHRAS SAPOTA)

For Blood Enrichment

This is known as Chikku fruit. It is a sweet, nutritious fruit. It has laxative and diuretic properties. It enriches the blood qualitatively and quantitatively.

103. SENNA

Tamil	: Surattavarai
Sanskrit	: Sonnamukki
	(i) Description

Leaves of cassia lanceolata and cassia augustifolia. Senna is cultivated in Southern India (Tinnevelly district). There is the Alexandrian or Egyptian Senna. As the Senna leaves are obtained from two sources, they are called Tinnevelly Senna and Alexandrian Senna.

(ii) Uses

This is a good laxative. It is a safe and efficient purgative, well adapted for childhood, old age, for pregnant women and for delicate persons. It is not so well adapted for nursing women, as it may render the milk purgative and so induce colic on the child. The active principles are Cathartic and Chrysophanic acids and Emodin.

The leaves are % to 1 inch long, lanceolate, greenish yel-low in colour, unequal at the base, brittle and with a faint tea-like odour. Dose: 10 to 30 grains. The taste of Senna may be disguised by sweetening the infusion and adding milk. Then it much resembles ordinary tea.

(iii) Method of Preparation

Re: Senna	1 ounce

Ginger 30 grains

Rose-petals 30 grains

Boiling water 10 ounces

Infuse for one hour, and then strain. Dose: for adult 1 to 2 ounces. Infusion of Senna with Epsom salt constitutes the "Blackdraught."

(iv) For Children

Re: Senna leaves1 teaspoonfulBoiling water4 ouncesInfuse for 10 minutes; strain and add a little sugar.

Confection of Senna, extractum senna liquidium; Infusion Senna concentratum, Mistura Senna Co., or Blackdraught, Pulvis Glycyrrhiza Co., which is useful as a laxative powder at night in the patients suffering from piles, and Syrupus Senna are al I official preparations of Senna.

Senna pods, the direct ripe fruits of Senna are also a valu-able laxative. Soak ten pods in cold water all night, strain and drink in the next morning.

CHAPTER XXX

SESAMUM, SPINACH, SUNDAKAI, SWEET FLAG

104. SESAMUM

(GINGILY OIL PLANT)

: Sesamurn
: Til
: Ellu
: Ellu
: Nuvvulu
: Karuella
: Teel
: Tal
: Kala-til
: Tilam

The plant, Sesamum Indicum is cultivated throughout In-dia and other tropical lands for the sake of its oil-yielding seeds. There are three kinds of seeds, viz., black, white and red.

(i) Uses of Leaves

The leaves are demulcent and emollient. They are useful in dysentery, in Amenorrhoea (absence of menstruation) and dysmenorrhoea (difficult menstruation). At the same time give a warm hip bath which contains a handful of bruised seeds.

Gently warm the leaves and apply them to swellings and boils. They will quickly suppurate and burst.

Soak a few leaves in 4 ounces of cold water for one hour. Give the infusion (4 ounces) twice daily. Make fresh infusion. This is useful in dysentery.

(ii) Uses of the Seeds

The seeds possess emmenagogue, stimulant, tonic, di-uretic, lactagogue and laxative properties. They give a sweet voice for songsters. If the seeds are taken in large quantities they cause abortion. The powdered seeds in 10 gram doses are beneficial.

Make a paste of the seeds and heat it and apply to boils. The boils will suppurate quickly and burst.

Sesamum and boiled rice (Ellodhanam) gives great strength. Excess of wind and bile will disappear.

(iii) Uses of the Oil of Sesamum-1

Oil of sesamum is demulcent, laxative, emollient and nu-trient. This clarifies the intellect, cools the eyes and bestows strength and vigour. It gives lustre to the eyes and the body. It nourishes the body well and rejuvenates.

(iv) Uses of the Oil of Sesamum-11

Apply this oil to the body, head and eyes. It removes burn-ing in the head, itching, scabies, cough, redness of the eyes, watering of the eyes, inability to bear the glare of the sun and other diseases of the eye. It heals ulcers and wounds. Til or Gingily oil is quite equal to olive oil for medicinal and pharma-ceutical purposes. It is useful in leprosy. The body must be rubbed with this oil with great friction.

English Hindi Kanarese Tamil Telugu Marathi Gujarati Bengali

105. SPINACH

English	: Spinach
Hindi	: Palak
Kanarese	: Basalay
Tamil	: Pasala Keerai
Telugu	: Mattu Bachhale
Marathi	: Sag
Gujarati	: Palak
Bengali	: Palang
	(i) Importance of Green Leaves

Green leaves are the very basis of life. They help in the at-tainment of longevity. Nature compounds all the essentials of life in the green, leafy vegetables. In the green, leafy vegetables nature carries on her most elaborate, vital alchemy. Spin-ach is put in the first place by the food experts. It should be used in abundance by every family. It is cheap, too.

(ii) Nutritive and Medicinal Value of Spinach

Spinach is a leafy vegetable. It contains iron in abun-dance, and so it is beneficial for anaemic patients whose blood is in impoverished condition_ Spinach has nutritive and medici-nal value. It contains a large quantity of vitamins, calcium, veg-etable-haemoglobin and protein building amino-acids. It is a protective food. There is a large quantity of alkaline minerals in spinach. Therefore, it maintains an effective resistance against infection.

Spinach contains a small amount of oxalic acid, a small amount of albuminous matter in the form of mucin and a large quantity of vitamins A, B and C and salts of potassium. The iron in spinach is easily assimilated.

Spinach is very easily digested and forms an excellent, cooling, nutritious and demulcent dish. It should be cooked in a little water. No water should be thrown away after cooking, as it contains much nutritious properties.

Young, tender sproutus of spinach can be used in raw sal-ads. They can be combined with tender lettuce leaves. It serves as a good appetizer. A liberal addition of green leafy vegetables to pulses is very beneficial.

Spinach is a good laxative and demulcent. It minimises tis-sue-waste. It has considerable antiberiberi and anti-scorbutic properties. Raw tendrils are highly beneficial. Spinach is useful in diabetes, anaemia and gout.

(iii) Uses of the Juice

The juice of the leaves can be given to children, mixed with honey or sugar. The juice is useful in urinary calculi or stones. It dissolves the stone. It has lithontriptic properties. Spinach is useful in kidney troubles. The juice of the leaves is used as a gargle in sore-throat.

(iv) The Decoction of the Leaves

A decoction or an infusion of the leaves (1 in 10) is useful in fevers. biliary troubles, inflammation of the lungs and bow-els, dyspnoea and hurried breathing. It acts as a demulcent, astringent and diuretic in these diseases. The dose is 1 or 2 ounces. Young, growing girls should eat plenty of spinach, as it provides iron in abundance in an easy assimilable form.

106. SUNDAKAI

(SOLANUM TORVUM, SOLANUM VERBACIFOLIUM)

Tamil	: Sundakai
Telugu	: Uste-kaya
Malayalam	: Chundak-kaya

(i) A Digestive Tonic

It is very much in use in the Tamil districts of Southern In-dia. It is a digestive tonic for the weak and the anaemic. It is a small, round, green fruit.

(ii) Contains Carbohydrates

It contains a good amount of carbohydrates, proteins, a fair proportion of iron, calcium, Phosphorus and vitamin A.

(iii) As a Pickle

It is used as a pickle. It is salted and dried, and used in the preparation of soup. The soup is an appetizer for the convales-cents, dyspeptics, etc. It is an expectorant, germicide and sto-

machic. It is slightly bitter. It is useful in bronchitis with phelgm, worms in the bowels and rheumatism.

(iv) Uses

The vatral (salted and dried ones) is useful in anorexia or loss of appetite due to biliousness, worms in the bowels, chronic diarrhoea, and mucus in the anus. It will give you good appetite. It is useful in phlegm in the chest, diarrhoea, due to in-digestion and piles.

(v) Some Preparations

It is fried in ghee or oil and used as an appetizer along with meals. It takes the place of vegetables. The Chundakai is soaked in sour curd. Salt is added. Then it is dried up in the sun. This is called Vatral or dried, salted pickle in Tamil.

(vi) As Snuff

The powder of the bark of the root is used as a snuff in heaviness of head with cold, hemicrania or onesided head-ache, coryza, boring pain in the head, fainting and collapse.

107. SWEET FLAG

(ACORUS CALAMUS)

English Hindi Kanarese Tamil	: Sweet-flag : Gora-bach : Baje : Vasha mbu
Telugu	: Vasa
Malayalam	: Vayambhu
Marathi	: Vekhand
Gujarati	: Godavaj
Bengali	: Gora-bach
Sanskrit	: Vacha

(i) Description and Uses

It is a kind of root, found in India, Burma, North America, Europe. It has a sweet aroma. Glucoside acorin, a kind of oily essence, is found in this root. It is a stimulant, tonic, stomachic, germicide, disinfective, anti-periodic, emetic, carminative, nauseant. It is a cheap medicine. It can be obtained every-where. It is one of the commonest of bazaar medicines. It is about the thickness of the thumb. Its taste is bitterish, warm and acrid. It should be kept in every domestic medicine chest.

(ii) Infusion Acorus

Re: Acorus bruised 1 ounce

Boiling water 10 ounces

Infuse for 1 hour and strain. Dose: 1 ounce thrice daily. Useful in dyspepsia, diarrhoea, flatulence of stomach and bow-els, debility, intermittent fever, rheumatism, paralysis, itching of skin, scabies, debilitating fevers, loss of appetite, diarrhoea of children.

(iii) Infusion Acorus and Chiretta

Re: Acorus bruised	1 ounce
Chiretta bruised	1 ounce
Boiling water	20 ounces

Infuse for 1 hour and strain. Dose: 1 ounce thrice daily. For intermittent fevers, convalescence after intermittent and other fevers, dyspepsia, particularly when attended with much flatu-lence or wind in the stomach and bowels, loss of appetite and constitutional debility, enlargement of spleen, asthma, round worms in the bowels.

(iv) Decoction of Acorus

Re: Acorus bruised	2 drachms
Liquorice	2 drachms
Water	10 ounces

Boil for 3/2 hour and strain. Dose: 2 teaspoonfuls thrice daily. For cough, fever and colic of children. Chew a bit of acorus. You will be relieved of hoarseness of voice, cough. People chew this when there is an epidemic of disease due to infected air.

(v) Acorus Paste

Re: Acorus 2 drachms

Gerua or Kasukkatti 2 drachms

Make into a paste by grinding them with water. For chronic rheumatism of joints. Burn Acorus and mix the ash with cocoanut oil or castor oil. Apply this to the abdomen. Useful in flatulence and colic.

(vi) Acorus Co., Decoction

Re: Acorus bruised	2 ounces
Coriander	1 drachm
Black pepper	30 grains
Water	20 ounces

Boil for 20 minutes, strain and cool. Dose: for adults-1 ounce thrice daily. For a child, one teaspoonful sweetened with sugar thrice daily. For dysentery, diarrhoea, bronchitis or cough of children.

(vii) Acorus Co., Digestive Powder

Re: Acorus powdered	1 drachm
Asafoetida	1 grain
Long pepper powdered	30 grains
Black pepper powdered	30 grains
Dried ginger powdered	1 drachm
Rock salt powdered	1 drachm
Atis powder	1 drachm

Mix well. Dose: $\frac{1}{2}$ teaspoonful or 30 grains twice daily. For dyspepsia or indigestion, diarrhoea flatulence or wind in the stomach and bowels, rheumatism, loss of appetite due to dull gastric fire.

The aroma of the fresh root drives away fleas and other in-sects. It can be kept in a room where sick persons live.

CHAPTER XXXI

TAMARIND, THUMBAI, THUTHULAI, TURMERIC, VASAKA

108. TAMARIND

(TAMARINDUS INDICUS)

English
Hindi
Kanarese
Tamil
Telugu
Malayalam

: Tamarind : Imli : Hunashi-hannu : Puli, Puliyam-pazham : Chinta-pandu : Puli

Marathi	: Chinch
Gujarati	: Ambli
Bengali	: Tinturi, Tentul, Amli
Sanskrit	: Tintrini

(i) Description and Uses

It is the pulp of fruit of reddish-brown colour. It has an acid saccharine taste. It is found in India and Burma. It is a big tree. It is laxative, refrigerant and anti-scorbutic. The tender leaves possess refrigerant and anti-bilious properties. The flower and tender fruit are both stimulant.

(ii) Tamarind Drink—I

	(<i>)</i>
Re: Tamarind fruit pulp	1 ounce
Boling water	1 pint (20 ounces)

Pour over the tamarind pulp which is contained in a ves-sel, the boiling water. Allow it to cool. Strain. Add sugar to taste. This is a useful drink in fevers and inflammatory affections. This is a cooling Sherbet. You can add a teaspoonful of cardamom powder. This will give you a good appetite.

	(iii) Tamarind Drink—II
Re: Milk	1 pint
Tamarind pulp	2 tablespoonfuls
Sugar	q.s.

Boil the milk. While it is boiling add the tamarind pulp. Strain and sweeten to taste. This is a cooling and slightly laxa-tive drink. This is useful in fevers and inflammatory conditions.

When you cannot get limes or lemons, use Tamarind pulp in scurvy both as a preventive and as a curative. It can be taken on board the ship. It can also form a portion of daily rations in jails, etc.

	(iv) A Good Laxative
Re: Tamarind fruit pulp	1 ounce
Dates	1 ounce
Milk	1 pint (20 ounces)
Boil and strain.	(v) Panakam
Re: Tamarind fruit pulp	1 ounce
Black sugar	q.s.

Cardamom powder1 drachmCamphor3 grainsWater1 pint (20 ounces)

Put the tamarind in the water. Macerate and strain. Now add the camphor and cardamom.

This is a cooling drink. It removes the heat of the body. This is useful in loss of appetite. It removes burning in the eyes and anorexia or distaste for food, and headache.

109. THUMBAI

(LEUCUS ASPERA)

Hindi Kanarese Tamil Telugu Malayalam Sanskrit

: Gurna Madupati : Tumba : Thumbai : Tummi : Thumba : Dronapushpa **(i) Properties and Uses**

This is a small herbal plant. There is also another variety called Big Thumbai or Elephant Thumbai. The leaf and the flowers are used. This is a laxative, expectorant, stimulant, and emmenagogue.

The leaf is useful in cobra-poisoning, headache, cough or bronchitis with phlegm, dullness of the digestive fire, paralysis, rheumatism, and collapse. The flower is beneficial in excessive thirst, fever with delir-ium and collapse, and defects in the eye.

Instil a few drops of the juice into the nose in snakebite. Rub the part bitten by the snake with the juice. Let the patient chew some leaves when he comes to consciousness. The poi-son will be destroyed.

(ii) Decoction of the flower

A decoction of the flower is useful in catarrh or cold in the nose. Take 20 drops of the juice of the flower. Add a teaspoon-ful of honey to the juice. This is also useful in catarrh of the nose.

(iii) Other Uses of the Juice of the Flower

Add 10 drops of the juice of the flower with 10 grains of powder of dates. This is useful in all bowel diseases of children. Give this twice daily.

Instill 2 or 3 drops of the juice of the flower into the nostril. This will cure incurable headaches.

In states of collapse or typhoid state soak the flower in hu-man milk and then squeeze the juice into the eyes.

Put the flowers in the sesamum oil and boil the oil. Allow it to cool. Apply the oil to the head and take bath. This is useful in heaviness of head, cold in the nose and head, etc.

110. THUTHULAI

(SOLANUM TRILOBATUM)

Tamil	: Thuthulai
Telugu	: Mullamusti
Malayalam	: Mulkathari
Sanskrit	: Alarka

This is a small creeper that is cultivated in South India. The whole plant (Samoolam) is used. It is a stimulant, expecto-rant and tonic.

(i) Uses of the Leaf and the Flower

The leaf is tasteful when it is eaten. The flower increases the semen and the seminal energy. The fruit keeps the three humours in harmony. The root and the creeper are useful in bronchitis and diseases of the respiratory tract.

The leaf is useful in asthma, bronchitis, spermatorrhoea, dyspnoea or difficulty of breathing, dullness of hearing due to phlegm, itching of body, dullness of digestive fire, boring pain in the internal body.

The flower is an aphrodisiac. It gives strength to the body and makes it beautiful and attractive.

(ii) Uses of the Unripe and the Ripe Fruit

The unripe fruit is useful in bronchitis, anorexia or disgust for food, constipation and pain in the heart. The unripe fruit can be made into a vatral (soaked in sour curd, salted and dried). This is useful in bronchitis.

The ripe fruit is beneficial in cough with phlegm in the chest, cold in the nose and head.

(iii) Preparations from the Leaf

A decoction of the leaves is useful in asthma, bronchitis or cough. The juice of the leaf can be instilled into ear. It will re-move obstruction in the ear which causes loss of hearing.

The leaf can be made into a chutney and soup. It will throw out phlegm or sputum.

111. TURMERIC

English : Turmeric

Hindi : Heidi

Kanarese	: Arisina
Tamil	: Manjal
Telugu	: Pasupu
Malayalam	: Manjal
Marathi	: Holede
Guarati	: Halad
Bengali	: Holodi
Sanskrit	: Haridra

(i) The Many Uses of Turmeric

It is the dried root stock of curcuma longa. It has a yellow colour and good aroma. It is used largely as a colouring agent. It is an aromatic, carminative and brain tonic. It is useful in flatulence or wind in the bowels and dyspepsia. It invigorates the appetite.

Turmeric is used in all vegetables, dhalls, kitchadie (tur-meric, dhall and rice) and soups. It gives a pleasant aroma and colour. Good colour to food is very pleasing to the eye and tongue and invigorates the appetite.

In South India ladies apply either fresh or powder of dried turmeric to the body while bathing. It removes bad smell, itch-ing, eczema and skin diseases, etc. It is a depilatory. It gives a good shining, golden complexion. It is mixed with salt, oil and wheat flour to make a hot paste for ripening boils quickly and natural quick bursting.

In catarrh or severe cold in the head, inhalation of the fumes of burning turmeric through the nostrils acts as a local stimulant or irritant. Congestion or fullness in the head and nose is relieved. It causes copious discharge of mucus from the nostrils. There is considerable relief and comfort. It re-moves vomiting, Vatha-pittha-kapha doshas, headache, co-ryza, swelling, ringworm, too much stinking, perspiration etc. The juice of the fresh turmeric is useful in contusion, fresh wounds, leech bites. The juice must be applied to the affected parts.

The turmeric powder can be used as a dusting powder in ulcers and wounds, etc. Make a paste of nim-leaves and tur-meric and apply it to the pustules in small pox. The pustules will heal up quickly.

(ii) Turmeric Paste

Re: Turmericone teaspoonfulAdhatoda leavesone handfulCow's urineq.s.Make a paste. This is useful in scabies, eczema, itching, skin diseases, etc.

(iii) Turmeric Digestive Powder

Re: Turmeric	10 grains
Dried ginger	5 grains
Black pepper	5 grains
Cardamom	5 grains

Make one powder. This is digestive and carminative, use-ful in flatulence or wind in the bowels, and colic. It tones the bowels.

(iv)	Turmeric	Decoction
------	----------	-----------

Re: Turmeric powder	1 ounce
---------------------	---------

20 ounces

Mix well. In conjunctivitis or sore-eyes, in catarrhal and purulent opthalmia this decoction is a very effective lotion for relieving the burning, reducing swelling, removing redness and irritation of the eyes, pain in the eyes etc. A piece of clean white cloth soaked in it should be kept constantly over the affected eye. The piece of clean, white cloth can be dipped in the solu-tion dried in the shade and then used for cleaning the eyes.

(v) Turmeric Ointment

Re: Turmeric	2 drachms
Gall	1 drachm
Ganja leaves	1/2 ounce
Opium	20 grains
Vaseline	2 ounces

Make a paste. (Instead of vaseline you can use olive oil, linseed oil or cocoanut oil.) It is useful in haemorrhoids or piles.

(vi) Turmeric Poultice

Re: Turmericone teaspoonfulBoiled riceone or two handfulsGrind and make a paste. Apply over the boils and ab-scesses. They will ripen quickly andburst.

112. VASAKA—I

English	: Mala bar met
Hindi	: Arusa
Kanarese	: Adasoge sappu
Tamil	: Adatodai

Telugu	: Addasaram
Malayalam	: Ata-lotakam
Marathi	: Adulsa
Gujarati	: Adulso
Bengali	: Basaka.Baksh
Sanskrit	: Vasaka

(i) Constituents of the Herb

The root, flowers, bark and the leaves of Adhatoda Vasaca are used. This is a non-official herb. This is a well-known Ayurvedic medicine largely used as an expectorant and antispasmodic. It liquifies the sputum or phlegm which is coughed up more easily. It has a sedative and bronchodilator effect. It contains an alkaloid (vasicined), an active principle and an essential oil, which has antiseptic properties.

(ii) Uses

It is an antispasmodic in bronchitis, bronchial spasm, asthma and whooping cough. It is slightly vaso-dilator, i.e., di-lates or expands the blood vessels or arteries. It is a germicide and diuretic also. Dose: 20 grains. There are also tablets of 5 grains each; 4 tablets for a dose.

Re: Fresh juice of Adhatoda leaves	4 tablespoonfuls
Honey	4 tablespoonfuls

Dose: 2 teaspoonfuls. Useful in bronchitis, ordinary cough, asthma.

(iii) Adhatoda Decoction

Re: Adhatoda leaves (dried)	2 ounces
Boiling water	20 ounces
Dried ginger	1/2 teaspoonful
Black pepper	1/2 teaspoonful
Sugar	1 ounce

Make infusion. Dose: 2 teaspoonfuls thrice daily. Useful in bronchitis and asthma.

You can make cigarette out of dried Adhatoda leaves for asthmatics.

Tincture Adhatoda or Tincture Vasaka and Syrup of Vasaka are also useful in asthma, bronchitis, etc.

113. VASAKA—II

(MALABAR NUT)

(i) Description

This is a small shrub that grows in abundance spontane-ously in all parts of India. The leaves are 4 to 8 inches in length and 2 or 3 inches in width. The flowers are white. It is an antispasmodic, expectorant, germicide and diuretic. The Ben-gal Pharmaceutical Works, Calcutta, prepares a syrup out of it. It is known as syrup of Vasaka.

(ii) Uses of Leaves

The leaves are useful in cough, bronchitis with sputum, asthma, consumption, vomiting, hiccough, leprosy, piles, rheu-matism, fevers, sannipath, diseases of the stomach and bow-els, dyspnoea or difficulty in breathing, orchitis or inflammation of the testicles, biliousness, jaundice. They give sweet voice for singing.

(iii) Juice of the Leaves

Re: Juice of the leaves 20 drops

Honey 2 teaspoonfuls

Water 2 tablespoonfuls

Mix well. One dose. To be taken twice daily. Useful in the above diseases.

Re: Leaves of Vasaka 4 ounces

Water 20 ounces

Boil for 20 minutes. Strain. Dose: 2 tablespoonfuls twice daily. Add a teaspoonful of honey for each dose. Useful in cough, constipation, fever with cough and sputum. Dry the leaves. Make them into a cigar and smoke. Useful in asthma.

CHAPTER XXXII

VERNONIA SEEDS, WALNUT, WHITE PUMPKIN, WORM-KILLER

114. VERNONIA SEEDS

(VERNONIA ANTHELMINTICA)

English	: Purple fleabane
Hindi	: Somraj, Bukchi, Kalouji jangli
Kanarese	: Kadu-jirigay
Tamil	: Kattu-jirakam
Telugu	: Adavi jilakarra, Vishakantakalu
Malayalam	: Kattu-jiragam
Marathi	: Ranacha-jira
Gujarati	: Kadvo-jiri
Bengali	: Somraj

Sanskrit

: Vana Jeerakam

(i) Description

The plant which yields these seeds is common in waste places near villages throughout India. The dried seeds can be obtained in the bazaars. The taste is nauseous and bitter. The seed is about the eighth of an inch in length. It is of a dark brown colour. It is covered with whitish scattered hairs. It is cy-lindrical.

(ii) Uses

It is an anthelmintic, stomachic, tonic, diuretic, antiperiodic and alterative. It exercises a specific influence on the round worm or ascaries lumbricoides. The round worms are expelled in a dead condition.

Re: Vernonia seeds (powdered) 2 drachms

Honey q.s.

Make into two boluses. Give one bolus at 5 a.m., another at 6 a.m. Then give a dose of castor oil (1 or 2 ounces) at 7 a.m.

(iii) Vernonia Paste

Re: Vernonia seeds (powdered)	2 drachms
-------------------------------	-----------

Lemon juice q.s.

Make into a paste. This destroys lice infesting the body.

115. WALNUT

(JUGLANS REGIA)

English	: Walnut
Hindi	: Akhrot
Kanarese	: Akrodu
Tamil	: Akrottu
Telugu	: Akrotu
Malayalam	: Akrotu
Marathi	: Akroda
Bengali	: Akhroot
Sanskrit	: Akshota (I) Description

This is a kind of tree which grows spontaneously in the Hi-malayas. It is cultivated in Kashmir, Tibet and Afghanistan. The leaves, tender fruits and the skin of fruit, bark and seed are used.

(ii) Uses of Leaf, Fruit, Nut and Seed

The leaf is an alterative, astringent and tonic. The tender fruit is a vermifuge. The nut is an alterative and aphrodisiac. It gives strength.

(iii) Uses of the Skin of the Fruit

The skin of the fruit is an anti-syphilitic and vermifuge. The bark is an astringent, anthelmintic detergent and actifuge. The seed is a cholagogue and a mild laxative.

116. WHITE PUMPKIN

English	: White Pumpkin
Hindi	: Petha
Kanarese	: Boodi Kumbala
Tamil	: Kalyana Pooshanikai
Telugu	: Boodidigummadi
Marathi	: Kohala
Gujarati	: Kohala
Bengali	: Kama
Sanskrit	: Koozhimanda

(i) Properties and Uses

This is a diuretic. This is a cooling vegetable. In Northern India people make Petha, a kind of sweetmeat out of this.

It is useful in dropsy, ascites, diseases of the kidneys and bladder, suppressed urine, dryness of tongue, constipation, debility, lack of vigour, loss of blood, blocking of the urinary pas-sage by stone or flesh, diabetes, fever, vomiting of blood, dys-entery, liver diseases, stone in the kidneys and bladder, sprue and chronic indigestion. It is taken as a vegetable. The juice is given with glucose.

(ii) The Confection

Koozhmanda Lehia or confection is beneficial in con-sumption. It renders the urine alkaline. It purifies the blood.

117. WORM-KILLER

(INDIAN BIRTHWORT)

English Hindi : Wormkiller : Gandan

Kanarese	: Sanajali-hullu
Tamil	: Adutindapalai
Telugu	: Kadapara
Malayalam	: Atu-tinta-pala
Marathi	: Gandhani
Gujarati	: Gudhafee
Sanskrit	: Ajaspurisaha
Goats do not touch or eat this	Hence the significant name Adulti

Goats do not touch or eat this. Hence the significant name Adutindapalai. It is a kind of small shrub.

(i) Properties and Uses

It is an anthelmintic, emmenagogue, stimulant, tonic, pur-gative, alterative and anti-periodic. It is useful in black-leprosy, eczema, rheumatism, worms in the bowels. It gives strength and increases the semen.

(ii) Preparation

Re: Fresh leaves of worm-killer 2 ounces

Boiling water 20 ounces

Infuse for 2 hours and strain. Dose: 2 tablespoonfuls. Use-ful in above diseases,

(iii) Leaves and the Paste of the Root

The dried leaves also can be used. The root is useful in poisoning by venomous serpents. Other kinds of poison also will be neutralised. Make a paste of the root with a little water. Mix it in 2 ounces of water and then administer, in cases of poi-soning by bites of venomous snakes. Dose: Weight of 21 ganjas (42 grains).

(iv) Powder

The powder of the root is useful in inducing labour pains. Dissolve the powder in 4 ounces of hot water. Dose: Weight of 21 ganjas (42 grains).

(v) Oil

Take the juice of the whole plant along with this root. Add equal parts of sesamum oil. Boil, till the juice evaporates. This is useful as an external application in black leprosy and ec-zema.

Re: Paste of the whole plant 4 ounces

Sesamum oil 20 ounces

Boil and strain. Dose: 1 teaspoonful half an hour after food once daily. To be taken for 40 days. Useful in the initial stage of leprosy.

PART-II

CHAPTER XXXIII

ANTISEPTICS AND BAZAAR DRUGS

118. LYSOL

It is an antiseptic and disinfectant. It is used as a vaginal douche: y to 1 teaspoonful of pure lysol added to 2 pints of warm water.

119. D.D.T.

This is a new insecticide. It means Dichloro-diphenyl-trichloroethane. This is useful in destroying lice and mosqui-toes. It may be used in powder form or as a solution. It is em-ployed to destroy vermin and insects in houses, ships, aircraft.

120. BRAN

Put a quater of a pound of bran into a saucepan with one and half pint of water. Simmer till reduced to a pint. Strain when cold. This is a good drink for diabetes. This is also an excellent remedy for cough and sore throat. Sweeten it with honey or sugar.

121. DILL WATER

Dill is a herb from which a volatile oil is obtained. This is useful in flatulence or wind in the bowels, colic and stomachic in infants and the aged. Dose: 2 to 4 teaspoonfuls.

Dill water is obtained from the fruit of the Anethum Graveolus. It has an aromatic smell.

Dill, anisi, fennel, caraway and coriander are all identical in action. They are powerful carminatives. They relieve the gripping of purgatives.

122. GARLIC

It is hot and stimulant. It is useful in coughs, fevers and other debilitating conditions. The juice is dropped into the ear for earache and temporary deafness. It is useful in atonic dys-- pepsia, flatulence and colic. It relieves whooping cough. It is a powerful agent in reducing blood pressure. It is useful in pneu-monia asthma. Dose: 30 drops of juice 3 times daily.

123. HONEY

It can be taken in place of glucose for supplying energy. It is useful in weak heart, palpitation and wasting diseases. It has a soothing action in cough, cold, sore throat. It is useful in eye troubles. burns and scalds.

124. SARSAPARILLA

It is a dried, long, slender root. It is popularly known as the Jamaica Sarsaparilla. It is an antidote for syphilis. It is useful in pimples, face grubs, purfules, blotches, sores, boils, etc. It helps nature in the all important work of carrying off from the body morbid secretions which poison the blood. There is the io-dised sarsaparilla also.

There is the sarsaparilla sherbet, a cooling beverage. A decoction is made out of the root and taken as coffee with milk and sugar in the early morning. Sarsaparilla is a blood purifier.

CHAPTER XXXIV

DRESSINGS AND LINIMENTS

125. ACETIC ACID

A strong solution of acetic acid is used to destroy warts. Touch the wart lightly with the acid. Do not allow it to fall on the surrounding skin.

If you want to check profuse perspiration, sponge the pa-tient with water to which acetic acid has been added in the pro-portion of 2 tablespoonfuls to a quart of water.

126. BELLADONNA PLASTER

This is useful in painful condition of the chest, pain in the region of the heart and other places. The plaster can remain for some days. You can take bath also. After taking bath foment it with a flannel piece or white cloth.

127. BORIC LINT

This is lint treated with boric acid. It is a very handy form of dressing. It only requires to be moistened with hot water before being applied to the wound. It is pink in colour. Place oil paper, oil silk, or any leaf over it. Put on bandage.

128. CARRON OIL DRESSING

Mix linseed or cocoanut oil and lime water. Rub the solu-tion till it becomes an emulsion. Soak a piece of clean lint or cloth in the emulsion and apply it to burns and scalds.

129. EUCALYPTUS OIL

It is a powerful deodorant, antiseptic and disinfectant. Ten drops added to a pint of boiling water will give off a steam that may be inhaled with advantage by sufferers from bronchitis and coryza.

It may be sprinkled about a sick room to purify the air.

It is largely used in the treatment of common cold in the head and influenza. Sprinkle a few drops in the handkerchief and inhale. It can be applied locally to head in headache.

It is made into an ointment and rubbed into the skin in in-fectious diseases.

1 to 3 drops may be taken internally on a lump of sugar.

Eucalyptol is most suitable if used as a spray for coryza and bronchitis.

130. ABC LINIMENT

ABC Liniment is composed of equal parts of liniments aco-nite, belladonna and chloroform. It is used for the relief of pain in a variety of conditions including neuritis and rheumatism.

131. TURPENTINE LINIMENT

This is the best embrocation. It contains oil of turpentine, soft soap, camphor and water. Shake the bottle before use. It is useful in rheumatism of joints, contusion and pain all over the body, sprain, etc.

CHAPTER XXXV

PATENT OINTMENTS AND OTHER OINTMENTS

132. BURNOL OINTMENT

This is an excellent healing ointment. It is useful in chronic ulcers, wounds, abrasion, burns, simple suppurating sores. in-fective skin conditions. It is a safe application as an eye oint-ment.

Smear the ointment on a piece of lint or clean cloth and apply in direct contact with sore, wound or burn. Secure with bandage or adhesive plaster.

133. CIBOSOL OINTMENT

This is useful in scabies, ulcers, boils and wounds. It is an antiseptic.

134. IODEX

It is an useful external application in rheumatism of joints, muscular pain, contusion, pain in the chest, etc.

135. PENICILLIN OINTMENT

This is an antiseptic and germicide. It is useful in wounds, septic ulcers, etc.

136. TANNAFAX

It is a tannic acid jelly. For burns, scalds and abrasions ap-ply the cream lightly and allow to dry before covering with ban-dage. Bandaging may be avoided when not required. In all cases tannafax should be repeatedly applied until the burn has ceased to be moist and red. When healing is complete, the black coating readily peels off, leaving a clean, healthy surface.

For abrasions: the affected skin should be thoroughly cleansed before applying the medicine.

Tannic acid preparations should not be used for serious burns of the hands or face.

137. CHRYSOPHANIC OINTMENT

Re: Chrysophanic 2 drachms

Soft Vaseline 1 ounce

Useful in ringworm.

138. GALL AND OPIUM OINTMENT

This is useful in piles. It will relieve pain and stop bleeding. Apply the ointment with your left middle finger to the anus.

139. REDIODIDE OF MERCURY OINTMENT

This is useful in enlargement of spleen and goitre in the neck. Rub the part with the diluted ointment 1 in 25. Apply a very small quantity. If it smarts apply the ointment on alternate day or once in three days. If there is slight irritation on the part apply a little ghee or vaseline to the area.

140. SALICYLIC OINTMENT

Re: Acid salicylic 1 drachm

Soft Vaseline 1 ounce

1 Useful in ringworm.

141. SULPHUR OINTMENT

Take sulphur 1 drachm and soft paraffin 1 ounce. Mix well. For external use. It is useful in scabies or itch. ringworm and acne.

CHAPTER XXXVI

PATENT MEDICINES FOR INTERNAL USE

142. AMYL NITRAS

It lowers the blood pressure. It has a dramatic effect on the heart and blood vessels. It is useful in angina pectoris and any other condition of violent cardiac embarrassment with pain and asthma. Amyl nitras capsules contain 1 to 5 minims of amyl nitras. Break the capsule and inhale the vapour.

143. CHLORODYNE

This is also known by the name Tincture Chloroformiet Morphi Co. Dose: 10 to 30 drops. To be taken in 1 ounce of wa-ter and repeated in diminished doses every 3 or 4 hours. Useful in diarrhoea, dysentery, cholera, simple cough, influenza, colds, cramp, asthma, colic, etc.

144. EASTON'S SYRUP

The other name is syrup Fern Phosphatis cum Quinina et Strychnine. Dose: y2 to 1 teaspoonful in 1 ounce of water after food. Each drachm contains /32 of a grain of strychnine. This is largely used as a tonic. This contains quinine sulphate, strych-nine hydrochloride, iron, phosphoric acid, syrup glycerin and distilled water. This is taken with much advantage after an at-tack of malaria to purify and enrich the blood.

Iron preparations should always be taken after food. If they are taken on empty stomach they will produce irritation of the mucous membrane of the stomach and bowels. If there is diarrhoea they should not be taken. Iron preparations like bis-muth, colour the motions black. Do not be unnecessarily alarmed at this. Iron produces constipation. Take a dose of ep-som salt occasionally to contract this.

145. ESSENCE OF GINGER

It is a very good remedy for flatulence or wind in the bow-els because of its carminative properties. It is a digestive and stomachic. Dose: 5 to 10 drops.

146. ESSENCE OF PEPPERMINT

This possesses carminative properties. It helps the pass-ing of flatus or wind from the bowels. It is a digestive and sto-machic. Dose: 5 to 30 drops.

147. HUXLEY'S SYRUP

This is a good brain and nervine tonic. It is a blood tonic as well. It improves the quality and quantity of blood. It contains glycerophosphates of lime, soda, potash, iron, manganese and strychnine. Dose for adults: one teaspoonful to be taken twice daily in 2 tablespoonfuls of cold water after food.

148. KURCHI

It is useful in amoebic dysentery. It is an effective amoebicide. It does not produce any of the toxic effects pro-duced by emetine. The barks and seeds are used. The bark contains an alkaloid (conesine), which is non-emetic and is therefore capable of oral administration. Dose: 1 to 2 drachms. Tablet of Kurchi bark in 5 grain doses is available.

149. NEURO PHOSPHATE (ESKAY BRAND)

Each dose (2 teaspoonfuls) contains:

Sodium glycerophosphate	2 grains
Calcium glycerophosphate	2 grains
Strychnine glycerophosphate	1/64 grain

Dose: Adults: teaspoonful in water three times daily, pref-erably before meals. Children: According to age.

This is a very good nervine and brain tonic. It strengthens the memory. It is food for nerves and brain. It gives refreshing sleep. It augments brain vigour and nerve vigour. It removes nervous debility.

B.G. Phos is another useful brain and nerve tonic.

150. PARRISH'S CHEMICAL FOOD

The other name is Syrup Fern Phosphatis Co. Dose: y to 2 teaspoonfuls. This is a good iron tonic for children. Give half or one teaspoonful in 1 ounce of water after food once or twice daily.

151. SANTOGEN

It is an unrivalled tonic food for the nerves, brain and mus-cles. It is invaluable for nervous diseases, sexual weakness, anaemia, brain and physical exhaustion. Dose: 2 teaspoonfuls 3 times a day soon after meals. For children a pinch of sanatogen may be a added to each feed.

Mix 2 teaspoonfuls of sanatogen into a paste with eight teaspoonfuls of cold water. Add gradually, whilst stirring a suit-able quantity of milk to form a thick fluid. Drink at once. Each dose should be freshly prepared. It is very palatable with milk. cocoa, chocolate, tea or any table water. It may be taken with any liquid hot or cold except acid drinks.

152. SAL VOLATILE

Aromatic spirit of ammonia is called Sal Volatile. It is a heart stimulant and also carminative. It is used in the treatment of fainting, as a restorative. It should be mixed with water be-cause it will burn the mucous membrane of the mouth, throat and gullet, if taken undiluted or insufficiently diluted.

153. SYRUP OF FIGS

Dose: 1 to 2 teaspoonfuls for children. For adults: 2 to 4 teaspoonfuls. It is a laxative.

154. SYRUP OF VASAKA

This is useful in cough. Take one or two teaspoonfuls, twice daily in two ounces of water. It is palatable.

155. TESSOL

This is useful in stomach and intestinal disorders, cholera, diarrhoea, dysentery. It is a powerful antiseptic. It has carmina-tive properties. It expels poisonous gases. It relieves pain and removes discomfort. It is an astringent and so it stops diar-rhoea. It stops vomiting, biliousness, cramp, colic and griping. Dose: 15 to 30 drops in a wine glassful of water.

It is useful in sprue, colitis. It contains the essential oils, viz., oil of juniper, oil of clove, oil of cajput, etc. In cholera give 30 drops in half a wine-glassful of water every quarter of an hour for the first 3 hours, then every hour for another three hours. 30 drops 3 times a day for another 2 or 3 days should be followed. After that 30 drops should be taken in water each day until the patient is perfectly convalescent.

CHAPTER XXXVII

POWDERS FOR INTERNAL USE

156. ASAFOETDIA

It is the gum resin of a plant growing in Persia and North-ern India. It is a stimulant and antispasmodic. It is useful in hys-teria, flatulence and nervous affections of women. The dose is from 5 to 10 grains.

157. AMMON. CARBONATE (SMELLING SALT)

Dose: 5 to 10 grains. Smelling of the salt will remove headache, cold in the nose and head. It stimulates respiration and acts as an expectorant. An expectorant is a drug that brings out sputum easily.

Ammonium carbonate is useful in cough, bronchitis, and pneumonia. It is one of the ingredients of cough mixture.

Inhalation is useful in scorpion sting, insect bites, shock or collapse, fainting, etc.

There is lavender smelling salt also.

158. ALUM

This is an astringent. It stops bleeding when applied lo-cally in the form of saturated solution. 2 grains of alum in one ounce of water is useful in conjunctivitis or eye-sore. In bleed-ing from piles a piece of cloth saturated with alum should be kept constantly applied externally. This is useful in the prolapse or descent of anus.

It is used as a lotion in gonorrhoea and leucorrhoea. Dose: 3 grains in one ounce of water.

It is used as a gargle or mouth, wash, for sores in the mouth. Dose: 10 grains in one ounce of water.

Stir an alum tablet five or six times in a pot of turbid water. Turbidity will be removed.

Burnt alum is used in tooth powder. It stops bleeding. It is useful in spongy gums.

159. ASPIRIN

Dose: 3 to 10 grains. This is a white crystaline powder. This is largely used for the relief of neuralgic pain. It causes perspiration and acts as a mild antipyretic (that which combats against fever). It is usually given by mouth in the form of tablet and powder.

It is mixed with equal parts of phenacelin and caffeine. Then it is called APC powder. This is more effective. Caffeine acts as a corrective in counteracting against the depressing ac-tion of aspirin.

This is also beneficial in rheumatism, headache and mus-cular pain all over the body. Do not repeat it very frequently.

Take 5 grains with hot coffee, tea or milk and cover your-self with a blanket in the bed. You will perspire profusely. The temperature will come down within half an hour.

Codopyrine tablets, Anacin tablets, Veganine tables, Saridon tablets, Cibalgin tables and Genasprin tablets contain Aspirin.

160. BISMUTH SALICYLATE

It is useful in diarrhoea, dysentery and intestinal colic. Dose: 10 to 30 grains. Bismuth blackens the faeces. Bismuth is given along with Dower's powder and Salol.

161. BISMUTH CARBONATE

This is a sedative and astringent both internally and exter-nally. It is highly beneficial in gastric pains with all forms of vom-iting and irritating dyspepsia, in gastric ulcer, diarrhoea, etc. It is usually combined with soda-bi-carb, magnesia carb, cal carb and opium as a gastric sedative. It forms a protecting coating on ulcerated surfaces and mucous membrane of the stomach and intestines. It is used as a soothing dusting powder in wounds.

162. BISMUTH AND STARCH POWDER

It consists of equal part of Bismuth Subnitras and starch. It is a soothing dusting powder in eczema and other moist, erup-tions, burns and scalds.

163. CALCIUM LACTATE

It is a tonic to the nervous, circulatory and respiratory sys-tems. It is beneficial in all forms of nervous and cardiac debility. It is the chief constituent of bone and teeth and is used in all diseases of bone in combination with phosphorus and vitamin D.

It is highly useful in all respiratory diseases, asthma, influ-enza, tuberculosis, etc. Dose: 15 to 60 grains.

164. CAMPHOR

Dissolve it in mustard oil. Expose it to the sun. Then it be-comes camphorated oil. This is useful in sprain, rheumatic pains, etc.

Fill the tooth socket with camphor. The worms will die. This is useful in caries tooth.

165. CATECHU

It is a powerful astringent. It stops bleeding from the gums. It is one of the ingredients of a gum paste and tooth powder. It is useful in diarrhoea. Dose: 5 to 15 grains.

166. DOVER'S POWDER

This is a powder which produces good sleep. Take 5 to 10 grains at bed time. Do not give this to a child.

167. EPSOM SALT

The other name is Magnesium Sulphate. Dose: 12 to 4 tea-spoonfuls. This is a saline purgative. It removes much serum from the blood. It produces watery motions. Dissolve the salt in 4

ounces of warm water and drink in the early morning. After-wards drink a tumblerful of hot water.

168. GLUCOSE

This is an energy giving food preparation. It maintains good health. It can be used for sweetening milk, tea, cocoa, lemonade. It is recommended in malnutrition, debility, overstrain and mental or physical over activity. It is useful in convalescence, anorexia (loss of appetite), travel sickness. Dose: 2 teaspoonfuls 2 or 3 times daily.

It is an easily assimilated form of sugar. In the digestion of carbohydrate food, glucose is the final end product. It is benefi-cial in hypoglycaemia when there is insufficient sugar in the blood. It fills the system with energy in a minute.

169. PULVIS GLYCIRRIHAZA Co.

This is useful in piles. Take one or two teaspoonfuls of the powder at bed time in 4 ounces of warm water. This is a good laxative. It contains senna, liquorice root, fennel fruit and sublimated sulphur.

170. MAGNESIUM CITRATE

This is a mild aperient. It is composed of bicarbonate of soda, epsom salt, tartaric acid, citric acid and sugar.

171. RHUBARB

It is a purgative drug obtained from the root of the rhubarb plant. It is also astringent and stomachic. It is largely used as a purgative in the treatment of digestive disorders of young children, especially when these are due to irritating food.

It is administered in the form of Pulvis Rhei Co. (Gregory's powder) and Pilule Rhei Co., which contains aloes, pepper-mint, etc.

172. SANTONIN

This is useful in round worms. Take the powder at night. Mix it with a little sugar. Take a dose of castor oil in the morning. Dose: 1 to 3 grains.

CHAPTER XXXVIII

POWDERS FOR EXTERNAL USE

173. ACRIFLAVINE

This is a product of coal tar. It is used in a 1-1000 solution. It is a powerful antiseptic. It does not harm the tissues. It may be universally used in the treatment of wounds. It stains the tis-sues yellow.

174. BORAX

It is alkaline. It is used as a gargle or mouth wash in sore throats and ulcers in the mouth. It is mixed with glycerine or honey. It cleanses and heals wounds and sore throats. It is use-ful as a tooth powder.

It dissolves the mucous and makes the mouth feel fresh and clean. It is mixed with glycerine for cleaning dry dirty mouth.

It makes an emollient, soothing bath combined with glyc-erine, in the treatment of certain skin diseases.

175. BORIC ACID

It is an antiseptic. It is used as an eye lotion in 10 grains per ounce solution. Use distilled or clean water.

A solution of boric acid is used in leucorrhoea and gonor-rhoea for injection.

It is used as a dusting powder in ulcers.

Internally in doses of 5 to 15 grains it renders the urine acid. It disinfects the urine in gonorrhoea. It is an urinary anti-septic. It is used in solution for washing out the bladder.

Boric ointment is a healing and antiseptic ointment for ul-cers and wounds. Boric acid 10 percent in white paraffin oint-ment or soft vaseline, white or yellow.

Boric acid is used to preserve milk, butter and animal food.

Glycerinum Boracis is used for cleansing the mouth when affected by sores. A four per cent solution of boric acid is used as an antisep-tic wash in foetid perspiration of the feet.

Boric lint is used for giving fomentation.

176. COPPER SULPHATE

This is useful in trachoma or granular lids. Touch gently the granular lids. This is also useful in scorpion sting. Rub cop-per sulphate and salt in a stone with a little water. Apply the thick paste on the spot.

177. POT. PERMANGANATE

This is a deodorant. In the form of crystals it is applied in snake bite. The site should be sacrificed before the medicine is applied. It is used as a diluted solution 1 in 1000 for douching in leucorrhoea, ozoena (chronic discharge of pus from the nose). It is used as a gargle in

pyorrhoea. Rinse the mouth with a weak solution as soon as you finish your food. This will keep the mouth clean and prevent the development of pyorrhoea.

178. PICRIC ACID

It is an antiseptic. It is used in a one per cent solution for dressing burns.

179. PROTARGOL

This is useful in opthalmia or conjunctivitis. y2 to 1 per cent solution is generally used. It is useful in gonorrhoea as an injec-tion. Keep the solution in a blue bottle or amber-coloured bottle.

180. TANNIC ACID

It is an astringent, styptic, haemostatic, coagulant and vaso-constrictor.

It is useful as a gargle for the mouth, as a wash for vagina, urethra and rectum in one per cent solution, as a protective lo-tion in burns 2 to 5 per cent solution.

It is used as a throat paint with glycerine.

181. ZINC OXIDE

It is used as a dusting powder usually mixed with starch and boric acid. Zinc ointment is useful in eczema, skin dis-eases and abrasions.

CHAPTER XXXIX

PRESCRIPTIONS

182. BABCHI

It has been largely used for patches of leucoderma.

Re: Babchi seeds 1 drachm

Hartal Red (arsenic sulphide) 1 drachm

Make them into a fine powder and then into a smooth paste with cow's urine. Apply the paste on the patch. In a few days the colour will begin to change and spots with normal col-our will begin to appear. Soon the patch is healed. You can use Babchi oil along with Harital.

183. BORO-ZINC-ALUM EYE LOTION

Re: Acid Boric 10 grains

Zinc sulphate 2 grains

Alum 2 grains

Distilled water 1 ounce

184. DUSTING POWDER

Re: Acid boric 8 ounces

Zinc oxide 8 ounces

Talc. Powder 1 lb.

Useful for ulcers and wounds.

185. GUM PASTE

Re: Tr. Catechu Tr. Myrrh Tannic acid glycerine 1 teaspoonful 1 teaspoonful

1 ounce

186. GOLDEN OINTMENT FOR EYES

Re: Yellow mercury oxide Soft Yellow Vaseline Useful in eye diseases. 16 grains 1600 grains

187. MANDAL'S PIGMENT

Re: Pure iodine Pot. lodide Glycerine This is a useful throat paint. 6 grains 20 grains 1 ounce

188. STOMACH POWDER

Re: Bismuth Carb	1 ounce
Soda-bi-carb	2 ounces
Calc. carb	3 ounces
Mag. carb	4 ounces
Useful for stomach troubles.	

189. TOOTH POWDER

Re: Camphor	60 grains
Alum burnt	2 ounces
Thymol	30 grains

Acid carbonate Chalk powder 10 minims

1 lb.

CHAPTER XL

PURGATIVES AND LAXATIVES

190. BLACK DRAUGHT

This is also known by the names Mistura Senna Co., and Compound Senna Mixture. This is a good purgative.

Put into a jug one ounce of epsom salt, a teaspoonful of ground ginger, a quarter of senna leaves and half an ounce of liquorice. Add half a pint of boiling water. Stir well and allow it to cool. Strain and use. Dose: 1 to 3 tablespoonfuls to be taken as the first thing in the morning.

191. CASCARA SAGRADA

This is obtained from bark of a special tree. It is a laxative. It is valuable in chronic constipation. It is prepared as Extract of Cascara, 2 to 5 grains; Liquid Extract of Cascara, v; drachm; and Cascara Evacuation, y to 1 drachm.

192. CASTOR OIL

This is a harmless purgative. It removes irritant matters from the bowels. Dose: 1 or 2 ounces for an adult. For children 1 or 2 teaspoonfuls. This can be taken with peppermint water, hot coffee or tea.

193. CONFECTION OF SULPHUR

This is very useful in piles. Take one or two teaspoonfuls at bed time.

194. GLYCERINE SUPPOSITORY

This is useful in the constipation of children. Introduce a suppository into the anus. It will produce a nice motion immedi-ately. A thin piece of soap can be made into a suppository and introduced into the anus. This is commonsense treatment.

195. LIQUID PARAFFIN

This is a good laxative. It acts by softening the faecal mass. Dose: % to one fluid ounce.

196. MYROBALAN

It is a safe and effective aperient. It is useful in dyspepsia, biliousness, flatulence, pain in the bowels. Chronic sores in the mouth and the tongue are cured by regularly taking myrobalan every night. It expels round worms also. The hard outer cover-ing of the fruit should be taken and not the seed. A paste of my-robalan is useful in piles and prolapse of anus. Dose: 3 to 4 drachms or as many fruits.

197. SENNA LEAVES

It is a safe and efficient purgative, well adapted for chil-dren, for old persons, pregnant women and for delicate per-sons. But it is not so well adapted for nursing women as it renders the milk purgative and so causes colic in the child. The taste of Senna may be disguised by sweetening the infusion and adding milk when it much resembles ordinary tea.

Infusion of Senna is made by steeping one ounce of Senna and 30 grains of ginger in 10 ounces of boiling water for one hour and then straining. The dose for an adult is from 1 to 2 ounces.

CHAPTER XLI

TABLETS FOR INTERNAL USE

198. ATEBRIN

This is quinine substitute of chemical origin and is very useful in malaria for destroying the segmentary parasites. It can be given in pregnancy. It is more effective in malignant than in benign tertian malaria. It should be given after food, 3 times daily for 5 or 6 days as a complete course in malaria. It may give yellow coloration to the skin which passes off soon. It is not toxic. Dose: 1 or 1) grains.

199. BLUD'S PILL

It contains a good deal of iron. It is useful in the treatment of anaemia, chlorosis and amenorrhoea, absence of menstrua-tion etc.

200. BREWER'S YEAST

Young people who suffer from boils and other eruptions will benefit by taking yeast. It is a blood purifier. The dose is from a teaspoonful to a dessertspoonful in a little water after meals. It is useful in neuralgia, neuritis, beriberi, etc. It contains Vitamin B. Tablets are also available.

201. CIBALGIN

A combination of amidopyrine and dial (diallylbarbituric acid) with a synergetic action. One tablet or 1 c. cm. solution contains 0.22 g. amidopyrine and 0.03 g. dial.

Indications: Pains of all kinds, e.g., headache, neuralgia, migraine, toothache, earache. In surgery, for wounds, fractures and post-operative pains; prophylactically before operations. In gynaecology, for dysmenorrhoea and its accompanying ner-vous disorders, post-partum and post-abortum pains. In dysentry, following extractions or operations and prophylacti- cally before drilling or filling. Available in Tablets and Am-poules.

202. CIBAZOL

(POWERFUL CHEMOTHERAPEUTIC AGENT)

Indications: Pneumonia, gonorrhoea, meningitis, staphy-lococcal and streptococcal infections, coli infections of the uri-nary passages, bacillary dysentery, plague, small-pox, etc. Available in Tablets, Ampoules, Powder and Ointment

203. CORAMINE

Cardiac and respiratory stimulant having pronounced stimulating action on the vaso-motor and on the peripheral vas-cular system; it stimulates the myocardium, reinforces its con-tractions, leads to an increased depth of breathing and raises the pathologically decreased bloodpressure.

Indications: Circulatory and respiratory crisis (pneumonia, influenza, typhoid fever, diphtheria, etc.). Collapse, shock, cor-onary sclerosis, diabetic comauremic coma. Bronchitis, bron-chial asthma, pulmonary tuberculosis and other infectious diseases, etc. Available in Liquid, Ampoules and Tablets

204. CATHARTIC CO. TABLET B.W. & CO.

This is a good night pill to produce good motion. Take one or two tablets at bed time. Cathartic vegetable tablet is much useful medicine.

205. ENTERO-VIOFORM

This is a specific remedy for the treatment of acute and chronic amoebic dysentery. Dose: 1 or 2 tablets three times a day after the principal meals. After an interval of 8 days, the treatment is resumed for another 10 days.

In bacillary dysentery one tablet can be taken 3 times daily. This dose can be increased when necessary to 6 tablets a day.

Intestinal antiseptic and a specific therapeutic agent for the treatment of acute and chronic amoebic dysentery and other infections and parasitic intestinal diseases. Indications: Amboebic dysentery, colitis, summer diar-rhoea and other intestinal affections.

Tubes of 20 and bottles of 100 tablets.

206. MULTIVITE PELLET

Each pellet contains:Vitamin A3000 International UnitsVitamin B1200 International UnitsVitamin C12.5 MilligramsVitamin D600 International Units

Vitamins are life giving substances of the body. They are like electric sparks. Multivite pellets keep the body in a sound, healthy condition.

207. PALUDRINE

This is a very effective remedy for malaria. As a prophylatic it can be taken during the usual malaria season to prevent malarial infection. The tablets are odourless bitter-tast-ing and white in colour. Administered by mouth they are well tolerated and produce no unpleasantness if the normal dosage is adhered to.

As a prophylatic or for suppressive treatment in the case of healthy individuals living in highly malarious areas, the per-son should take one 0.3 gm. tablet once a week, or one 0.1 gm. tablet every other day.

During an actual attack if it is of benign tertian, take one tablet of 0.1 gm. three times a day for ten days, or 1 tablet of 0.3 gm. once daily for ten days.

If the attack is of the malignant tertian type, take 2 tablets of 0.1 gm three times a day for ten days, or 1 tablet of 0.3 gm. twice a day. In severe cases, for the first two days, take 3 tab-lets of 0.1 gm. three times a day, or 1 tablet of 0.3 gm. thrice daily. Then for the next eight days, take two tablets of 0.1 gm. three times a day or 0.3 gm. twice daily.

208. PEPS

These are cough lozenges or tablets. They contain liquo-rice, anisi, etc. They are palatable. Take one or two at bed time and whenever is necessary.

209. PENICILLIN LOZENGES

Penicillin is the best germicide. This is useful in sore throat, bronchitis, cough, etc.

CHAPTER XLII

TINCTURES FOR EXTERNAL USE

210. TINCTURE MYRRH

Myrrh is an aromatic substance obtained from an Arabian plant. It stops bleeding in spongy gums.

It is useful as a mouth wash: 1 drachm in 1 ounce of water. It is one of the ingredients of gum paste. It stimulates the heal-ing of sores and ulcers in the mouth.

211. TINCTURE IODINE

This is an absorbent, lymphatic stimulant, antiseptic, counter-irritant and resolvent. This is useful in contusion swell-ing, rheumatism of joints, enlargement of lymphatic glands, etc. This can be used as a lotion for cleaning foul ulcers.

Goitre or enlargement of the thyroid gland develops on ac-count of iodine deficiency.

Take 2 drops of French iodine in 2 tablespoonfuls of water twice daily after food for a month. Goitre will disappear.

212. FRIAR'S BALSAM

It is also known by the name Tr. Benzoin Co. It is an appli-cation for wounds. Dip a piece of cotton in the tincture and ap-ply it to the wound. There is no necessity for bandaging. It stops bleeding. It is an antiseptic.

Put a teaspoonful in a kettle containing boiling water and inhale the steam. This is beneficial in bronchitis, sore throat and influenza. It will clear and strengthen the voice. It will pre-vent the development of influenza.

CHAPTER XLIII

PILES, SCORPION STING, SNAKE BITE, WARTS

213. PILES

(i) Devadaalyaadi Lepa

Vandaal seeds	5 Tolas
---------------	---------

Saindhaa Namak (salt) 5 Tolas

Grind these two and with fresh butter milk, till it becomes an ointment. Apply it to the anus, about one tola, after answer-ing the calls of nature.

(ii) Arshakuthaar Lepa

Haridra Pushpa (flower)	2 ½ Tolas
Shanka Choorna	2 1/2 Tolas
Mainasil	2 Tolas

Powder these three, and add to 10 Tolas of extract of Gaja Pippali. Stir well till it becomes as thick as butter. Preserve it in bottles. Apply to the rectum every day.

(iii) Durnaphar Lepa

Seeds of bitter Tumbi	5 Tolas

Jaggery 21 Tolas

Powder it and add to the fresh butter milk, till it becomes an ointment. Apply this 2-3 times daily.

	(iv) Ksheeraadi Lepa
Arka Dugdha	2 Tolas
Thohar Dugdha	2 Tolas
Leaves of bitter Tumbi	2 Tolas
Buds of Karanja	2 Tolas

Grind well. Prepare an ointment by mixing this to 10 tolas of goat's good urine. Apply twicemorning and evening about y2 tola of this ointment.

(v) Shigru Mooladi Lepa

Bark of the root of Suhaajan	3 Tolas
------------------------------	---------

Arka Patra

Grind well in goat's milk and prepare ointment. Apply 3-4 times a day.

(vi) Kaachanee Lepa

3 Tolas

Haridra 2 Tolas

Bitter Turayee 2 Tolas

Grind well in 4 Tolas of mustard oil, till it becomes an oint-ment. Apply 1 tola of it after answering the calls of nature.

	(vii) Nimbaadi Lepa
Neem Leaves	2 1/2 Tolas
Kaneer Leaves	2 1/2 Tolas

Grind well and make it an ointment in 5 tolas of butter milk. Apply twice daily.

(viii) Turaaksheeree Lepa

Vanshalochan	132 Tolas
Chotee Ilaayachee	1 1/2 Tolas
Kattacha (Khadir Sattwa)	1 1/2 Tolas

Neela Tootia (copper sulphate) 1 1/2 Tolas

Powder well. Stir well in iemon juice and make pills of ,i2 tola. Dry the pills. Grind again each of the pill in water and apply 3 to 4 times a day.

(ix) Kaisaraadi Lepa

Chotee Pippali	1 Tola
Haridra	1 Tola
Sankha Bhasma	1/2 Tola
Sazzi Kshaar	1/2 Tola
Leaves and seeds of Karanjee	2 Tolas
Saindhaa Namak (salt)	1 Tola
Naga-kesar	2 Tolas
Ajawain	2 Tolas

Powder well and strain through a cloth. Extract 15 tolas of milk out of Arka leaves and grind the above powder with it. Dry the powder. Again stir well in cow's milk. Preserve it in bottles. Apply before sunrise and before going to the bed to the rectum. Avoid oily preparations, chillies, tamarind, jaggery.

(x) Ahephenaadi Lepa

Nootan Bhang (fresh Bhang) 1 Tola

Ahiphena

1/12 Tola

Powder in fresh water and make like poultice. Apply this to a piece of cloth. Heat it a little and then tie it to the anus.

(xi) Guggulaadi Kalka

Sugar-cane juice	1/2 Seer
Gingily Oil	2 Chattak
Suddha Guggula	5 Tolas

(a) Extract sugar-cane juice first. (b) Add this to ten totals of Gingily oil. (c) Boil it in low fire, till the oil alone remains and take it away from the fire. (d) Take 5 totals of Guggula and strain it in 5 tolas of milk. (e) Add this to the previous one, i.e., the boiled oil, till it becomes an ointment. Preserve it is tinned ves-sel. Apply 1 tola every night before retiring to bed.

214. SCORPION STING

The sting is painful on account of the inoculation of a min-ute amount of intensely irritating poison. The poison is an acid. It is destroyed by treatment with an alkali such as ammonia or carbonate of sodas. Immediately apply a little strong solution of ammonia or carbonate of soda in solution before the poison can diffuse into the tissues. This will relieve the pain and pre-vent any of the unpleasant general effects. Do the treatment immediately. Otherwise, the poison will spread in the tissues. Tie a ligature just above the spot of the sting, immediately.

Death from scorpion sting has been recorded. Scorpions in Deva Prayag Himalaya and neighbouring villages are very poisonous. People generally die. Some villages have been evacuated. Black scorpions are very poisonous. In Malaya scorpion sting is not poisonous at all but stings by centipede are poisonous.

The same treatment can be given in stings by wasps and other insects.

Ipecacuantia paste is also beneficial.

Keep the part immersed in cold water or hot water. Keep up the heat by adding fresh hot water. Tie a thick wet bandage to the affected part. Apply ice. This is very effective. Evaporat-ing lotion is also very effective.

Hip bath, hot foot bath, steam bath, hot fomentation are also beneficial.

The pain is at first like a prick from a needle. In a few sec-onds it assumes an agonising form as if many needles are thrust into the part. One feels as if fire is applied to the part. The pain shoots up towards the body and reaches a climax in ten minutes. The part affected swells up. The lymphatis get af-fected. A red line is seen in the skin. The glands swell. The joint above the part feels stiff.

215. SNAKE BITE

Snakes inject their poison through punctures made by two prominent upper teeth, the fangs. The bites of poisonous snakes show two marks thus. If there are more than two marks, you may conclude that the creature is not poisonous or that the wound has not been inflicted by the poison fangs. The pain is of a stinging character.

There are two principal families, the Colubring of which the best known example is the cobra and the Viperine, of which a good example is the Russel's Viper.

The action of Colubrine poison is chiefly on the nervous system. It causes paralysis of the breathing centre. It acts on the blood to a small degree. But the action of Viperine is chiefly on the blood. It prevents the blood from clotting. It acts on the nervous system to a small extent.

In the case of cobra bite, faintness, drowsiness, loss of power in the legs, and vomiting occur. The breathing becomes short and laboured. The pulse becomes quick and intermittant. The tongue protrudes, The powers of speech and swallowing are lost. Frothy saliva comes from the mouth. Twitching of the muscles also takes place. Cold sweats and convulsions occur. The patient becomes insensible and unconscious.

(i) Treatment

Act as promptly as possible. Ligature the part above the bite, or tie a light bandage or string round the limb, a few inches above the wound, but never on the forearm or below the knee, as there are two bones in these parts and the blood vessels run between them.

Bites by snakes should be sucked out immediately if they can be reached either by the patient himself or by a friend. The mouth of the one performing the operation must not contain any wound or abrasion. The mouth should be thoroughly rinsed with water after each withdrawal of blood.

Or, after incising the wound apply solid permanganate crystals on the wound. Rub them well. Inject 2 grains of per-manganate in solution into 2 or 3 spots round the wound by means of a hypodermic syringe.

Inject anti-venene at once.

Hot coffee or tea may do some good. It is a serious mis-take to dose the patient with whisky or alcohol. Whisky is not an antidote to the snake poison. The patient dies on account of the effects of large doses of strong whisky. Whisky and stimulating drugs like ammonia or strychnine make the conditions worse. Very few people die as a direct result of snake bite. On the contrary very many have died as a result of hasty administra-tion of large doses of whisky after a bite.

(ii) Nature Cure

The wound should be widened by an incision and cleansed with dilute lemon juice. Immediately after this, apply a wet bandage or a wet pack. Fast for a day or two is beneficial. Fasting is the surest method of preventing any poison from bites of snakes.

Pour cold water on the head. Give an enema.

Steam bath, hip bath, spinal bath, trunk bath are also ben-eficial.

The legs, arms and trunk may be bathed with hot water.

(iii) Divine Cure

Do Mrityunjaya Japa and Kirtan vigorously. This is won-derfully effective and highly powerful.

216. MIRACLE CURE OF COUNTRY FOLK

FOR WARTS

Everywhere in the world, the country people have their own peculiar methods of curing certain kinds of diseases, which cannot be easily ruled out as a mere witchcraft. I shall re-late to you an instance that I have personally witnessed. My personal assistant Sri Purushottam Swami had, for a number of years, painless, small, hard excrescences, otherwise known as warts, on all over his hands. His aide, a village-lad from the neighbourhood of Rishikesh, observed this and suggested that he might try a simple cure-of-faith which is usually practiced in the villages, with unquestionable success. The boy himself had warts and was now completely cured through this method.

The method is simple. A solution has to be made by rub-bing a copper-piece on a stone with a little water. It should be applied on the warts with the same copper-piece only once. Then the copper-piece (it can be a piece) should be wrapped with a piece of cloth and discarded at a crossing point of two roads or a trivium.

Purushottam Swami tried this method. His warts disap-peared very soon and not a scar could be found on his hands after a couple of months. Several months have gone by since, and not a single wart has appeared again.

There are a number of similar methods of cure which you can know from the village folk. Do not be prejudiced against them. They are sometimes wiser than even the most learned physicians.

CHAPTER XLIV

EQUIPMENT FOR HOME REMEDIES CUP-BOARD

217. THIRTEEN COMMON HOUSEHOLD REMEDIES

(i) Pepper Lozenges

Powder some black pepper and sugarcandy (Misri). Add equal parts. Mix a little ghee, and make it into small balls. Keep one in the mouth and slowly drink the essence. This is very useful in Bronchitis or cough.

(ii) Camphor-tobacco

If you suffer from carious tooth, stuff the socket with a little camphor and tobacco, the worms will die. You will be relieved from the pain also.

(iii) Burnt Alum

This is very useful in ague or malaria. This is a well-tried medicine. Burn alum in iron pan. Mix it with four parts of sugar. Take one teaspoonful of the powder 3 times in a day. Only three doses will he sufficient to eradicate malaria. You can repeat the medicine, if the fever does not leave you. It does not matter if the fever is or not when the medicine is administered.

(iv) Mulati (liquorice)

Take a Masha of powdered Mulati and mix this with 2 Mashas of sugar. This is one dose. Take this in morning and evening with water. This is very useful in leucorrhoea (whites), and flooding (excessive menstruation).

(v) Lime Water

Ten to twelve drops in a Lota of water should be drunk four times a day. A plug of cotton or cloth soaked in the lime water should be used externally. This should be changed 3 or 4 times a day. This is very useful in flooding or excessive menstruation. This is useful in all kinds of bleedings also.

(vi) Mustard Oil and Camphor

Dissolve some camphor in the mustard oil. Heat this. It is highly useful in lumbago or pain in the hips and back and rheu-matism of the joints, muscular pain in the whole body. If this is applied to the breasts, it will stop the secretion of milk.

(vii) Acetic Acid

This is vinegar. The strong solution is used to destroy warts. The warts is lightly touched with the acid. The surround-ing part is protected by cotton wool. The acid is not allowed to fall on the surrounding skin. This is useful in wasp and bee stings.

(viii) Anethi Water

This is useful in increasing the milk in nursing mothers.

(ix) Curd Loaf

Bind curd in a piece of cloth and let its water drop out. Take this curd and mould it in the form of a bread loaf. Place this over the carbuncle and put on bandage. Change this three or four times a day. All sloughs will come out easily. This is very cool-ing application too.

(x) Oil of Babchi

This removes the patches in the skin (leucoderma or white leprosy). The pigment reappears on the skin. The oil is rubbed well in the affected area.

(xi) Senna Leaves (Sonnamukhi)

This is good, harmless, purgative. One or two teaspoon-fuls of the leaves are boiled in water. The water is strained and drunk. You can add a little dried ginger and dried rosebuds.

(xii) Castor Oil

This is very soothing purgative. It can be taken along with peppermint water, tea or coffee. If some drops are put in the eyes at night, the foreign particles of dust or charcoal will be removed easily.

(xiii) Tincture Quinine Ammoniate

This is very effective in cold in the nose. Take half a tea-spoonful or one teaspoonful in 2 tablespoonful of water once or twice. You can find relief at once.

218. DOMESTIC REMEDIES

FOR MEDICINE CHEST

- 1. Acetic acid.
- 2. Boric acid or Boric powder.
- 3. Alum powder.
- 4. Bicarbonate of soda.
- 5. Easton's syrup.
- 6. Essence of ginger.
- 7. Essence of peppermint.
- 8. Liquid extract of cascara.
- 9. Glycerine.
- 10. Honey.
- 11. Liniment of iodine.
- 12. Tincture of iodine.
- 13. Oil of turpentine.
- 14. Boric ointment.
- 15. Chrysophonic ointment.
- 16. Zinc ointment.

17. Vaseline.

18. Strong solution of ammonia (Liquor Ammonia Fortis).

- 19. Permanganate of potash.
- 20. Salvolatile or (Spiritus ammonia aromaticus).
- 21. Wine of Ipecac.
- 22. Citrate of caffeine.
- 23. Phenacetin.
- 24. Subnitrate of bismuth.
- 25. Aromatic chalk powder.
- 26. Dover's powder.
- 27. Calomel.
- 28. Chlorodyne.
- 29. Gregory's powder.
- 30. Sweet spirit of nitre.
- 31. Opodeldoc or soap liniment.
- 32. Perogoric.
- 33. Quinine.
- 34. Strong tincture of ginger.
- 35. Magnesium Citrate, granular effervescent.
- 36. Epsom or glauber's salt.
- 37. Compound Jalap powder.

The doses, action and therapeutic uses of the above edies will be dealt with in subsequent numbers.

219. HOME REMEDIES

CUP-BOARD

(i) Equipment for Dressing

Absorbent

: cottonwool

Adhesive

: plaster on spool

Bandages : width one, two or three inches

Boric lint for fomentation.

Enema syringe

White lint for the spreading of ointment.

(ii) Equipment for External Uses

Acetic acid	Alum powder
Antiphilogestine	Boric powder
Dettol (disinfectant)	Emulsion of airiflavine in liquid paraffin
Hydrogen peroxide	Linseed meal
Methylated spirit	Olive oil
Permanganate of potash	Soft vaseline
Tincture of iodine	Turpentine liniment
Zinc oxide.	

(iii) Equipment for Internal Uses

Eye dropper

Aromatic spirit of ammonia	Aspirin tablets
Castor oil	Cathartic vegetable tablets
Chlorodyne	Cough mixture
Dover's powder	Easton syrup
Essence of ginger	Essence of peppermint
Eno's fruit salt	Glycerine
Honey	Liquid extract of cascara
Mag sulph	Milk of magnesia
Paludrine tablets	Penicillin lozenges
Paregoric elixir	Quinine tablets
Senna pods	Sodii bicarbonate
Syrup of figs	Subnitrite of bismuth
Tincture quinine ammonia	(iv) The Appliances
Clinical Thermometer	Douche can

220.COMMN HERBS

THEIR NAMES IN DIFFERENT LANGUAGES

TAMIL	SANSKRIT	HINDI	Latin
Chitramutti	Bala		Pavonia Zeylanica
Peramutti	Mahabala	Suganda Vala	Pavonia Oiorata
Karkadaga Singhi	Karkatashringi	Kakrasingi	Rhus Succedenea (Eng:The Galls
Karisilankanni	Bhringaraj: Kesaranja	Bungrah	Eclipta Prostata

Vallarai	Brahmi	Khulakudi	Hydrocotyle Asiatica (Eng: Indian Pennyworth
Sombu	Sthula jeerakam		Pimpinell Anisum (Eng. Anise Seeds
Sathakuppai	Misi	Suva	Anetheum Sowa Eng The Dilll
Vasambu	Vacha	Bach	Acorus calamus Eng: Sweetflag)
Kudasppalai (Bark used)	Kutaja	Karva indarjow	Marsdenia volubilis (Eng: The Kurchi Tellicherry Bark)
Amman Pachcharisi		Dudhi	Euphorbia Pilulifera (Eng: Australian Asthma weed)
Kandangkattiri	Kanta Kaarikaa	Kateli	Solanum Jacquini (Eng: Wild eggs plant)
Mudakkatran	Kshirini, Karnaspota	Kanphata	Cardiospermum Helicacabum (Balloon vine)
Ponnangkanni		Meenakshi	Allernanthera Sessiles
Tumbai	Dronapushpi	Gumamadhupati	Leucus Aspera
Manaththakkali	Kakamachi	Make	Solanum Nigrum
Chukku	Nagaram	sonth	Zingiber officinalis (Dried Ginger)

APPENDICES

APPENDIX-I

INDEX TO THERAPEUTIC ACTION OF BAZAAR DRUGS

Alterative (Vyadha-bheda-kari) is a drug that alters the morbid or unhealthy processes in the body and restores the normal functions of an organ in some unknown way. It corrects or alters a poisoned condition of blood stream and restores healthy functioning. Example: Akrot (walnut), Adhatoda, white pumpkin, sarsaparilla, apamarga, chiretta, garlic.

Anaphrodisiac is opposite of aphrodisiac. It depresses the sexual organ. E.g., Camphor, etc.

Anti Sialagogue: A drug or substance that reduces the flow of saliva.

Antiseptic (dhatu ksheenarothi) is a remedy that prevents putrefaction and inhibits the growth of germs. E.g., Ajowan, benzoin, tobacco, betel, nim oil, cloves, sugarcane, sandal, etc.

Antispasmodic (anghakarshana nasini): It is an agent or remedy that allays or relieves convulsions or spasmodic pains. E.g., opium, adhadhodha, cloves, Ajowan, cannabis, saffron, jadamanchi, tobacco, mint, asafoetida.

Antilithic is a medicine or substance that prevents the for-mation of stones in the gall-bladder, kidneys, urinary bladder, etc. E.g., coffee seeds, benzoin, mountain nim.

Anti-Philogistic: A remedy that reduces inflammation. E.g., opium.

Anti-Soporific: A remedy that prevents sleep and keeps one awake. E.g., tea, coffee, etc.

Antidote (Vishanasini): A remedy that counteracts the ac-tion of a poison. E.g., belladonna for opium, etc.

Antibilious (Pitthasanthini): A remedy that produces a soothing effect over diseases caused by excessive secretion of bile. E.g., ginger, lemon, cumin, coriander, etc.

Anthelmintic (Kriminasini): A remedy or medicine that ei-ther kills or renders powerless or expels intestinal worms (vermicide and vermifuge). E.g., bark of walnut, Adhatoda, black cumin, palas, asafoetida, bark of pomegranate, fruits and seeds, garlic, leaves and seeds of nim. Antiperiodic: An agent that acts against the poison of peri-odic fever like malaria. E.g., apamarga, pepper.

Anti Rheumatic (Vataharakari): A remedy that prevents the Vata diseases in the body. E.g., pepper, dried ginger.

Antispasmodic is a drug that acts against spasm of mus-cles. It reduces or prevents excessive muscular contractions. E.g., Valerian, Belladonna, Lobelia, etc.

Antipyretic: A remedy that reduces the temperature of fe-ver. E.g., pepper.

Anodyne (Vedanasantani): A drug that gives relief from pain. E.g., opium, cannabis.

Aphrodisiac (Kamavardhini) is a medicine that stimulates the sexual passion. E.g., walnut, linseed, black-gram, cinna-mon, cannabis, radish, nutmug, jalamisri, asafoetida, dates, cashewnuts, lady's finger, methi seeds, betel.

Aromatic is a drug that stimulates digestion and appetite. It has good aroma. E.g., Cardamom, Spirit-Ammonia, Aromaticus, calumba, etc. Astringent (Sankosanakari): A substance that causes contraction of organic tissues or arrests bleeding diarrhoea, etc.. E.g., walnut, asoka, isofgul seeds, Ajowan, poppy seeds, Bengal-gram, catechu, Madras nut coloured, Ragi, guava, Horse-gram, sandal, cumin seeds, triphala, apamarga, jambul, mint, mangusteen, gall-nut, pomegranate bark and seeds, bael fruit, methi seeds, betel, gum arabic.

Cardiac Depressant (Apakarshanakari) is a drug or sub-stance that retards or depresses the action of the heart.

Cardiac Stimulant (Brudushnakari) is a remedy that stimu-lates the heart. E.g., chillies, coffee.

Cerminative (Udharavathaharakari): A drug that expels wind from the bowels and relieves pain and corrects digestion. E.g., ginger, cloves, cinnamon, long pepper, nux vomica, lemon, cardamom, Ajowan, coriander, nutmeg, cumin seeds,

dried ginger, mint, asafoetida, turmeric, pepper, tailed pepper, methi seeds, garlic, white pepper, betel.

Cathartic: A drug that promotes evacuation from the bow-els. It is divided into (1) laxative which induces gentle bowel movement, E.g., figs, prunes, phenolpthalin etc., and (2) pur-gative which produces copious, repeated and more watery mo-tions, E.g., Pulvis Jalap, Croton, etc.

Chologogue (Pithakari): A remedy that promotes the se-cretion or excretion of bile. E.g., podophyllin, walnut seed.

Cordial (Rakthavardhani) Blood tonic: A drug that im-proves the quality and quantity of blood. E.g., fig, sarsaparilla.

Depurative (Malina-nivartini): A remedy that purifies the animal economy. E.g., Palas.

Deodarant (Bhutigandha nasini): A remedy that destroys, removes or corrects offensive odour. E.g., Benzoin.

Demulcent (Antar Snigdhakari): The drug that soothes or protects the mucous membrane. E.g., liquorice, linseed, isafgul, black-gram, sesamum, cucumber, poppy seeds, gum, sugarcane, wheat, grapes, tulasi, sarsaparilla, Jack, barley, dates, plantain fruit, wood apple, onion, lady's finger, methi seeds.

Diaphoretic is a drug that produces increased perspira-tion. It reduces fever by inducing increased perspiration. E.g., Hyoscyamus, Spirit Acthenia, Nitrosi etc.

Discutient: An agent that causes disappearance of swell-ing. E.g., nim leaves.

Disinfectant (Aganduka-roka-nasini): A remedy that de-stroys germs and prevents fermentation and putrefaction. E.g., Vasambu.

Digestive (Pachana Kari): A drug that promotes digestion. E.g., ginger, bael, Ajowan, cumin, black pepper.

Diuretic (Mootra Vardhani): A drug that increases the flow or secretion of urine.

Ecbolic is an drug that increases the activity of a pregnant uterus.

Emitic (Vamana Kari): A remedy that causes vomiting, E.g., salt, mustard, copper sulphate, alum, dhatura, tobacco.

Emmenagogue (Ritu-vardhani): A remedy that stimulates and regulates the menstrual flow. E.g., pine-apple, Adhatoda, linseed, sesamum, black cumin, saffron, papaya, asafoetida, onion, methi leaves.

Emollient (Snigdhakari): An agent which by external appli-cation soothes the skin. E.g., castor oil, vaseline, isafgul, gum arabic, lady's finger methi seeds, ground-nut.

Errhine (Sirovirechani): A drug when applied to the mu-cous membrane of the nose, increases nasal secretion. E.g., tobacco. Expectorant (Kaphaharakari): A drug that promotes expectoration of phlegm or sputum. E.g., liquorice, opium, Adhatoda, jadamanchi, benzoin, tulasi, asafoetida, dates, tailed pepper, onion, garlic.

Febrifuge (Jvaraharakari): A remedy that lessens or re-moves fever. E.g., Bael leaves, betel, pepper, etc.

General Anaesthetic is a drug or substance that stops bleeding by cogutating the blood or contracting the arteries and arterioles. E.g., Calcium-chloride, pituitrin, opium, adrenalin, etc.

Germicide (Kriminasani): A remedy that destroys the mi-cro-organism or germs. E.g.. Adhatoda, Vasambu. Also see Anthelmintic. Haemostatic (Raktha sthambhanakari) is a drug that ar-rests or restrains bleeding. E.g., opium, pine apple, white pumpkin, pomegranate, gall-nut.

Hepatic (Yakrutha balakari) is an agent or medicine that tones the action of the liver. E.g., ammonium chloride, etc.

Hydragogue (Jalavirochani): A drug that produces watery motions by inducing free secretion from the intestional glands and removing much serum from the intestinal blod vessels. E.g., croton.

Hypnotic or Soporific (Nidrakari) is a drug that induces sleep. E.g., opium, cannabis. For opposite action see Antisoporific. Lactagogue (Ksheeravardhini): A remedy that increases the secretion of milk in the breasts of nursing mothers. E.g., lin-seed, cotton-seed extract, potatoes, black-gram, seasamum, black cumin seeds, methi seeds, betel.

Lactifuge (Ksheeranasini): An agent that reduces or stops the secretion of milk in the breasts. E.g., the bark of walnut, Arabian jasmine.

Laxative (Malakari): A remedy that loosens the bowels, a mild purgative. E.g., walnut seeds, liquorice, fig, castor oil, lin-seed, potatoes, sesamum, Bengal-gram, sugarcane, grapes, amalaka, myrobalan, papaya, tamarind fruit, asafoetida, methi leaves, ground-nut.

Local Anodyne (Sarmaveda nasandani): An agent which relieves pain in the skin (locally).

Local Anaesthetic (Smritirodhakari): A substance that pro-duces less of sensation locally. E.g., oil of cloves, ice, cocaine, etc.

Local Stimulant: A drug that irritates the skin locally.

Lithontriptic (Pashanabhedini): A remedy that has the power of dissolving the various stones in the body, in the gall-bladder, kidneys and urinary bladder. E.g., Benzoates for phosphatic and alkalis for uric acid caculi in the urinary tract.

Mild Diuretic (Laghu-mootra vardhini) is a drug or sub-stance that slightly increases the flow or secretion of the urine.

Muscular Tonic is a drug that tones up the muscular tis-sues. E.g., the seeds of pomegranate, Madras-nut (kalipakku).

Narcotic: A drug or remedy that produces narcosis or stu-por. E.g., opium, stramonium or dhatura, cannabis, nutmeg, to-bacco. Also see Hypnotic or Soporific.

Nervine Tonic: A remedy that causes nervous excitement or gives tone to the nervous system. E.g., Brahmi.

Nervous Sedative (Nadisamanakari): A remedy that pro-duces a soothing influence by lowering the functional activity of the nervous system. Eg., potatoes, opium, cannabis.

Nutrient or Nutretic (Poshanakiari): A drug that nourishes the body as a whole. E.g., Lavang (cloves), black-gram, sesamum seeds, cucumber, poppy seeds, sugarcane, white pumpkin, wheat, ragi, sweet-potatoes, maize, grapes, green-gram, barley, jack, date, plantain fruit.

Parasiticide (Krumikni): An agent that kills parasite. E.g., Black cumin.

Parturifarient (Prasavakari): A remedy that induces the la-bour pain in order to hasten the delivery. E.g., Cannabis.

Purgative (Virechani): A remedy that causes copious wa-tery evacuation of the bowels. E.g., castor oil, croton, jalap, etc.

Refrigerant (Seetalakari) is a drug that has cooling proper-ties or lowers the bodily temperature. E.g., walnut, black-gram, sandal, lemons, Bengal-gram (Chang), sugarcane, sweet-po-tatoes, grapes, coconut water, amla, green grass, mint, leaves of tamarind, dates. pomegranate fruit, wood apple, lady's fin-ger, methi leaves, cucumber.

Resolvent: An agent that causes the absorption of inflam-matory or other swelling. E.g., Pepper, hill nim flower.

Restorative is a drug or medicine or food that is effica-cious in restoring one to health and vigour.

Rubefacient (Shonakari): A drug that produces reddening of the skin.

Sedative (Samanakari): A substance that produces a soothing effect by lowering functional activity. E.g., opium, can-nabis, tobacco. Sialogogue (Dhravakari): A drug that increases the flow of Saliva. E.g, ginger, Ajowan, tobacco, betel.

Stimulant (Ushnakari): A remedy that exites the functions of an organ or some process of the body economy. E.g., opium, ginger, nux vomica, sesamum, Ajowan, cannabis, coffee, saf-fron, coriander, jadamanji, sandal, cardamom, cumin, dried ginger, Tulasi, chiretta, mint leaves, turmeric, chillies, pepper, resin, radish, tailed pepper, onions, garlic, betel, ghee.

Stomachic (Jatharagni Vardhani): An agent that invigo-rates the functional activities of the stomach. E.g., Ajowan, gin-ger, cloves, black cumin, cardamom, saffron, coriander, cumin, dried ginger, jambul, chiretta, mint, dates, chillies, radish, bael, garlic, betel, the flower of nim. Sudorific is a drug or substance that increases the flow of perspiration and reduces high temperature in fever. E.g., Tr. Hyoscyamus, Spt. Aetheris Nitrosi, Lqr. Ammonia Acetetics etc.

Tonic (Balakari): A drug that restores the normal tone of the body. E.g., Akrot, black-gram, sesamum, Ajowan, white pumpkin, horse-gram, sarsaparilla, chiretta.

Uterine Tonic: A drug that tones the uterus. E.g., Asoka.

Uterine Sedative: A remedy that produces a soothing ef-fect on the uterus by lessening its functional activity. E.g., Asoka.

Vermicide is a drug that kills the worms in the bowels. E.g., Santonin, Betanaphthol, oil of chenopodium, etc.

Vermifuge is a drug that causes expulsion of worms from the bowels.

Vesicant (Tuvakspotakari): A drug that produces vesicles and blisters when applied to the skin, E.g., Mustard.

NAMES OF BAZAAR MEDICINES

(ENGLISH-HINDI)

Ajowan—Omum seed, carum

Aloes-Musabar

Alum—Phitkari

Ammonium Chloride—Nausadar

Anise seed—Sonf

Arusha, Vasaka—Adhatoda

Asoka—Saraca Indica

Atis—Aconite heterophyllum

Baberang—Embelia Ribes and Embelia Robusta

Babul Gond—Gum Babul

Bach—Acorus Calamus

Betel-nut, Areca nut—Supari

Bhindi—Abelmoschus-Hibiscus

Bhoree-loth—Toonia-loth

- Bonduc-nut-Katkalija
- Borax-Sohaga
- Butea gum-Palas-ki-gond
- Butea seeds-Palas-ki-bij
- Camphor—Kapur
- Capsicum, chillies—Lal Mirch
- Caraway seeds, cumin seeds—Jira
- Castor oil—Arandi-ke Tel
- Catechu—Kaththa
- Charcoal—Koylah
- Chaulmoogra oil-Chaulmoogra Tel
- Choobchini—China root
- Copper sulphate—Nila Tutiya, Tutia
- Coriander seeds—Dhania
- Creat or Kriyet—Kalmeg
- Cubebs—Kabab-chini
- Dadmurdan—Ring-Worm shrub
- Dill-Soyah
- Fennel—Ban Sonf
- Galls—Maiphul, Majufal
- Garjan Tel-wood oil
- Ground nut, monkey nut<197>Mungphalli

Gulancha—Tinospora Cordifolia

Inder Jat-a kind of seed

Isaphgul-seeds of Plurnbago Ovata

Jangli Pikvan, vomiting swallow wort—Anantamul

Jatamansi, Balchir—Indian Spikenard

Kakra Singhi—Gall like excrescences found on Pistacia Integermia and Rheus Succedanea

Kaladana—seeds of 1pomoea hedercea

Kamala—powdered capsules of Mallotus philippinensis

Karmari—Cocculus Indicus seeds

Kokum—seeds of Garania purpura

Kurchi-Wrightea anti-dysenterica

Lalchita—Lead wort

Lemon grass—Gandha bena, Andropogon citratis

Lime—Nimbu

Liquorice-Mulathi

Mangostin—fruit of Garcinia Mangostana

Musk—Kasturi

Mustard—Rai

Myrobalan (belerica)—Bahera

Myrobalan (Chubelic)—Har or Chhoti Har

Myrobalan (Embelic), Indian Gooseberry — Amla

Myrrh—Bol

Papaiya—the fruit of carica papaya, papeeta

Pipul, pupuli, pupil' Mula-long-pepper

Pithori-Turband—white Turpeth root,

the root of 1pomoea turpethum

Plantain, Banana-Kela

Pomegranate—Anar

Potas Nitras—saltpetre shora

Rasaut, Barberry root—Dar Haldi

Sandal wood—Chandan

Sarsaparilla—Salsa, Anantamul

Sendha Nimak—rock salt

Senna-Sonnamakki

Shajna, Moringa—Horse-radish tree,

the fresh root of Moringa pterygosperma

Sodium Chloride—Namak

Somraj—Veronica seed, purple Fleabane

Sufed Damar—Piney Resin

Sulphate of iron—Kasis, Hiri Kasis

Sulphur—Gandhak

Talmakhan—Asteracantha

Tamarind—Imli

Turmeric--Haldi

Vinegar—Sirka

SIMPLE VETERINARY TREATMENT AT HOME

Reciprocity is one of the inescapable facts of life. Beings are inter-dependent in this world. Domestic animals are indis-pensable to man in carrying on the daily business of living. The horse, the Cow, the goat, the dog, the fowl, have all been part of man's home far back from the earliest times. In India it is more than ever so, for this land is essentially rural. Without cattle, the Indian would find life impossible. The Cow is our greatest friend and nourisher. So very important is this gentle creature that it has been defied by our ancients. A village without cattle was likened to hell itself. The sacred Go-mata is an object of daily worship, the Go-puja, to the devout Hindu housewife.

The factors of diet most essential for the health. strength and vitality of the family are got from the cow. The purest, the richest and the best food is provided by the cow. The health-giving Vitamins come to us in the form of Milk, Curd, But-ter, Cream, Ghee, Butter-milk, etc. Indeed, the cow is in fact a Mata or mother as she is the nourisher par excellence to every-one, from the infant to the old man, in the home. It is therefore the Sacred Duty of man to look after and care for the cow. The health and welfare of the Cow contributes directly to the health and welfare of the human beings. Healthy Cows mean a good supply of pure milk, curd, butter, etc. A good supply of pure milk, curd and butter means well-fed, healthy and strong chil-dren in the home.

Like human beings these domestic animals too have their own peculiar sickness and ailments. Cows also fall sick. You must know how to treat and cure them in simple cases. Here are some useful prescriptions that I have given to enable you to treat simple veterinary cases at home. I need not mention that commonsense sanitary measures are part of cattle-care in any case. The medicines given below are all simple, easy to make and readily available in the local bazaar. The dosage for a young calf would be half or one third of that of an adult cow. While treating remember that you are really doing true Go-Puja.

PRESCRIPTIONS FOR THE SICK COWS

(1) Tympanites

This is a common complaint The stomach is distended. There is much accumulation of wind. Much discomfort is felt by the animal. She may refuse food or water and may die soon if not treated properly.

Re: Oil Turpentine	2 ounces		
Asafoetida	2 drop's (dissolved in		
	2 drops warm water)		
Linseed or mustard oil	1 pint.		
Mix all the above well and give in	a single dose. If no relief is obtained, repeat the dose after 2		
hours.			
(2) Indigestion or Depraved Appetite			
Re: Ammonium Chloride	3 drachms (spoons)		

1 ounce

Sodium Chloride

Chiretta 4 drachms

Ginger 4 drachms

Powder all the above and mix well in $\frac{1}{2}$ seer of water. This is the dose to be given every morning for 4 days.

(3) Diarrhoea

Purging or loose motions is a very troublesome complaint among cattle.

Re: Chalk	1 ounce
Catechu	4 drachms
Opium	30 grains
Ginger	4 drachms

Powder and give one dose in y seer of rice gruel (Hindi: Chaval-ka-maand) for three days. During treatment do not give drinking water, but give plenty of rice gruel with 1 chhatak of salt instead of water.

(4) Constipation

Re: Mag. Sulph.	1 pound
Sodi. Chloride	4 ounces
Ginger	1 ounce
Acqua (warm)	2 pints

(5)	Couah	and	Catarrh
<u>۱</u>	ς,	Cougn	01110	outaini

Re: Camphor	2 ounces
Ammon. Chloride	4 ounces
Pot. Nitras	4 ounces
Bark of the root of Ark plant	
(Calytropis)	2 ounces
Linseed	8 ounces
Treacle or Gur	10 ounces
Round together and mix well 1	Chhatak dose t

Round together and mix well 1 Chhatak dose to be given twice a day to the cow. Diet during treatment should be con-fined to warm Bran mash. Bran is wheat bran.

(6)	Fever
-----	-------

Pot. Nitras3 drachmsAmmon. Chloride3 drachmsMag. Sulph4 ouncesGive in ½ seer of water twice daily.

Note: Normal temperature of cow is: 102 F. taken in the rectum.
